Descriptive Report to Accompany Topo Sheet # Q

This revision survey of the Latouche waterfront was made by the party of the Launch Wildcat during the week of Sept. 25 - 30, 1927. This work was executed in accordance with Instructions issued to the Commanding Officer of the Str. SURVEYOR, dated February 3, 1927.

General Description. Latouche Mine is owned and operated by the Kennecott Copper Corporation. This camp is easily recognized by the uniformity of the coloring of the buildings. The camp buildings are red with white trimmings. The dwelling houses are white with green trimmings. The four black stacks on the power house have a large sign with the letters "K C C". They also support a Post Office, Hotel, Grocery store and Wireless Station. The Wireless Station is on Powder Point. The dock is very modern, and water can be obtained free of charge.

Survey Methods. The survey was well controlled throughout by triangulation. Rod readings were taken on practically every building. The shapes of buildings were obtained from a detailed map of the camp. The low water line in most places was determined by the hydrographic party and then transferred to the topo sheet.

Land Marks. These are sufficiently described on the topo sheet.

Changes in Shore line. No changes in the shore line were noted.

Respectfully submitted,

Approved
R. P. Lukens
