SUMMARY TO ACCOMPANY
DESCRIPTIVE REPORT
TP-01040

Coastal Zone Map TP-01040 is one of thirteen 1:20,000 scale shoreline maps in project CM-7821. These maps are intended for planning purposes for the state of Florida and for the construction and maintenance of NOS Nautical Charts.

The layout for CM-7821 shows the location of the individual maps from St. Marks to Cape San Blas. A copy of the layout is included in this Descriptive Report. Field operations consisted of a field inspection, premarking horizontal control and photographing the area, establishing tidal datums and performing the field edit.

Panchromatic compilation photography was taken with the Wild RC-8-E camera at 1:60,000 scale in October and November, 1979 and used in clarifying detail and compiling landmarks and aids to navigation. The shoreline was compiled using 1:60,000 scale, black and white, infrared GCLW photography taken with the Wild RC-10-C camera in February and March, 1979.

The Aerotriangulation Unit in Rockville, Maryland bridged five strips of 1:60,000 scale black and white panchromatic photography using analytic aerotriangulation methods.

Compilation was completed in the Coastal Mapping Unit, Rockville, Maryland using graphic methods.

Field Edit was completed in September, 1980. Recovery and location of landmarks, fixed aids to navigation, piling, etc. were omitted from the field edit procedures as per memo, dated January 30, 1978, from chief, Photogrammetric Branch. These items were compiled, to the extent possible, by office photogrammetric methods. The edit was required to only visually verify their existence at the time of edit. Their locations were not field checked. Field edit requirements in the foreshore and adjacent areas remain unchanged.

Application of field edit was performed in the Coastal Mapping Unit, Rockville, Maryland.

Final Review was performed in the Quality Control Unit, Rockville, Maryland in June, 1984. This map meets the requirements for National Standards of Map Accuracy.

The context of this Descriptive Report contains all pertinent reports and listings of data used to compile the final map.

FIELD INSPECTION REPORT

SHEET TP-01040

2. AREAL FIELD INSPECTION:

This report is submitted for sheet TP-01040. The area covered is from Indian Pass, east to Ninemile Point including St. Vincent Island.

The major part of the land is unpopulated except for residential homesites along Indian Lagoon and oyster houses at Thirteenmile, Elevenmile and Ninemile Points.

Photographs for this sheet consist of 1979 single lens ratio prints 1:30,000 and 1:20,000 scale. Photographic image was good. No unusual difficulties were encountered during field inspection of area.

Photograph 79 CP 0216 has field inspection notes for Depot Creek. This photograph was submitted with sheet TP-01034.

3. HORIZONTAL CONTROL:

N/A

4. VERTICAL CONTROL:

N/A

5. CONTOURS AND DRAINAGE:

Contours are inapplicablē. Sloughs have been indicated on photographs.

6. WOODLAND COVER:

Tree overhang was not large enough to note.

7. SHORELINE AND ALONGSHORE FEATURES:

Shoreline inspection was conducted from a skiff run close

-2-

to shore, by truck, foot and review^{ED} with a stereoscope. The area consists of apparent, fast, grass in water and riprap shoreline. All of which have been annotated on the photographs.

The mean low and high water lines were located along the Gulf of Mexico shoreline of St. Vincent Island and Indian Peninsula. These have been delineated on the photographs.

Two overhead cables were noted on photograph 79CP 0217. No submerged cables were present.

Shoreline structures were noted on photographs.

Numerous oyster bars are in the St. Vincent Sound area. They have been indicated on the photographs. All are awash at mean high water.

8. OFFSHORE FEATURES:

A house on piles was noted on photograph 79 CP 0217.

9. LANDMARKS AND AIDS:

N/A

10. BOUNDARIES, MONUMENTS AND LINES:

N/A

11. OTHER CONTROL:

N/A

12. OTHER INTERIOR FEATURES:

None were noted.

13. GEOGRAPHIC NAMES:

To be completed at a later date.

14. SPECIAL REPORTS AND SUPPLEMENTAL DATA:

N/A

Photogrammetric Plot Report
St. Marks to Cape San Blas, Florida
CM 7821
April 18, 1980

Area Covered

The area covered by this report is the coastline of the Gulf of Mexico from Money Beach (near Cape San Blas) east to, and including, St. Marks. The area is covered by 13 1:20,000 scale manuscripts (TP-01032 through TP-01044).

Method

Five strips of 1:60,000 scale black and white panchromatic photography were bridged by analytic aerotriangulation methods. Field identified control was provided. Aids and landmarks, whose ground positions are known, were used as checks.

Common points were located between the strips to ensure their proper junctioning.

The ordering of ratio prints and plotting of manuscripts will be handled by the Compilation Section.

