CHIEF OF PARTY

C. K. Green.

Descriptive Report to Accompany
Topographic Sheet 'E'
Ventura-California
Instructions dated October 31, 1932.

General Description

This sheet embraces the city of Ventura; the official name of which is San Buenaventura. However the city is universally known as Ventura, and this name appears on the present charts.

Since the previous work the small settlement has grown to a modern city of 12-15000?

All the waterfront has been shown in its present development, i.e. all streets, houses etc, including the Pierpont Bay addition at the east end of the city, as far back as the 60-70 ft cliff a half mile inshore. Back of this the street system was checked with the city map.

In the main section west of the large pier the street ends were accurately located, the direction of the streets, and the first three cross streets back from the waterfront.

The streets north of the Court House were transferred from the city map to definitely outline the present limit of the street system at that place, as it does not extend over the hill tops as shown on city map (see attached).

Shoreline

The shoreline is flat and sandy, curving in a shallow bay on which the city is located. A dirt cliff, maximum elevation 65-70 ft, rises abruptly from the flat shoreland about a half mile inshore at the east end of the city, and gradually approaching the present shoreline and decreasing in elevation until as it reaches the beach about two blocks west of the large pier it is only about 12 ft. high. This probably marked the original shoreline.

Near the east end of the sheet, at Pierpont Bay, a recreation pier extends out 250 meters, and a commercial pier ^{#6} extending out 450 meters is located just west of S. Fir St. in the main section of the town.

The Ventura River flows into the sea about a mile west of this commercial pier. Normally the entrance is nearly dry. The mouth is marked by a small boulder beach.

Special Notes.

Under flood water conditions a very considerable volume of water is discharged from this river, and the flood water area back of the railroad bridges is from a fourth to a third of a mile in width. This has been spanned by a new concrete highway bridge as shown

Landmarks

The most distinctive feature in this section is (at night) Padre Serra's Cross (tri. sig. Cross '27. This is located on the hillside behind the town at an elevation of app. 350 ft. and the cross, standing 18 ft high is outlined with red neon tube lights.

Several large oil tanks near the shore (see air photo attached) are fairly prominent

Control

Sta. Venus and Sta. Pont, both directly on the shoreline allowed the topography to be worked from both ends of this short sheet, and the stations on the pier ends were then located, so that no amount of traverse was necessary, and no adjustment required.

Changes in Shoreline

The sand beach has extended seaward with a maximum gain of about 185 M. just west of the Pierpont Bay pier. *See map of San Buenaventura (attached)*
At the Ventura Wharf (commercial pier) this extension amounts to 65 M. and from Longitude 119-18 west to the end of the sheet the shoreline, with minor differences at the mouth of the Ventura River, checks with the previous work. *H.B.*

Contours

Contours check with the previous work except for a high dirt fill across the narrow canyon just east of the reservoir on the hill.

*Applied to drawing of
new Chart No. 5006
Aug. Sept. 1934. J.F.*

REVIEW OF TOPOGRAPHIC SURVEY No. 4817

Title (Par. 56) *Ventura, California*Chief of Party *C.K. Green* Surveyed by *H.T. Kelsa* Inked by *H.T. Kelsa*Ship *Store Party* Instructions dated *Oct 31-1932* Surveyed in *Feb.-Mar. 1933*

1. The survey and preparation for it conform to the requirements of the Topographic Manual. (Par. 7, 8, 9, 13, 16.) ✓
2. The character and scope of the survey satisfy the instructions. ✓
3. The control and closures of traverses were adequate. (Par. 12, 29.) ✓
4. The amount of vertical control that the Manual specifies for -contours-formlines- was accomplished. (Par. 18, 19, 20, 21, 22, 23.)
Very few elevations shown
5. The delineation of -contours-formlines- is satisfactory. (Par. 49, 50.) *Every fifth contour not accentuated and numbers placed incorrectly,*
6. There is sufficient control on maps from other sources that were transmitted by the field party to enable their application to the charts. (Par. 28.) *Map of Ventura submitted and placed in Descriptive Report*
7. High water line ~~on marshy and mangrove coast~~ is clear and adequate for chart compilation. (Par. 16a, 43, 44.) ✓
8. The representation of low water lines, ~~reefs, coral reefs and rocks,~~ and legends pertaining to them is satisfactory. (Par. 36, 37, 38, 39, 40, 41.) ✓
9. Rocks and other important details shown on previous surveys and on the chart were verified. (Par. 25, 26, 27.)
see reverse side
10. ~~The span, draw and clearance of bridges are shown. (Par. 16c.)~~
11. Locations and elevations of summits are given. (Par. 19, 51.) ✓
12. The tree line was shown on mountains. (Par. 16g.) *Tree Line not shown*

NOTE: Strike out paragraphs, words or phrases not applicable and modify those requiring it. Paragraph numbers refer to those in the Topographic Manual. Use reverse side for extending remarks.

