Summary to Accompany Descriptive Report

T-10908 & T-10909

Planimetric maps T-10908 and T-10909 are part of Project Ph-5901 which consists of 24 planimetric maps and one shoreline survey. These maps cover a portion of both sides of the Potomac River. On the Virginia side, the manuscripts cover the upper part of Mathias Point Neck; on the Maryland side the area covered is from a point about 2 miles south of Popes Creek to approximately 3 miles north of Popes Creek. Also included is a small section of Cedar Point Neck on the Maryland side of the river. This is a graphically compiled project at a scale of 1:10,000 in advance of hydrographic surveys to be made in the area. The maps were covered by 9-lens photography of May 1958, single-lens "W" photography of October 1959 and "S" photography of July and August 1961. The manuscripts were controlled by radial plot using Stereoplanigraph bridge points to supplement field identified control. The field operations preceding compilation included complete field inspection, recovery and identification of horizontal control and bench marks, establishment and recovery of recoverable topographic stations and the identification of Aids to Navigation. The manuscripts are vinylite sheets 3-3/4' in latitude by 3-3/4' in longitude which were scribed and reproduced on cronaflex following photogrammetric office review. The registered copies under T-10908 and T-10909 will consist of a cronar film positive and a cronar film negative of each scribed manuscript.

COAST AND GEODETIC SURVEY
CONTROL RECORD[illegible]

COMPILATION REPORT

T-10908 & T-10909

The field inspection report for T-10908 and T-10909 is a part of Descriptive Report T-10921 and T-10922.

The photogrammetric plot report for T-10908 is part of the Descriptive Report T-10926 and T-10927.

The photogrammetric plot report for T-10909 is part of Descriptive T-10921 and T-10922.

31. DELINEATION

Delineation was by the graphic method.

32. CONTROL

The identification, density and placement of horizontal control was adequate.

33. SUPPLEMENTAL DATA

None.

34. CONTOURS AND DRAINAGE

Contours: Inapplicable.

Drainage was selected after comparison with field inspection, office interpretation, and U.S.G.S. Quadrangles. Most drainage was taken from the quadrangles.

35. SHORELINE AND ALONGSHORE DETAILS

There are no shoal or low-water lines.
The shoreline inspection was adequate.

36. OFFSHORE DETAILS

No comment.

37. LANDMARKS AND AIDS

No landmarks.

Form 567 is herewith submitted for two aids to navigation.

38. CONTROL FOR FUTURE SURVEYS

Two recoverable topographic stations were located on T-10909.

A list is in paragraph 49.

39. JUNCTIONS

Junctions have been made and are in agreement with the following:

To the north with T-10905

To the south with T-10914 and T-10915

To the east with T-10910

To the west with T-10907

40. HORIZONTAL AND VERTICAL ACCURACY

No comment.

41. thru 45.

Inapplicable.

46. COMPARISON WITH EXISTING MAPS

Comparison has been made with U.S.G.S. Quadrangles, Mathias Point, Md.,-Va., scale 1:24,000, dated 1954 and Popes Creek, Md., scale, 1:24,000 dated 1953.

47. COMPARISON WITH NAUTICAL CHARTS

Comparison has been made with nautical chart No. 559, scale 1:40,000, 5th edition, October 17, 1960, corrected to October 29, 1960.

Items to be applied to nautical charts immediately: None.

Items to be carried forward: None.

Respectfully submitted

T-10908 & T-10909

Addenda to Descriptive Report

Ratio prints of the following photographs were prepared for the use of the hydro support party:

T-10908

61-S-2082 and 2083
2200 thru 2203
2891 and 2892
3255 thru 3257
3263 and 3264

T-10909

61-S-3252 thru 3255

These photographs were also used in the compilation office to revise shoreline and alongshore details on the manuscripts prior to reproduction.

The centers of the photographs have been shown on the manuscripts with dashed circles.

Respectfully submitted

Review Report T-10908 & T-10909
PLANIMETRIC
April 4, 1963

61. GENERAL STATEMENT

See Summary accompanying Descriptive Report.

62. COMPARISON WITH REGISTERED TOPOGRAPHIC SURVEYS

T-10908:

861	1:20,000	1862
2635	1:20,000	1902

T-10909:

861	1:20,000	1862
2635	1:20,000	1902
8113	1:20,000	1942, 1943

T-10908 and T-10909 supersede the above prior surveys for nautical chart construction.

63. COMPARISON WITH MAPS OF OTHER AGENCIES

U.S.G.S. Mathias Point, Md., -Va.	1:24,000	1954
U.S.G.S. Popes Creek, Md.	1:24,000	1953

64. COMPARISON WITH CONTEMPORARY HYDROGRAPHIC SURVEYS

H-8706	1:10,000	1962 (Boat sheet)
--------	----------	-------------------

T-10908:

The boat sheet covers only a small portion of the manuscript. No discrepancies were found between the boat sheet and the manuscript in this area.

The hydrographic survey covering the balance of T-10908 was not available during the time of final review.

T-10909:

No contemporary hydrographic survey covering T-10909 was available during final review.

65. COMPARISON WITH NAUTICAL CHARTS

559	1:40,000	5th Edition, Oct. 17, 1960
-----	----------	----------------------------

T-10908:

Several fish traps and piers on the manuscript are not shown on the chart.

Charted bluffs and bluffs shown on the manuscript are in agreement except that bluffs shown at Cedar Point Neck and in the marsh just north of Persimmon Point are not on the manuscript.

T-10909:

Except for minor details, the chart and the manuscript are in good agreement.

66. ADEQUACY OF RESULTS AND FUTURE SURVEYS

The surveys comply with instructions and meet the National Standards of Map Accuracy.

NONFLOATING AIDS OR LANDMARKS FOR CHARTS

December 16 1960

Baltimore, Maryland

I recommend that the following objects which have ~~(been)~~ been inspected from seaward to determine their value as landmarks be charted on ~~(charts)~~ the charts indicated.

The positions given have been checked after listing by R. Glaser

William E. Randall *Chief of Party.*

This form shall be prepared in accordance with Hydrographic Manual, pages 800 to 804. Positions of charted landmarks and *nonfloating aids to navigation*, if redetermined, shall be reported on this form. Revisions shall show both the old and new positions. The data should be considered for the charts of the area and not by individual field survey sheets. Information under each column heading should be given.
