Revision Survey of Uyak Anchorage

Descriptive Report.

On May 14, 1923, a revision survey was made of the dock connected with the cannery at Uyak, Kodiak Island, Alaska. This survey was necessary due to extensive changes in the size and shape of the dock from that shown on the present chart. The plane table was used, orienting by a three-point fix.

Only that part of the accompanying sheet within the limits of the dock is included in the revision, the remainder being a copy of the present chart. The location of the bench marks and automatic tide gauge established at the same time is also shown on the sheet.
