Descriptive Report
Topographical Sheet 1225a
1913

This sheet shows the Saco River and the town of Saco and Biddeford.

Revised from photographs of the original topographical sheet, from which tracings were made.

These tracings were reduced to plan of sheet size, were carried into the field, and the changes, notes and new features placed in position by angles and measures taken from identified objects identified on the original sheet.

Roads and groups of streets are drawn, conventionalized. But an effort was made to depict accuracy as it was requiring an instrumental investigation to develop discrepancies.

Main roads, roads leading to or from the town, electric and steam roads are noted.

No towns, detached houses remote from town and by roads an shown only, when they cannot be noted, while other information was left second.
