SUMMARY
PH-6003
KEY WEST TO DRY TORTUGAS
FLORIDA KEYS, FLORIDA

This project covers the areas from Key West, Florida to Rebecca Shoal Lighthouse and Dry Tortugas. There are twelve maps covering this project. Three are at 1:20,000 scale (T-11202, T-11204, and T-11205). The remaining maps are at 1:10,000 scale (T-11199, T-11200, T-11201, T-11206, T-11207, T-11249, T-11250, T-11251, and T-11252).

The instructions, Field and Office, are dated June 24, 1960.

This project was compiled to provide a base for photo hydro support and for nautical charting. Also, underwater contouring of the shallow and shoal areas was undertaken.

Photography was taken in March 1960. 1:20,000 scale color photography was used for bridging and compilation. Infrared low water photography taken with the "L" camera was used for shoreline interpretation. Panchromatic photography taken with the "S" camera was used for field location of hydrographic signals.

Everything pertinent to the compilation of these maps is lost. Copies of the original maps are reproduced and will be registered without a final review. Maps T-11207, T-11249, T-11250, and T-11251 at 1:10,000 scale are advance maps, and were partially applied to chart 584 on March 12, 1968. This is the only portion of this project used by charts. T-11252 was not compiled. There is no shoreline within the boat sheet limits.

Manuscripts T-11206, T-11249, and T-11251 are superseded by job CH-7201, 1:10,000 scale shoreline mapping project.

A stable base positive and negative for each map are submitted for registration and filing in the Bureau Archives. This summary will be filed in lieu of the missing Descriptive Reports.
