Summary to Accompany Descriptive Report
T-12640, T-12641 and T-12654

Shoreline maps T-12640, T-12641 and T-12654 are three ~~of twenty-~~
~~one similar type maps of varying scales~~ in Job PH-6302, Cook
Inlet, Alaska. The three maps cover Ninilchik and vicinity.
Their north-south limits extend in latitude from $60^{\circ} 01' 52.5''$
north to $60^{\circ} 05' 37.5''$ and their east-west limits extend in
longitude $151^{\circ} 37' 30''$ west to $151^{\circ} 42' 30''$. The field opera-
tions preceding compilation consisted of the recovery and estab-
lishment of additional horizontal control. No field vertical
control or shoreline inspection was provided. The three manu-
scripts were compiled at a scale of 1:5,000 and show shoreline
and alongshore features, and inshore details to the first road.
Passpoints were furnished at near high water level but no photo-
hydro stations, as such, were located. The Descriptive Report
for the three maps of the two separate number sequences will be
registered as one combined Descriptive Report. One copy of the
combined report will be filed under T-12640 through T-12641
and a duplicate copy will be filed under T-12654. The maps are
not field edited and will be registered without any additional
field checks.

PHOTOGRAMMETRIC PLOT REPORT

NILICHIK, ALASKA

21063

21. Area Covered

The area covered is in the immediate vicinity of Nilichik, Alaska which is on the southeastern shore of Cook Inlet.

22. Method

One strip, consisting of six models, was bridged on the C-5 stereoplanigraph and was adjusted by IBM 1620 method.

23. Adequacy of Control

Horizontal control was adequate and complied with project instructions. All control held within National Map Accuracy Standards with the exception of Deep, 1964 SS B. This point was of very poor image quality and was eliminated from the bridge. The 1964 G. P. s provided, were unadjusted field control and upon advice of Geodesy Division, they were revised as follows:

Nilichik area

- 0.35 seconds in latitude
- 0.35 seconds in longitude

24. Supplemental Data

Geological Survey quadrangle Kenai (A-5) was used for rough leveling of the bridged area. Ratios at 1:5,000 scale were ordered for compilation.

25. Photography

Photography was adequate as to coverage, overlap, definition, and quality.

△ CONTROL USED IN ADJUSTMENT

Photogrammetric Plot Report
Ninilchik, Alaska
21063
Supplemental Report

The bridge was readjusted using the positions obtained by the 1964 traverse. Checks by Geodesy Division revealed the published position of Ninilchik Church Cupola, 1909 is in error. No new position has been determined. The bridge results, in their present form represent a three point solution with no checks. In order to determine if the datum is correct a new, longer bridge containing extra control checks should be run.

John D. Perrow, Jr.

(Incomplete)
Compilation Report
T-12640, T-12641 and T-12654
June 1965

31. Delineation

The manuscripts were delineated on the B-8 stereoplotter using 1:15,000 scale photographs with enlargement to 1:5,000 manuscripts. Shoreline passpoints were dropped for photo-hydro support and photographs were prepared for the hydrographer.

32. Control

See Photogrammetric Plot Report.

Models were leveled on the shoreline and on elevations taken from the Kenai quadrangle.

33. Supplemental Data

Geological Survey quadrangle Kenai (A-5) was used for leveling.

34. Contours and Drainage

Inapplicable

35. Shoreline and Alongshore Details

There was no field inspection. The shoreline and low-water line delineation was based on office interpretation of the photographs and predicted tides.

36. Offshore Details

See paragraph number 49.

37. Landmarks and Aids

The entrance light to Ninilchik Harbor shown on Chart No. 8554 was not visible on the photography and was not located.

38. Control for Future Surveys

None

39. Junctions

T-12640 to east with T-12641; T-12641 to the north with T-12654.

40. Horizontal and Vertical Accuracy

No comment

41. through 45.

Inapplicable

46. Comparison with Existing Maps

Comparison was made with the Geological Survey quadrangle Kenai (A-5) Alaska, scale 1:63,350, 1951.

47. Comparison with Nautical Charts

Chart No. 8554, scale 1:200,000 with a 1:5,000 Inset of Ninilchik Harbor, 9th edition May, 1965; corrected to May 29, 1965.

Sills that are shown on the Chart Inset could not be seen on the photographs and are not shown.

Items to be applied to Nautical Charts immediately: None

Items to be carried forward: None

Memorandum

TO : The Director
Thru: Seattle Regional Officer

DATE: 10 October 1965

In reply refer to:

FROM : Commanding Officer, USC&GSS PATHFINDER

SUBJECT: Field Edit Report, Project OPR-429: Kamishak Bay, Ninilchik.

No major field edit corrections for processing smooth sheets are required for the following incomplete manuscripts:

Ninilchik:

T-12640

T-12641

T-12654

Kamishak Bay:

T-12930

T-12342

T-12343

Minor corrections are contained in the hydrographic records and will be discussed in the descriptive report for the particular smooth sheet involved.

Final Review Report

PH-6302 Part I (formerly 21063)

October 1977

There are seven maps in this project. T-12405 thru T-12408 at 1;10,000 scale, and T-12640, T-12641, and T-12654 at 1;5,000 scale. .

With the exception of four control station identification cards, all the photography and source materials for this project are lost. These records were probably misplaced during office relocation. All the maps are Advanced Manuscripts and are registered without a Final Review.

A new project, CM-7412 supersedes this entire project. Maps TP-00793 thru TP-00795 covers the area of T-12405 thru T-12408. TP-00796 and TP-00797 covers the same area as T-12640, T-21641 and T-12654.
