Descriptive Report

To Accompany Topographic Sheet 3481.

covering area from
Smith Point to Howells Point, East End

of
Great South Bay

Chart Revision Work

of
Ass't H. C. Denson.

Surveyed by .

H. T. Kelsh, Aid

June- October, 1914

Scale 1/10,000

Description.

The eastern end of Great South bay covered by this sheet has changed but little along the shore from the position as determined by the previous survey.

Howells Point has extended about sixty meters east of its former point.

At Belport the water front has been changed a little and bulkheaded.

About a mile east of the town the shoreline has apparently receded slightly.

At the entrance to Carman's River a sand spit has extended from Long Point. This was thrown up by a storm a few years, and has since been slowly washing away, according to local advice.

The eastern end of the bay has not been as yet built up to any degree and therefore the artificial changes are slight.

On the south shore there is nothing of importance. Only the two piers shown were located; the shoreline was inked merely to show their relative position; but from inspection it appeared to be the same.

The steel flagpole or tripod at Smith Point L.S.S. is quite prominent, and was located.

Approved

H. C. Benson