Paragraph 9

T1190 (1870) T683 (1855)

The beach as shown on T4817 appears to have extended from 65 to 185 meters between the two piers in comparison with T1190 and T683. Otherwise the comparison was very good. Sheet T4817 supersedes T1190 and T683.

Chart 5006

The privately maintained light at the end of the pier at Ventura is not shown on the present survey nor on any previous surveys. The light is charted and shown in Pacific Coast Light List (Page 34--No. 120) (See Chief of Party's note at the end of the Descriptive Report).

13. The descriptive report covers all details listed in the Manual, in so far as they apply to this survey. (Par. 64, 65, 66, 67.) ✓
14. ~~The descriptive report also contains additional information required in aero-topography relative to type of photographs, method of compilation and type of ground control.~~
15. The descriptions of recoverable stations and references to shore line were accomplished on Form 524. (Par. 29, 30, 57, 67 except scaling of DMs and DPs, 68.) *1 Card submitted*
16. A list of landmarks for charts was furnished on Form 567 and plotting checked. (Par. 16d, e, 60.) ✓
17. The magnetic meridian was shown and declination was checked. (Par. 17, 52.) *No note of having checked declinoaire*
18. The geographic datum of the sheet is *N.A. 1927 (Adjusted)* and the reference station is correctly noted. (Par. 34.)
19. Junctions with contemporary surveys are adequate. ✓
20. Geographic names are shown on the sheet and are covered by the Descriptive report. (Par. 64, 66k.) ✓
21. The quality of the drafting is ^{*Fair*} good. (Par. 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 45, 46, 47, 48, 49, 50.) *Lettering is not very good*
General Drafting is only fair
22. No additional surveying is recommended. —
23. The Chief of Party inspected and approved the sheet and the descriptive report ~~after review by~~ ✓

(L) South Mountain.
(M) Santa Clara Valley planted to citrus fruit, walnuts, lima beans and sugar beets. One of the most fertile and productive valleys in California.
(N) Coast Highway to Santa Barbara and San Francisco.
(O) Ventura Boulevard with diversion points furnishing four major paved Highways to Los Angeles via Saugus and San Fernando Valley, via Santa Susana, Burbank and Glendale, via Conejo and Hollywood, and via Oxnard, Malibu Highway and Santa Monica. Also Coast Route to San Diego.

History

Ventura (officially San Buenaventura) is one of the oldest settlements on the Pacific Coast.

As an Indian fishing village, it welcomed the explorer Juan Rodriguez Chirillo and later Don Gaspar de Portola. Chirillo was buried on San Miguel Island directly opposite Ventura. This city is also the site of the last of the California missions, the mission of San Buenaventura being established by Father Junipero Serra in 1782. This mission still stands and is an object of great interest to tourists.

Ventura was incorporated as a town by the legislature on March 10, 1886, and on June 5, 1906, was recognized as a city of the fifth class. In 1873, the county of Santa Barbara was divided and the county of Ventura was created with Ventura as the county seat.

Some Interesting Facts

Ventura is the only seat and principal trading center of a county that has averaged, for the past six years, more than twenty million dollars in agricultural products and more than twenty-five million dollars in mineral products.

The income from citrus fruits including oranges, lemons and grapefruit averages better than eight millions yearly; walnuts, almond, olive, millions; lima beans, between four and five millions; sugar beets, one million; hay and grains, better than one million; dairy products, one million; vegetables, principally tomatoes, carrots and peppers, more than half a million; and apricots, better than half a million.

This rich agricultural and oil region is concentrated within a radius of thirty miles of Ventura, produced annually during this period of cultivation better than seven million dollars of oil and gas and at peak production two years ago, ran better than thirty-six millions. The Ventura Avenue field, which has the deepest proven producing zone of any field in the world, has a potential production capability of around 75,000 barrels daily without any additional drilling. A new field, San Miguelito, has recently been proven between the Ventura Avenue and the Pacific fields and extensive drilling is taking place to prove a deeper zone in the Fillmore and Santa Paula areas.

Ventura County oil fields are controlled by major companies, thus insuring steady and rational development that will prolong their existence for many years after the flush fields are exhausted and give Ventura an assured income for the next forty years at least.

