U. S. COAST AND GEODETIC SURVEY.

O. H. Zittmann, Superintendent.

State: P. R.

DESCRIPTIVE REPORT.

Topographic Sheet No. 2538

LOCALITY:

Cape San Juan Head
to Insanada Honda1901
18

CHIEF OF PARTY:

J. B. Bontell

May 1901

Descriptive Report -

Cape San Juan Head to Ensenada Honda

Triangulation executed in 1900-1901 based on Culbra base and Battle Cay St. Thomas Astro & data. The topography of the eastern shore of San Juan Head together with the western end of the Cordilleras Reef and outlying islands was executed in 1900 and will be found on the Fajardo Harbor Sheet. See also descriptive report of Fajardo Harbor. The town of Ceiba shown on this sheet is a small collection of huts with a few small native stores for supplying the needs of the people of the place. Several sugar estates lie between here and Fajardo the produce of which all goes to Fajardo for shipment.

The names on this sheet are obtained from local information and also from an "Outline Map of Porto Rico", 1899 by the U. S. War Dept. I have been unable to obtain a name for the small island east of Pineros Isd. called North Cabras on the C. & G. S. Chart No 910. It is not known by that name to anybody here. It is called by the natives Mogoté Afuera (small outer island) Cabeza de Pineros (Head of Pineros) and Cabeza de

*
Perro (Dog's Head)

J. D. Bortelle
Assistant Col. L., Chief of Party

* From later information I find that
"Cabeza de Perro" or Dog's Head is the
most probable name for this island

It is known by this name to the better
class of educated people at Fajardo
and Mogotí Afuera or small outer
island by the fishermen & boatmen.
