Descriptive Report
to accompany Topographic Sheets of Oahu Island.

The topography on the sheets of Kaena, Waimea Barbers Point and Diamond Head, was executed using Geographic Positions given in original computations of Mr Alexanders survey. That of Kaneohe, Kahuku, and Waiahua sheets, was executed using Geographic Positions computed by Mr French in 1910.

The projection is left in pencil in order that it may be shifted to suit revised positions being computed in the office.

A complete topographic survey of the island has been made by the Army Engineers which will be available for use in making charts of the island.

The names of plane table stations on the sheets are the ones used by "Explorer" in doing hydrography.

Honolulu and Pearl Harbors were omitted as better charts can be obtained from other sources.

M-2168-1

A basic hydrographic or topographic survey supersedes all information of like nature on the uncorrected chart. Give reasons for deviations, if any, from recommendations made under "Comparison with Charts" in the Review.