Adequacy of Control

The control proved adequate for completion of the project, but barely within the accuracy standards of this office. See the notes to compiler for an explanation.

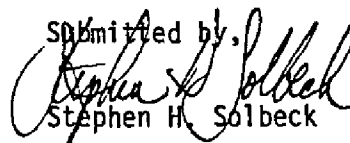

Supplemental Data

USGS quads were used to provide vertical control for the project. Nautical Charts were used to locate aids and landmarks.

Photography

The coverage, overlap, and quality of the photography proved adequate for the job.

Compilation Report

TP-01040

June 1980

31. Delineation

All alongshore, cultural features, and interior planimetry on this map were delineated by graphic compilation using rectified black-and-white prints of the 1:60,000 scale panchromatic photography and the black-and-white prints of the 1:60,000 scale infrared photography. This photography was controlled by map points determined by aerotriangulation.

The MHW line was compiled from the 1:60,000 scale infrared photography and the 1:60,000 scale panchromatic photography.

The GCLW line was compiled from the 1:60,000 scale infrared photography. The compilation of the MHW & the GCLW lines was aided by field measurements to the MHW line.

32. Horizontal Control

Horizontal control was adequate (see photogrammetric Plot Report).

33. Supplemental Data

One tide station was plotted from a sketch provided by the Tidal Datum and Information Branch.

34. Contours and Drainage

Contours are not applicable. Drainage was compiled from rectified black-and-white infrared photography.

35. Shoreline and Alongshore Detail

Office interpretation of the rectified black-white photography was adequate for delineating the shoreline and alongshore details. The field inspection was used as an aid in interpreting the photography.

36. Offshore Delineation

An area near Indian Lagoon has extensive oyster bars. The area was shown as "Foul with oyster bars." Isolated oyster bars were shown with the low water symbol.

37. Landmarks and Aids

There are no landmarks or aids located on this maps.

38. Control for Future Surveys - None

39. Junctions

Refer to NOAA Form 76-36B

40. Horizontal and Vertical Control

This map complies with accuracy requirements for the Florida Coastal Zone Mapping Program as outlined by Project Instruction PH-7000.

41. thru 45. Inapplicable

46. Comparison with Existing Maps

Comparison was made with the following USGS quadrangle maps:

Indian Pass, Fla., 1943 Scale 1:25,000

Cape San Blas, Fla., 1943 " "

West Pass, Fla., 1943 " "

47. Comparison with Nautical Charts

Comparison was made with the following Nautical Charts:

11402 10th Edition, 28 April 1979, 1:40,000 Scale

FIELD EDIT REPORT
JOB CM-7821 TP-01040

51. METHODS

This shoreline was edited from mullet boat run adjacent to the shoreline. Additional areas were inspected from truck and by foot.

The shoreline classification on Depot Creek is changed; please see photo 3407 for these changes. Overhead Cable is also added on this photo.

A ramp is deleted on photo 9041. A few additional minor changes are shown on photo 8172.

52. ADEQUACY OF COMPILATION

The compilation appears to be good with the exception of the shoreline along Depot Creek. This manuscript will be both complete and adequate upon the application of this edit.

54. RECOMMENDATIONS

None

56. GEOGRAPHIC NAMES

This item is attached on a separate sheet so that it may be detached and forwarded to the Geographer.

57. LANDMARKS AND AIDS

There are no Landmarks or Aids on this manuscript.

58. FIELD EDITOR

Field Edit was done by J.L. Bowers and P.B. Walbolt.

56. GEOGRAPHIC NAMESDISPUTED NAME

MALLARD SLOUGH - TP01041- West Pass Quad-- Chart - 1 - 2 - 3 - 4 - 5

The placement of this name was questioned on the Preliminary Name Sheet; it is shown correctly on the Final Name Sheet, and it appears on both TP-01040 and TP-01041. The placement was also verified with various personnel of the St. Vincent Island National Wildlife Refuge, and of the Florida Marine Patrol.

NEW NAME

ODENA LANDING - TP01040 - 1 - 2 - 3 - 4 - 5

This is the landing used by the majority of people for access to Lake Wimco. The name ODENA is derived from the name of the old railhead that was near here, and has been used locally for several generations. ODENA is also the name of the nearby fire tower.

OBSOLETE NAME

NINE MILE - TP01040 - Indian Pass Quad - 1 - 2 - 3 - 4 - 5

At one time NINE MILE was a thriving independent fishing village. It was decimated by several tropical storms, and the area is eroded severely. There is now nothing here but ruins.

NOTE - The Names Sheets West Pass and Jackson River cover this Map in part; they will be forwarded at a later date.
