Descriptive Report

Topographic Sheet 1188a

1913

This sheet shows the Coast of Maine, Hoyts Neck to Jane Fair Creek, revision during 1913—made on photo front of original sheet; Changes indicated in red and by erasing line from the photograph. Tracings from the photograph and tracings of plans of roads, streets, etc. were carried into the field and changes noted. New features platted from angles and distances measured from identified features. Plans of towns and groups of houses.

Conventional lots, but on some with great accuracy that an instrument and accurate measurement will be necessary, to detect errors or rather absence of great accuracy in plating. Main roads and roads leading from the shore noted, but by roads, wood lines, and detached houses noted only when this information was incidental to other work. All oleam and electric road shown.

Washington, D.C.

January 26, 1914

E.B. Latham
Chief of Topo.
Examination of Topographic Sheets
by the
Divisions of Field Work and Field Records.

1. Has the magnetic meridian been determined?  No

2. Is the point occupied for the determination of magnetic meridian designated?  

3. Is the approximate or rodded location of high water mark in back of mangroves shown?  

4. Have navigable rivers been surveyed?  

5. Is interior information given by descriptive legends or otherwise?  

6. Is the inking of the sheet legible?  Yes 

7. Is projection properly shown?  
Are methods of surveying fully described?  Yes 

9. Are descriptive legends given concerning conspicuous islets, objects, rocks, and other features given in blank areas?  

10. Are geographic names given?  

11. Is full information regarding geographic names given in the descriptive report in accordance with paragraph 557 of the Instructions for Field Work?  

12. Are the names of topographic signals given?  

13. Does the sheet have a neat appearance?  

14. Is sufficient contouring shown, some of which could be obtained by sextant directions from boat positions?  
15. Is the control good? .................................................................
16. Is the sheet well laid out? .........................................................
17. Is the accuracy of traverses between triangulation stations stated
   in the descriptive report? ...........................................................
18. Are the elevations of prominent rocks or islets given? ..............
19. Are the description of reefs, as bare, awash or covered at high or
    low water given? ........................................................................
20. Are objects useful for future surveys indicated? .......................
21. Is there a record of marking topographic stations? ....................
22. Is the character of the beach shown in various places? ...............  
23. Is the plane of reference for elevations given? ...........................
24. Is the low water line determined at important places? ..............
25. Is there a full list of data affecting sheet given on title sheet? ...
26. Is there a list of plane table positions? ......................................
27. Are the elevations whether that of tree-top or ground indicated? ..
28. Does the descriptive report give date of instructions?............... 
29. Is a sketch given showing contouring of interior mountainous country
    beyond limits of sheet? ................................................................
30. Is the general description of the coast given? ............................
31. Is there information about obtaining fresh water? ....................
32. Have standard symbols for various features been used? .............
33. Is the survey complete? 

34. Is there a note as to cultivations, roads and other improvements?

35. Is commercial information given in descriptive report?

36. Is there a list of landmarks?

Remarks