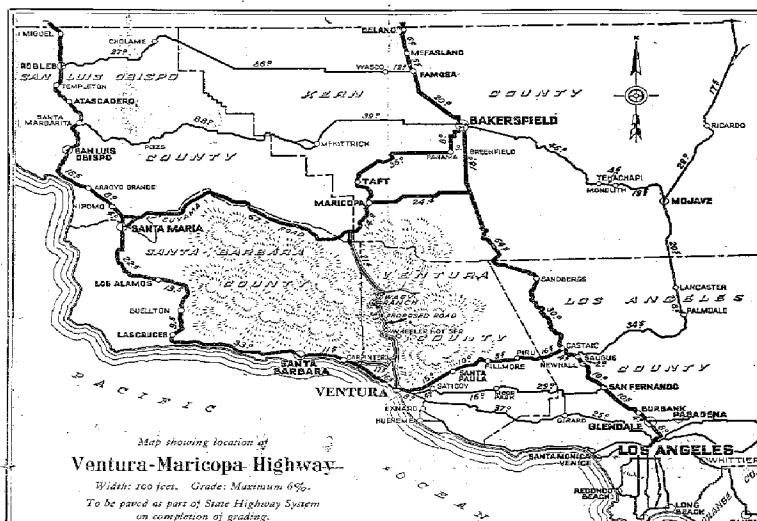

Oil and gasoline is shipped from Ventura by tankers to the Orient and to ports on the Atlantic and Pacific Coasts. Shuttled from the prevailing, northwesterly winds by the Channel Islands and Point Arguello, tankers and lumber schooners are the port the year around.

A commercial pier at the foot of Fir Street and a pleasure pier at Pierpont Bay, afford access to ships and are available for fishermen at all seasons.

Boats in charge of experienced pilots make regular trips to the islands during the summer season and are available for charter during the winter. Ventura is the nearest port to Anacapa and Santa Cruz Islands where the finest fishing grounds on the coast are located and where wild boar hunting and other sports furnish unique and inexpensive thrills.

Ventura also has at Seaside Park, a modernly equipped baseball park with a grass diamond, a half mile race track, basketball playground, accommodations for campers and picnickers. Its beaches are open to the public for a distance of six miles and are equipped with life guards during the bathing season.

The Pioneer Museum at the Court House is crisscrossed with the best in the state with its immense collection of data and artifacts, dating from prehistoric periods to the early pioneer days. It is amply supplemented by the Museum at the Mission San Buenaventura and together, they provide the tourist many interesting hours.

THE VENTURA-MARICOPA HIGHWAY shown upon the above map will furnish a direct route from the San Joaquin valley to Ventura, cutting off forty miles between the west side of the valley and making it the nearest available route for this rich oil, cattle and agricultural domain.

In addition, this highway will develop the Ojai valley which it traverses, creating a new economic district tributary to Ventura and will open up a wonderful scenic area in the Santa Barbara forest reserve, now practically inaccessible. This region contains great potential mineral resources as well as natural wonders such as mineral hot springs, the best trout fishing streams in Southern California, hunting grounds where deer and mountain lions abound and unsurpassed views from high mountain ranges which the highway crosses.

Through the Ventura-Maricopa highway the proposed West Side Highway will eventually pour traffic from the northern part of the state into Ventura where it will have the choice of four main highways to Los Angeles and other Southern California points.

Ventura beaches, being closest both in time and distance, will be the Mecca for San Joaquin valley residents during the hot summer months and Ventura will be the summer capital for the valley.

Completion of the road is scheduled for 1933. Work upon the final seventeen mile link is now well under way.

Statistical Data

Population U. S. Census Figures: 1930-11,603; 1920-4,156.
Increase-179%.

Ventura Township: 30,609.

Trading Area: 30,609.

Retail Sales: \$10,780,000. S. Census Figures: \$13,125,313.

Assessed Valuation: \$10,661,010.

Building Permits, 1932: \$70,742.

Postal Receipts, 1932: \$80,418.12.

Telephones, 1932: 3,500.

Electric Meters, 1932: 4,816.

Gas Meters, 1932: 3,678.

Water Meters, 1932: 4,000.

School Enrollments, 1932:

Grammar, 1,226.

Junior High School, 1,035.

Senior High and Junior College, 750.

Parochial School, 265.

St. Catherine's Academy, 60.

Tax Rate, City, 1932: \$2.86 per \$100 assessed valuation, computed on basis of one-third real valuation.

Tax Rate, County, 1932: \$0.28 per \$100 inside city limits.

Ventura has three banks with deposits aggregating nearly ten million dollars and has had no bank failures.

