Descriptive Report

To accompany

Topographic Sheet of

Bay River, North Carolina

Paul C. Whitney, Assistant

Chief of Party.

This sheet extends from Trent River to Bayboro, North Carolina, thus including the upper part of Bay River, North Carolina.

The survey is a traverse from Triangulation station "P" (U.S.E.) up to the town of Bayboro and was done for the purpose of locating the Day Marks and other aids to navigation. A tracing showing the location of these Day Marks was previously sent to the office but it was done before the triangulation was computed and therefore no projection is shown. This sheet is of the same scale as the tracing and contains the same information with the addition of the projection.

For further information concerning this work it is probable that Captain Paul C. Whitney's letter of transmittal for the tracing will be of value.

The traverse was executed by Aid, F. S. Borden.

Respectfully submitted,

Oliver L. Garner

Ass't., C. & G. Survey,

*When Captain Whitney was ordered to the Str. Back
I received verbal orders from him to complete
this office work.
C.L.G.*
