This revision was made from a photograph of the original topographic sheet. Points were identified on the photograph and these points with dividers and theodolite angles, and local surveys and maps, were the criteria of this revision. The changes on the sheet are shown by red lines for new features, those features accepted as unchanged are shown by black lines, the line indicating such features as have disappeared.

The contours are omitted, as they are unchanged, except in one instance, when it is indicated. The photographs did not show the contours sufficiently clear to trace them, the reason for omitting them.

Numerous houses and new woods appear; the changes being greatest close to this shore. The same portion of the shore line has shifted but little.

The hydrography is practically unchanged. The only change noted was the erasure of harbors, where the sand bank has receded, at the so-called Rye Harbor. The name Rye Harbor should be omitted, as there is no anchor-age for any but the smaller motor boats, and no refuge as this is only about 1/4 of a mile off the bar at low water.

E. H. Austin
Chief of Survey
Examination of Topographic Sheets
by the
Divisions of Field Work and Field Records.

1. Has the magnetic meridian been determined? ......................

2. Is the point occupied for the determination of magnetic meridian
   designated? ......................................................................

3. Is the approximate or rodded location of high water mark in back of
   mangroves shown? ..............................................................

4. Have navigable rivers been surveyed? ...............................  

5. Is interior information given by descriptive legends or otherwise?
   ..........................................................................................

6. Is the inking of the sheet legible? ......................................

7. Is projection properly shown? .............................................

8. Are methods of surveying fully described? ........................

9. Are descriptive legends given concerning conspicuous islets, objects,
   rocks, and other features given in blank areas? ..................
   ..........................................................................................

10. Are geographic names given? ...........................................

11. Is full information regarding geographic names given in the descrip-
    tive report in accordance with paragraph 557 of the Instructions for
    Field Work? ..................................................................
    ..........................................................................................

12. Are the names of topographic signals given? ......................

13. Does the sheet have a neat appearance? ............................

14. Is sufficient contouring shown, some of which could be obtained by
    sextant directions from boat positions? ............................
15. Is the control good? .................................................................

16. Is the sheet well laid out? .........................................................

17. Is the accuracy of traverses between triangulation stations stated in the descriptive report? .................................................................

18. Are the elevations of prominent rocks or islets given? ..............

19. Are the description of reefs, as bare, awash or covered at high or low water given? .................................................................

20. Are objects useful for future surveys indicated? ......................

21. Is there a record of marking topographic stations? .....................

22. Is the character of the beach shown in various places? ..............

23. Is the plane of reference for elevations given? .........................

24. Is the low water line determined at important places? ..............

25. Is there a full list of data affecting sheet given on title sheet? .................................................................

26. Is there a list of plane table positions? ......................................

27. Are the elevations whether that of tree-top or ground indicated? .................................................................

28. Does the descriptive report give date of instructions? ................

29. Is a sketch given showing contouring of interior mountainous country beyond limits of sheet? .................................................................

30. Is the general description of the coast given? ...........................

31. Is there information about obtaining fresh water? ....................

32. Have standard symbols for various features been used? .............
33. Is the survey complete?

34. Is there a note as to cultivations, roads and other improvements?

35. Is commercial information given in descriptive report?

36. Is there a list of landmarks?
