Descriptive Report for Topographic Sheet H & I,

Eastern Branch Elizabeth River, Va.

DEPARTMENT OF COMMERCE

COAST AND GEODETIC SURVEY.

O.H.TITMANN, Superintendent.

Survey of the Eastern Branch of the Elizabeth River, Va.

TITLE SHEET

For Topographic Sheet H & I.

Extending from South Branch in front of Norfolk to head of Broad
Creek and the Eastern Branch.

between.

Latitude $46^{\circ} 49'$ and $46^{\circ} 52'$

Longitude $76^{\circ} 11' 30''$ to $76^{\circ} 17' 45''$

SCALE 1/5000.

From April 26 th, 1913 to September 20 th, 1913.

SURVEY OF THE EASTERN BRANCH OF THE ELIZABETH RIVER, VA.

DESCRIPTIVE REPORT

FOR TOPOGRAPHIC SHEETS H and I

EXTENDING FROM SOUTHERN BRANCH IN FRONT OF NORFOLK TO THE HEAD

OF BROAD CREEK AND EASTERN BRANCH

BETWEEN

LATITUDE 46 47' 00" and 46 52' 00"

Longitude 76 11' 30" " 76 17' 45"

SCALE - 1 ; 5,000

From April 26th, 1913 to September 20th, 1913.

SCHOONER "MATCHLESS"

O.W. FERGUSON, ASSISTANT- C.& G.SURVEY, IN COMMAND

OBSERVERS

O.W. FERGUSON - ASSISTANT, JAMES E. MARSH- MATE,

DOUGLAS KARR - AID.

These sheets cover the west and south fronts of Norfolk and extend to the headwaters of the Eastern Branch and of Broad Creek. Above the city all the land that is not marshy is either occupied or staked off in city or suburban lots.

Descriptive Report for Topographic Sheets H and I

Eastern Branch , Elizabeth River, Va.

The city is growing and proportionately so is the number of docks and the area of developed water front. As the years go by more and more of the river will be dredged to a practicable depth to accomodate a great commerce.

CONTROL

This river, encircling such a growing city the control was made ^{new} excellent by a system of triangulation extending as far as practicable, i.e., as far as present navigation extends. The large scale made this more feasible than a small scale.

SHORES

The shores are generally sloping and sandy with clay banks showing, where the ground rises to several feet of elevation. Half of the shore line is fringed with marshy ground, but this is not usually a wide belt.

SURFACE

All of this region is made up of relatively low and flat land rising to an elevation of ten feet frequently, but rarely to twenty feet. It is variegated with swamps, woods, brush and cleared fields with many relatively high points that offer good building sites.

WATER

The water of this river is quite salty, as the mouth is wide and there is a good tide. Moreover the drainage is not sufficient to be controlling. The water supply for this region is not especially good. The city water is also somewhat inferior but is claimed not to be un-
healthful

Descriptive Report for Topographic Sheets H and I

Eastern Branch, Elizabeth River, Va.

OCCUPATION

This territory partly occupied by wharves, shipyards and various other plants, while much of it is residential property for the people of Norfolk. General farming, trucking and some fishing and oyster culture occupies quite a number of people. Railroading is one of the principle occupations of the people. Norfolk is preeminentⁿ in coaling facilities, her railroads reaching probably the greatest supply of coal. There are the very best facilities for coaling ships of all sizes.

Norfolk and Berkley and their suburbs - Chesterfield, Elizabeth Park etc. are the towns of this region.

A large list of geographic positions accompany each sheet.

O. W. Ferguson.

Assistant - Coast and Geodetic Survey

SURVEY OF THE EASTERN BRANCH OF THE ELIZABETH RIVER - VA.
