Remarks:
FIELD INSPECTION REPORT
MAP T-10519

2. AREAL FIELD INSPECTION

This map is located within St. Martin and Iberville Parishes and is entirely within the Atchafalaya Basin Floodway. See Field Inspection Report for Map T-10522 (1937) for description of this area.

The Atchafalaya Basin Main Channel enters the map in the northern section and meanders southeasterly to leave the map in the southeast. This along with the adjacent oil fields are the salient features.

There is no permanent population in the area. A few cabins along the main channel are deserted excepting for a few occupants during the season of low water.

Petroleum is the only industry within the area. The oil fields are relatively new and are under development and expansion. Many drilling sites, evident on the photographs, have no wells. Some of these proved un-productive and the wells were capped beneath the surface of the water so that there is no evidence of wells at these locations. Local pipelines and other temporary structures were not indicated as they are subject to change as development progresses.

Photograph quality was adequate. No undue interpretation difficulties were encountered. Field inspection is believed to be complete and adequate. Field inspection notes appear on the following nine lens, 1:20,000 scale field photographs: 54841 through 54843, 54859 through 54861, 54887 and 54888.

3. HORIZONTAL CONTROL

Due to the scarcity of recoverable horizontal control stations, a search was made for all stations plotted on the project diagram.

Stations of this bureau reported as lost on Form 526 are as follows:

CHENE (U.S.E.) 1935
LAKE LONG (U.S.E.) 1935
LITTLE TENSAS (U.S.E.) 1935

No supplemental control was established. All control searched for, recovered and identified was established by this bureau or the Corps of Engineers.

None of the stations required to be identified, by the project diagram, were recovered. All of the stations are within the floodway and have been silted over to a depth of four to six feet. Silting has also destroyed the witness trees, thereby making it almost impossible to determine the exact location of the stations.
Two stations, namely, PRM 28 (USED) 1935 and PRM BIG TENSAS, U.S.E. were recovered and the latter identified. These stations having been recovered in recent years by the Corps of Engineers, with the aid of a traverse, had witness posts beside them.

Traverse station, 397 / 20.46, recently established by the Corps of Engineers, was recovered and identified. The order of accuracy of this station is unknown.

4. VERTICAL CONTROL

Not applicable.

5. CONTOURS AND DRAINAGE

Contours inapplicable.

Drainage is by perennial streams, canals and ditches. All of these are self evident on the photographs.

6. WOODLAND COVER

Woodland cover was classified in accordance with Reference 5433, Topographic Manual, Part II, and Project Instructions.

7. SHORELINE AND ALONGSHORE FEATURES

The shoreline is predominately fast along the shores of the Atchafalaya Basin Main Channel and the larger bayous.

Periodic tide in the area is negligible; water level fluctuations result only from flooding.

A spoil area is now in existence across Upper Grand River near its junction with Blind Tensas Cut to block the flow of water. Big Tensas Bayou is also blocked by spoil.

There are no bluffs or cliffs.

Alongshore features are adequately covered by field inspection notes on the photographs.

8. OFFSHORE FEATURES

There are none.

9. LANDMARKS AND AIDS

There are none.

10. BOUNDARIES, MONUMENTS AND LINES

The boundary between St. Martin and Iberville Parishes affect this
map. See "Special Report, Boundaries, Project 25170, Part 1 of 3."

11. OTHER CONTROL

There was none established.

12. OTHER INTERIOR FEATURES

There are no roads or railroads within this map.

Buildings were classified in accordance with Reference 5146, Topographic Manual, Part II, and Project Instructions.

There are no overhead cables or bridges over navigable waters.

The shore end of all submerged pipe-lines have been identified on the photographs.

All wells are either oil, gas or injection wells. All tanks are oil tanks unless otherwise classified.

13. GEOGRAPHIC NAMES

See "Special Report, Geographic Names, Project 25170, Part 1 of 3."

14. SPECIAL REPORTS AND SUPPLEMENTAL DATA

Special Report, Geographic Names, Project 25170, Part 1 of 3, forwarded to Washington 8 May 1957, Package No. 57-052.

Data, Map T-10522 to be forwarded at a later date.

Forms 567, Landmarks and Aids, to be forwarded at a later date.

COMPILATION REPORT
Map Manuscript T-10519
Project Ph-170

Items 31 thru 33:
Refer to Descriptive Report for T-10527 (1957).

34. Contours and Drainage:

Contours are not applicable. Drainage was delineated from field inspection, office examination of the photographs and by comparison with the Corps of Engineers, 15 minute, Loraeuville, La. quadrangle, edition of 1954, Scale 1:62,500.

35. Shoreline and Alongshore Details:

Refer to Descriptive Report for T-10527 (1957). There were no low-water or shoal lines field inspected and none were delineated during compilation.

36. Offshore Details:

None.

37. Landmarks and Aids:

None.

38. Control for Future Surveys:

None.

39. Junctions:

Satisfactory junctions were made with T-10517 on the north, T-10518 on the west, T-10520 on the east and T-10521 on the south. T-10517 was compiled in Tampa, Fla. Office and data relative to the junction with T-10519 are contained in correspondence between Officer-in-Charge, Portland Office and Officer-in-Charge, Tampa Office, dated 19 November 1959, 27 November 1959, 13 September 1960 and 20 September 1960.

40. Horizontal and Vertical Accuracy:

Refer to Descriptive Report for T-10527 (1957).
46. Comparison with Existing Maps:

Comparison was made with Corps of Engineers, 15 minute Loreauville, La. quadrangle, Edition of 1954, Scale 1:62,500.

47. Comparison with Nautical Charts:

Comparison was made with nautical chart No. 1051 (New Orleans to Clacasieu River, west section) Scale 1:175,000 at Lat. 30° 00' Edition 1941, Revised 6-25-56.

Items to be Applied to Nautical Charts Immediately.

None

Items to be Carried Forward.

None.

Approved:

REVIEW REPORT
OF PLANIMETRIC MANUSCRIPTS
T-10518 thru T-10522
December 1962

61. General Statement
These are five (5) planimetric maps of Project PH-170 Atchafalaya Biter, La. These maps were prepared as bases for Nautical Charts and future Hydrographic Surveys.

62. Comparison with Registered Topographic Surveys
None

63. Comparison with Maps of Other Agencies

<table>
<thead>
<tr>
<th>Location</th>
<th>Scale</th>
<th>Agency</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lorouville, La.</td>
<td>1:62,500</td>

<td>1962</td>
</tr>
</tbody>
</table>

There are no major discrepancies through reprinting of the chart they may incorporate some or all of these changes.

66. Adequacy of Results and Future Surveys
These manuscripts were prepared according to project instructions and are within the required accuracy.

INSTRUCTIONS
A basic hydrographic or topographic survey supersedes all information of like nature on the uncorrected chart.
1. Letter all information.
2. In "Remarks" column cross out words that do not apply.
3. Give reasons for deviations, if any, from recommendations made under "Comparison with Charts" in the Review.
