Summary to Accompany Descriptive Report

T-10923 & T-10924

Planimetric maps T-10923 and T-10924 are part of Project Ph-5901 which consists of 24 planimetric maps and one shoreline survey. These maps cover a section of the Virginia shore of the Potomac River from just below the mouth of Popes Creek to Colonial Beach and include Monroe Creek, Mattox Creek and a portion of Popes Creek. This is a graphically compiled project at a scale of 1:10,000 in advance of hydrographic surveys to be made in the area. The area was covered by 9-lens photography of May 1958, supplemented by single lens "W" photography of October 1959. The manuscripts were controlled by radial plot using Stereoplanigraph bridge points to supplement field identified control. The field operations preceding compilation included complete field inspection, recovery and identification of horizontal control, landmarks, aids to navigation and recovery of formerly established recoverable topographic stations. The manuscripts are vinylite sheets 3-3/4' in latitude by 3-3/4' in longitude which were scribed and reproduced on cronaflex following photogrammetric office review. The registered copies under T-10923 and T-10924 will consist of a cronar film positive and a cronar film negative of each scribed manuscript.

COMPILATION REPORT
T-10923 & T-10924

The field inspection report covering the area of these surveys will be found with Descriptive Report T-10926, T-10927.

The photogrammetric plot report is part of Descriptive Report T-10926, T-10927.

31. DELINEATION

Delineation of these map manuscripts was by graphic methods.

32. CONTROL

The identification, density and placement of horizontal control was adequate.

Triangulation stations 17 (KG) 1954, 17 (NPG) 1954, 21 (KB) 1954 and 21 (NPG) 1954 have been omitted from the manuscript because they were too close to Coast and Geodetic Survey stations.

33. SUPPLEMENTAL DATA

For geographic names an annotated USGS quadrangle, Wakefield, Va., Md. was used.

34. CONTOURS AND DRAINAGE

Contours: Not applicable.
Drainage: No comment.

35. SHORELINE AND ALONGSHORE DETAILS

The shoreline inspection was adequate.

No low-water lines were furnished by the field party. The low-water detail at the mouth of Popes Creek was by office interpretation.

36. OFFSHORE DETAILS

No comment.

37. LANDMARKS AND AIDS

Forms 567 are herewith submitted for two landmarks and four aids to navigation.

38. CONTROL FOR FUTURE SURVEYS

Forms 524 are herewith submitted for six (6) previously established recoverable topographic stations. No notes are considered necessary for the hydrographer and item 49 is omitted.

39. JUNCTIONS

Junction has been made and is in agreement between T-10923 and T-10924. Junction has also been made and is in agreement to the north with T-10920 and to the south with T-10926. There is no contemporary survey to the west and an all water area to the east.

40. HORIZONTAL AND VERTICAL ACCURACY

No comment.

41. through 45.

Not applicable.

46. COMPARISON WITH EXISTING MAPS

USGS quadrangle Wakefield, Va.-Md., scale 1:24,000, dated 1953.

47. COMPARISON WITH NAUTICAL CHARTS

These planimetric map manuscripts have been compared with nautical chart No. 558, scale 1:40,000 published 11/16/59 corrected through Notes to Mariners, No. 27, July 2, 1960.

Items to be applied to nautical charts immediately: None.

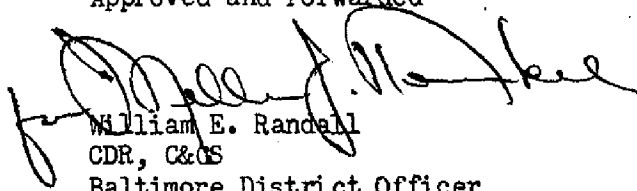

Items to be carried forward: None.

Respectfully submitted
23 November 1960

43. Remarks:

Review Report T-10923 & T-10924

Planimetric
March 14, 1963

61. GENERAL STATEMENT

See summary accompanying Descriptive Report.

62. COMPARISON WITH REGISTERED TOPOGRAPHIC SURVEYS

T-10923 and T-10924:

860	1:20,000	1862
1106	"	1868
1467	1:10,000	1879
8142	1:20,000	1942, 1943

T-10923 and T-10924 supersede the above prior surveys for nautical chart construction.

63. COMPARISON WITH MAPS OF OTHER AGENCIES

U.S.G.S. Wakefield, Va.-Md. 1:24,000 1953

64. COMPARISON WITH CONTEMPORARY HYDROGRAPHIC SURVEYS

T-10923:
H-8614 1:10,000 1961 (Unverified Smooth Sheet)

A small wreck shown on the manuscript in a cove north of Robins Grove Point is not on the hydro sheet. No other significant differences were noted.

T-10924:
H-8614 1:10,000 1961 (Unverified Smooth Sheet)

This hydrographic survey covers only a small portion of the manuscript. No differences exist.

H-8611 1:10,000 1961 (Boat Sheet)

No significant discrepancies were found to exist between the boat sheet and the manuscript.

65. COMPARISON WITH NAUTICAL CHARTS

558 1:40,000 5th Edition, November 5, 1962.

T-10923:

The manuscript and chart are in disagreement concerning placement of geographic names HIGH POINT and HOG POINT. These names were placed on the manuscript to agree with the final name sheet, annotated on the Wakefield, Va.-Md quadrangle. Also, the name EVANS POINT on the manuscript reads EVANS ISLAND on the chart.

The general configuration of the shoreline on the chart is in good agreement with the manuscript.

The chart shows a considerable number of bluffs which are not on the manuscript. A 25-foot bluff on the manuscript southeast of Church Point is not on the chart.

A large boat shed at Gum Bar Point is not on the chart.

T-10924:

General good agreement exists between the chart and the manuscript.

Several bluffs of possible importance to navigation are shown on the manuscript but not on the chart.

The word "Vault" is shown on the chart just east of Bridges Creek. However, there is no feature delineated on the chart to which the word would apply. Apparently the reference is to the historical George Washington Family Cemetery. It is recommended this item be clarified or omitted from the chart. This name is The Vault, dating back to 1877, alluding to the Washington plot. "The" will be added to the name on chart 538. *A. J. W.*

66. ADEQUACY OF RESULTS AND FUTURE SURVEYS

These surveys comply with instructions and meet the National Standards of map accuracy.
