Geographical positions from
plane table location.

Indian Cove Sheet.

This sheet shows the shore line and topography of Indian Cove, which lies on the north side of the Indian Islands and is formed by a bight in the North East Indian Is. and the north shore of the largest Indian Is. It opens into North Indian Pass opposite Pt. Kimbleton, its longer axis lying in about a N.W. and S.E. direction.

The shore line and topography were done from a telemeter base. The geographical position and orientation are also by plane table cuts, as there are no triangulation points on this sheet.

The shore line and topography are by R. B. Derickson, Asst.

Indian Cove was named by J. F. Pett, Asst.

Indian Cove is about two thousand yards long from the outer entrance to its head; its greatest width being about nine hundred yards. At the head is a long narrow gut that dries in places at low water, and which connects Indian Cove with Jey Strait. The entrance is marked on both sides by steep rocky cliffs. The one on the
