Heights in feet above -- to ground to tops of trees

Contour, Approximate contour, Form line interval -- feet

Instructions dated May 16, 1935

Remarks:

DESCRIPTIVE REPORT TO ACCOMPANY GRAPHIC CONTROL SHEETS 'C' and 'D'.

LIMITS OF SHEETS

Graphic Control Sheets 'C' and 'D' are on opposite faces of the same aluminum mounted sheet. The eastern edge of Sheet 'D' overlaps the western edge of Sheet 'C'. Together, the two sheets cover the northern portion of Barnegat Bay and the charted portion of Toms River. Sheet 'C' joins on to sheets 'A' and 'B' at the northern limits and to sheet 'E' at the southern limits. It extends from Lat. $39^{\circ} - 54.6'$ to Lat. $39^{\circ} - 58.6'$ and from Long. $74^{\circ} - 04'$ to Long. $74^{\circ} - 07.4'$. Sheet 'D' extends from Lat. $39^{\circ} - 55'$ to Lat. $39^{\circ} - 58'$ and from Long. $74^{\circ} - 07.5'$ to Long. $74^{\circ} - 12.5'$

SURVEY METHODS

A photographic compilation of this area has been completed before the topography was begun. These Graphic Control Sheets were executed in order to furnish control for the hydrographer and to locate additional points for checking the photographic compilation. In the inside waters where the shore line changes but little, small patches of shore line were rodded in at each set-up. Along the outside coast where the shore line is more subject to changes, the shore line was rodded in so as to show changes which may have occurred since the photographs were taken. Only standard methods were used in this work.

CONTROL

A decided effort was made to recover and co-ordinate all control points which fall within the area covered by these sheets. All old

triangulation stations were plotted on the sheets and searched for by the topographer. The old stations which were searched for but could not be found, are shown on these sheets in pencil and should be considered lost. The control for these sheets consists of numerous old recoverable triangulation stations and new stations established by this party with second order accuracy. In addition to these triangulation stations there are numerous stations located and described by the Photo Compilation Party and stations established by the U. S. Army Engineers and by the New Jersey State Board of Commerce and Navigation. The positions for the U.S.E. stations and the Commerce & Navigation stations were not known and the stations established by the Photo Compilation Party were not used as control until after the positions had been verified by the topographer.

TRAVERSES

On Sheet 'C' a small traverse was run from Station Lavallette to the beach and checked out on signal Guyer of Sheet 'B'. The distances were ^{chained} ~~charted~~ and there was no closing error.

On Sheet 'D' a small traverse was run from Set-up 3, which was located by a three point fix to Toms River Stand Pipe, and there was no closing error. Resections on Triangulation stations were taken at almost all the set-ups of this traverse.

DISCREPANCIES

A description with position was made out by the Photo Compilation Party for Toms River Coast Guard Flag Tower. This tower was located by this party as an intersection triangulation station and

the positions differ by five (5) meters. The position obtained by the Compilation Party was from the compilations and it is believed my position should be correct as I have four triangles on this station.

My positions of signals Bank, Railroad, Dock and Bulkhead differed slightly from the positions of the Photo Compilation Party but the matter was taken up by Lt. Balstad and adjusted.

LAND MARKS FOR CHARTS

Attached to, and forming a part of this report are lists of objects which should be charted as land marks for each sheet.

AIDS TO NAVIGATION

Attached to, and forming a part of this report are lists of non-floating aids to navigation which should be charted.

GEOGRAPHIC NAMES

No new names for geographic features shown on these sheets were obtained. All names shown were taken from the chart of this area and appear to be in common usage.

PLANETABLE POSITIONS

On the Graphic Control Sheets all stations located by topography, are shown by a small red circle with the station name. All stations which are considered recoverable are described on form No. 524 and the name of the station on the graphic control sheet is followed by the letter 'D'. All recoverable topographic stations previously located by the Photo Compilation Party in this area are shown as above, with the addition of the date as listed on the description card.

All planetable set-ups are numbered and designated on the graphic control sheet by a small square. These numbers and squares are not inked in.

Attached to, and forming a part of this report is a list of all topographic positions located on this sheet. This list includes all set-ups and stations. It shows which stations are described and whether they are marked, natural object, or aid to navigation, also, when they were previously located and how they were located by the topographer.

Descriptions on Form 524 are submitted for all stations marked 'D' on these graphic control sheets. All description cards previously made out by the Photo Compilation Party for stations following on these sheets, were taken out of the list submitted by the Photo Compilation Party and added to the descriptions submitted with these graphic control sheets.

CONTENTS

Submitted with the Graphic Control Sheets 'C' and 'D' are the following:

Title Sheet for Graphic Control Sheet 'C'
 Title Sheet for Graphic Control Sheet 'D'
 Descriptive reports for Sheets 'C' and 'D'
 List of Control Points for Sheet 'C'
 List of Control Points for Sheet 'D'
 17 Descriptions of topographic stations (Form 524) Sheet 'C'
 45 Descriptions of topographic stations (Form 524) Sheet 'D'
 List of landmarks for charts for Sheets 'C' and 'D'
 List of non-floating aids to navigation for sheets 'C' and 'D'

Jack C. Sammons
 Lt. Jack C. Sammons
 Chief of Party.

DEPARTMENT OF COMMERCE
U. S. COAST AND GEODETIC SURVEY

LANDMARKS FOR CHARTS

TO BE CHARTED }
TO BE DELETED } STRIKE OUT ONE

ATLANTIC CITY, N.J. September 20, 1935.

I recommend that the following objects which have (*have not*) been inspected from seaward to determine their value as landmarks, be charted on (*deleted from*) the charts indicated.

The positions given have been checked after listing.

Jack C. Sammons.

Chief of Party.

This form shall be prepared in accordance with 1934 Field Memorandum, "LANDMARKS FOR CHARTS." The data should be considered for the charts of the area and not by individual field survey sheets. Information under each column heading should be given.

REVIEW OF GRAPHIC CONTROL SURVEY T-6396a, SCALE 1/10,000,

Date of Review

5/28/36 1/21/37

1. This survey has been reviewed in connection with Air Photo Compilation Nos. T-5286, 5329, 5330, with particular attention to the following details:

- ✓ (a) Projection has been checked in the field.
- ✓ (b) Accuracy of location of plane table control points.
- ✓ (c) Discrepancies between detail on this survey and the air photo compilations listed above.
- ✓ (d) Discrepancies found in descriptions submitted on Form 524 when compared with the air photo compilations listed above.

2. Refer to the reviews and descriptive reports of air photo compilations Nos. T-5329, 5330, , for a more complete discussion of any errors or discrepancies found. *None* (Discrepancy in location of Penna. R.R. bridge)

Any material errors found on this survey are noted in subsequent paragraphs of this review, and these have been reported to the Field Records Section and the Cartographic Section. *None*

✓ Notes and corrections resulting from the review are shown on this survey in green.
