Summary to Accompany T-11079

Instructions were written for Project Ph-100 1 December, 1952. Its purpose was to furnish shoreline and hydrographic control for a hydrographic survey to be made by the SOSBEE. The combined surveys would furnish data for the revision of chart 586 and for construction of a new 1:40,000 chart for Sarasota Bay.

Both field inspection and compilation of the manuscripts were assigned to the personnel of the Tampa Photogrammetric Office.

On 18 December 1952 instructions were issued for C.S.-353, West Coast of Florida, Tampa Bay to Caloosahatchee River, the ship SOSBEE to survey the shoreward portions of the area, and to assist the Photogrammetric Office in field work as necessary to locate additional control.

A ~~cloth-backed lithographic print~~ brown film positive of each map, at manuscript scale, together with the descriptive report, will be registered and permanently filed in the Bureau Archives.

T-11079

SUPPLEMENTAL COMPILATION REPORT

All of the changes north of (approximate) latitude 27°31'15" have been shown in red ink. Such changes came from nine-lens photographs flown 16 April 1957.

New positions are shown for two (2) daybeacons, numbers one (1) and three (3), shown in the 1957 Light List under TERRA CEIA BAY and two (2) lights, numbers one (1) and six (6), listed under MANATEE RIVER. These lights are reported on form 567 and will be forwarded under separate cover.

Most of the changes are cultural, consisting of new roads and canals; however, the mean high-water line at the northwest end of ANNA MARIA KEY has extended to approximately twenty-seven (27) millimeters from the position mapped on T-5843 of Dec. 1939 and supplemented by other surveys to Oct. 1941. The mean high-water of PASSAGE KEY will have to be located by the hydrographic party because of inadequate photographic coverage.

TAMPA DISTRICT OFFICE

THE FIELD INSPECTION REPORT COVERING THE WESTERN PORTION IS BOUND WITH T-11081 AND THE EASTERN PORTION IS BOUND WITH T-11080.

49. NOTES FOR THE HYDROGRAPHER (Supplemental)

3101 - Stake driven at point of seagrape at MHWL.

3102 - Overhanging limb of mangrove.

3103 - Tip of overhanging mangrove.

3104 - Northerly of two mangrove trees.

3105 - Southerly of group of mangrove trees.

The shoreline of PASSAGE KEY will have to be located by the hydrographer due to inadequate photographic coverage.

COMPILATION REPORT T-11079

PHOTOGRAMMETRIC PLOT REPORT.

This report is bound with T-11081.

31. DELINEATION.

The graphic method was used. The photographs were clear and the scale was fair. No unusual difficulties were encountered. The shoreline inspection was good.

32. CONTROL.

Reference Photogrammetric Plot Report.

33. SUPPLEMENTAL DATA.

None used.

34. CONTOURS AND DRAINAGE.

Contours - inapplicable.

The drainage was shown as indicated by the field inspection notes, and as interpreted from the photographs.

35. SHORELINE AND ALONGSHORE DETAILS.

The shoreline inspection appeared very complete.

All the shoreline and alongshore detail that was not readily discernible from the photographs was indicated so that no difficulties were encountered in the delineation thereof. All shoreline changes, due to new photography, which have been done since the boat sheet was made have been shown on the map manuscript in red ink.

36. OFFSHORE DETAILS.

No difficulties were encountered in the delineation of offshore details.

37. LANDMARKS AND AIDS.

Form 567 for nonfloating aids was forwarded to the Washington Office on 10 August 1953. Ch. L. No. 743 (1953)

Azimuths of ranges are to be determined by the hydrographic party.

Landmarks will be submitted by the hydrographic party.

38. CONTROL FOR FUTURE SURVEYS:

Eleven (11) recoverable topographic stations are listed under Item 49. No temporary photo-hydro stations are listed as they were furnished direct to the hydrographic party. (in sketch books, - fm. 274)

39. JUNCTIONS.

T-11081 - to the south - good agreement.
T-11080 - to the east - good agreement.
to the north - no contempoary survey.
to the west - Gulf of Mexico

40. HORIZONTAL AND VERTICAL ACCURACY.

No statement.

46. COMPARISON WITH EXISTING MAPS.

Comparison was made with (USE) Topographic Quadrangle, BRADENTON BEACH, FLORIDA, scale 1:31,680, edition of 1944; and USC&GS Planimetric Map T-5843(1941), scale 1:10,000. Only minor changes due to passage of time were noted.

With reference to the stations listed in the Preliminary Report (copy attached), the following were identified on the new photography and found to be in good agreement with planetable surveys SO-A-53 and SO-B-53 with one exception - MANATEE RIVER DAYBEACON 5 (Low) had been moved since the date of the foregoing survey:

ALP	aid	PET	aid
DOC	aid	PIE	aid
EGG		RIP	
END		RUE	
FEZ	aid	TAN	aid
HOE	aid	ART	
LOW	aid	BUM	
MAW		COW	
MAX	aid	HAG	
		NIP	

The following is a list that could not be identified on the photographs:

JOE
DOG
ROT
NUB
HOW

47. COMPARISON WITH NAUTICAL CHARTS.

Comparison was made with USC&GS Chart No. 1256, scale 1:80,000 (3rd edition) corrected to 3 October 1952. The maps listed under Item 46 are the source of most of the features on this chart and the same differences exist between the chart and manuscript.

ITEMS TO BE APPLIED TO NAUTICAL CHARTS IMMEDIATELY.

None.

ITEMS TO BE CARRIED FORWARD:

None.

Review Report T-11079
Shoreline Map
29 February 1956 +1958

61. General:

This is a revision survey which included a newly delineated total shoreline, but only such interior features as will amend the 1941 surveys (T-5843, T-5844).

62. Comparison with Registered Surveys:

T-1346	1:20,000	1873
T-4210	"	1926
T-4211	"	"
T-5843	1:10,000	1941
T-5844	"	"

The shoreline on T-11079 supersedes and the interior detail supplements that on the older surveys for charting.

63. Comparison with Maps of Other Agencies:

USE Anna Maria, Fla. 1:25,000 1944

T-11079 supersedes the quadrangle for charting.

64. Comparison with Contemporary Hydrographic Surveys:

B.P. 52012 1:10,000 1953 Terra Ceia Bay - Manatee River

B.P. 53196 1:20,000 1953 Gulf Coast Anna Maria Key

The original shoreline of T-11079 was used on the boat sheets. Some changes, in red, were made later in Tampa from 1954 photographs. No changes to shoreline were made during review. Additions and corrections applied from 1958 Field Inspection were reviewed in 1958

65. Comparison with Nautical Charts:

586 1:40,000 Jan. 1944, corrected Nov. 1954

The shoreline on T-11079 supersedes that on the chart. Foreshore features are subject to check by the hydrographic survey.

66. Accuracy:

This map complies with project instructions and meets the National Standards of Accuracy.

INSTRUCTIONS

A basic hydrographic or topographic survey supersedes all information of like nature on the uncorrected chart.
1. Letter all information.
2. In "Remarks" column cross out words that do not apply.
3. Give reasons for deviations, if any, from recommendations made under "Comparison with Charts" in the Review.