Gas Rate: Domestic service charge 90¢ per meter per month, 7¢ per hundred cubic feet.

Industrial: Rates to meet any situation.

Water Rate: First 500 cu. ft. 25¢ per 100 cu. ft. 2nd 500 cu. ft. 17¢ per 100 cu. ft. 10,000 cu. ft. 12¢ per 100 cu. ft. 20,000 cu. ft. 9¢ per 100 cu. ft. Minimum rate \$1.10.

Electrical Rate:

75-250 k.w.h. per meter per mo. 53¢ per k.w.h.

Next 750 k.w.h. per meter per mo. 5¢ per k.w.h.

Next 1000 k.w.h. per meter per mo. 43¢ per k.w.h.

Next 3000 k.w.h. per meter per mo. 33¢ per k.w.h.

All over 5000 per meter per mo. 30¢ per k.w.h.

Minimum charge \$1.00.

Location and Transportation

Ventura is located on the Coast Highway, also known as the Mission Trail or the Road to Romance. This is one of the two present established main north and south highways of California. From the city four paved highways radiate, giving the automobilist a choice of four roads to Los Angeles via Saugus and the San Fernando valley, via Santa Susana Pass through Glendale and Burbank, via the Conejo Pass through Hollywood and Universal City, via the Roosevelt Coast Line Highway through Santa Monica, one of the most beautiful scenic routes in the world. By the Roosevelt Highway, it is possible to avoid Los Angeles traffic entirely and travel directly to Long Beach, Santa Ana and San Diego. The Coast Highway extends west to Santa Barbara along the famous Rincon Drive thence northward to San Francisco. With the completion of the Maricopa Road, now under construction, Ventura will become the terminus of a third major State Highway traversing the west side of the great San Joaquin valley.

The Southern Pacific railroad, through its main coast line, serves Ventura with four daily trains to Los Angeles with branch lines to Santa Paula and Fillmore and to Ojai. The Pacific Greyhound Lines serve Ventura with schedules to Los Angeles, San Francisco and San Diego and intermediate points over four different routes.

Ventura Offers

To visitors and prospective residents, a fine all-year around climate with no extremes of heat or cold and a warm temperature of fifty-five degrees.

Three hundred days of sunshine.

Forty miles of fine ocean beaches.

Some of the most beautiful mountain scenery in the world.

Mineral hot springs resorts in the famed Ojai district, including Wheeler's Hot Springs, Matijis, Sulphur Mountain and Buenaventura.

Trout streams in the Sespe and Ventura river watersheds.

Mountains filled with deer and game birds.

The finest deep sea fishing in the world off Anacapa and Santa Cruz Islands opposite the city and less than 20 miles distant.

Island yachting in the Channel between the islands and mainland.

The cream of the tourist attractions of Southern California within two hours drive of Ventura.

Beautiful residential sites on the hills overlooking the ocean.

Joint city and county library containing 170,000 volumes with two local branches, one on Ventura Avenue and one on East Main Street. It has special collection of historical material about the city and vicinity. Open every day except Sunday from 9 A. M. to 9 P. M.

A modern 6-4 school system which takes the child from the kindergarten on and through two years of college. The Ventura Junior College ranks with any of the institutions of its nature in the state.

Points of Historical Interest:

Mission San Buenaventura, established in 1782, by Father Junipero Serra. Replete with work of the 18th, 19th and 20th century Indian tribes. In the Mission Museum are many interesting Indian and Spanish relics including the famous wooden bells, the only ones known in any of the Missions. Open to visitors daily. Museum opens in the afternoon.

Pioneer Museum with its collection of Spanish and 300-year day relics which were originally accumulated by the late Senator Banc and greatly added to in recent years through discoveries at Suroy and other places in the county. Open to visitors daily except Sunday from 9 A. M. to 5 P. M.

The first reservoir and irrigation system in California, located back of the Mission in Ventura. This is the father of all California irrigation systems.

The landing place of Cabrillo, on the water front of Ventura, at the foot of Figueroa Street. Cabrillo landed here in 1542, just 50 years after Columbus discovered America.

Raising of first American flag in Ventura, in front of the Mission Hotel, on Main Street. The first flag was raised in half mast upon receipt of the news of the assassination of President Lincoln.

Ventura Has: Four parks and playgrounds, including beach park. Two hospitals, three theatres, public library, city hall, county court house, two museums, modern apartment houses, twenty hotels, four clubs—country, golf and beach, modern ball park, municipal golf course, race track and fair grounds, sanitary sewer system, 38.5 miles of paved streets, 5.5 miles of unpaved streets, ornamental light and city owned water system.
