O. H. Littmann

Superintendent.

Kiska Harbor

Alaska

Planetable Survey

executed

during

July, August and September

1904

by

H. W. Rhodes. Assistant.

N. E. Beck. Junior Aid

J. W. Maupin Junior Aid

Scale 1/10 000

under charge of

J. F. Pratt. Assistant.
Commanding U. S. S. Patterson

to accompany topographic sheet of Kiska Harbor.

Plane table Sheet- 2657
 of
 Kuska Harbor Aleutian Islands
 Alaska
 Scale $\frac{1}{100000}$

The geographical positions of the triangulation stations plotted on this sheet are from the field computations of a triangulation executed by this party during this season. The distances are based on a base measured by Assistant Riller commanding the U.S.S. Thetis. The longitude is based on chronometers carried from Unalakleet and Kuska by the U.S.S. Patterson and is the result of one half of a "round trip". The latitude is based on the results of the observation with a meridian instrument on one pair of stars. The Azimuth is deduced from time observations with a transit instrument (Meridian instrument). The weather was continuously foggy and cloudy which prevented astro-

nautical work.

Due to exposure to the open sea
Little Kiska Island with its rocky
shores was very difficult to
survey.

Y. Y. Y. Y. Y.
