Department of Commerce and Labor
COAST AND GEODETIC SURVEY

Superintendent.

State:

DESCRIPTIVE REPORT.

Top Sheet No. 1050

Locality:

1912

Chief of Party:

(C. B. Latham)
Revision of Topographic Sheets
Numbers, 1440 and 1058

The revision on these sheets consists of that portion of the sheets between topographic sheet number 2375, Portsmouth Harbor and vicinity, and Chart 328, York Harbor and vicinity.

The York Beach and Harbor Railroad, and the Atlantic Ocean Line Electric Railroad, with a few new roads, and Changes in the wooded areas, are the only changes noted.

The area shown, is but little changed since the previous surveys.

There are no dwelling houses on the sheet, and as the Ocean Line is practically all rock or heavy shrubbery there are Changes in it or in depths close inshore.

There is a land Company organized, but the proposed roads are not yet opened or worked.

J.Sidham
Chief of Port Proj.

Portland Me. Dec 27, 1912
Examination of Topographic Sheets

by the

Divisions of Field Work and Field Records.

1. Has the magnetic meridian been determined? ......................... No

2. Is the point occupied for the determination of magnetic meridian designated? .................................................................

3. Is the approximate or rodded location of high water mark in back of mangroves shown? .........................................................

4. Have navigable rivers been surveyed? ........................................

5. Is interior information given by descriptive legends or otherwise? ........................................................................

6. Is the inking of the sheet legible? .............................................

7. Is projection properly shown? .................................................

8. Are methods of surveying fully described? ............................... No - lacking

9. Are descriptive legends given concerning conspicuous islets, objects, rocks, and other features given in blank areas? ..............

10. Are geographic names given? ................................................

11. Is full information regarding geographic names given in the descriptive report in accordance with paragraph 537 of the Instructions for Field Work? .........................................................

12. Are the names of topographic signals given? .........................

13. Does the sheet have a neat appearance? ..................................

14. Is sufficient contouring shown, some of which could be obtained by sextant directions from boat positions? ..........................

10502
15. Is the control good? ..........................................................  
16. Is the sheet well laid out? .................................................  
17. Is the accuracy of traverses between triangulation stations stated in the descriptive report? /\(\neg\)  
   .....................................................................................  
18. Are the elevations of prominent rocks or islets given? .............  
19. Are the description of reefs, as bare, awash or covered at high or low water given? ..........................................................  
20. Are objects useful for future surveys indicated? /\(\neg\) ........  
21. Is there a record of marking topographic stations? /\(\neg\) ........  
22. Is the character of the beach shown in various places? ............  
23. Is the plane of reference for elevations given? .......................  
24. Is the low water line determined at important places? .............  
25. Is there a full list of data affecting sheet given on title sheet?  
   .....................................................................................  
26. Is there a list of plane table positions? /\(\neg\) .........................  
27. Are the elevations whether that of tree-top or ground indicated?  
   .....................................................................................  
28. Does the descriptive report give date of instructions? /\(\neg\) .....  
29. Is a sketch given showing contouring of interior mountainous country beyond limits of sheet? .................................................  
30. Is the general description of the coast given? ...........................  
31. Is there information about obtaining fresh water? ....................  
32. Have standard symbols for various features been used? ............  

33. Is the survey complete? ...........................................

.................................................................

34. Is there a note as to cultivations, roads and other improvements?

.................................................................

35. Is commercial information given in descriptive report? ...........

36. Is there a list of landmarks?  ................................

Remarks

.................................................................
