Totals – Area 106 sq. mile; Shoreline 213 sq. mile
SUMMARY TO ACCOMPANY DESCRIPTIVE REPORT
T-12346

This 1:20,000 scale Final shoreline map is one of nineteen 1:20,000 scale maps designated as project PH-6301 Part II, Southern Part, Cook Inlet, Alaska.

The purpose of this map was to provide contemporary shoreline in support of hydrographic operations and to aid in chart revision.

Field work prior to compilation during the 1967 field season consisted of recovery and premarking of horizontal control for aerotriangulation.

This map area was photographed in July 1967 with the RC-9"M" camera at 1:60,000 scale using panchromatic film. This map area was photographed in July 1966 with the RC-8 "L" camera at 1:20,000 scale using color film. The map area was also photographed in July 1970 with the RC-8 "E" camera at 1:20,000 scale using color film.

Aerotriangulation was completed at the Washington office in August 1973.

This map was compiled at the Norfolk office in April 1974.

Field edit was acquired for T-12346 during the 1974 field season. Field edit was applied at AMC in June 1975.

Final review was accomplished at the Atlantic Marine Center in September 1986. A Chart Maintenance Print was prepared and forwarded to the Marine Charts Branch.

This Descriptive Report contains all pertinent information used to compile this Final Map. The original base manuscript and all related data were forwarded to the Washington Science Center for final registration.
FIELD INSPECTION

T-12346

There was no field inspection prior to compilation. Field work accomplished was limited to the recovery and premarking of the horizontal control necessary for the aerotriangulation of the project.
Photogrammetric Plot Report
Cook Inlet, Alaska
PH-6301
August 1973

21. **Area Covered**

The area covered by this report is the western shoreline along Cook Inlet from Redoubt Bay to Tuxedui Bay, also included was Kalgin Island. T-sheets 12344 thru 12350 cover the area.

22. **Method**

Three strips of photography were bridged by analytic aerotriangulation methods. Strip #1, covering Kalgin Island, was 1:40,000 color, Strips #2 & #3 covering the western shore of Cook Inlet was 1:60,000 black and white panchromatic.

Common points were located on the bridging photography and the 1:20,000 color photography being used for ratio purposes. Tie points were used between strips #2 & 3 to provide adequate junction of photography. T-sheet manuscripts were plotted on the Coradomat.

23. **Adequacy of Control**

Control was adequate and checked within map accuracy standards.

24. **Supplemental Data**

USGS Quadrangles were used to provide vertical control for the adjustment.

25. **Photography**

The coverage overlap, and quality of the photography was adequate.

Remarks:
COMPILATION REPORT

T-12346

31 - DELINEATION

Delineation was accomplished using the Wild B-8 stereoplotter with 1:60,000 scale panchromatic photography. The photography was adequate.

32 - CONTROL

See the attached Photogrammetric Plot Report, dated August 1973.

33 - SUPPLEMENTAL DATA

None.

34 - CONTOURS AND DRAINAGE

Contours are not applicable. Drainage was delineated by using the Wild B-8 stereoplotter from compiler's interpretation of the photographs.

35 - SHORELINE AND ALONGSHORE DETAILS

Alongshore details were delineated using the Wild B-8 stereoplotter from compiler's interpretation of the photographs.

The mean high water line was delineated from the photographs.

36 - OFFSHORE DETAILS

No statement.

37 - LANDMARKS AND AIDS

A copy of Form 76-40 for 1 non-floating aid to navigation was forwarded to Rockville, MD office on July 16, 1975.

38 - CONTROL FOR FUTURE SURVEYS

None.

39 - JUNCTIONS

See the attached Form 76-36B, Item #5 of the Descriptive Report concerning junctions.

40 - HORIZONTAL AND VERTICAL ACCURACY

No statement.
46 - COMPARISON WITH EXISTING MAPS

A comparison has been made with U.S. Geological Survey Quadrangle: QUADS-KENAI (B-6) & (B-7), Alaska, scale 1:63,360, dated 1958.

47 - COMPARISON WITH NAUTICAL CHARTS

ITEMS TO BE APPLIED TO NAUTICAL CHARTS IMMEDIATELY

None.

ITEMS TO BE CARRIED FORWARD

None.

FIELD EDIT REPORT

MAP T-12346

HARRIET POINT, ALASKA

JUNE 1974

Field edit of map T-12346 was done by Lt(jg) John A. Murphy, Lt(jg) Pamela R. Chelgren, and Lt(jg) Andrew M. Snella during June, 1974. Field inspection was made in small boats and on foot.

METHOD

Photographs and a copy of the field edit ozalid were examined in the field. Isolated rocks and foul areas were located by sextant fixes. Sextant fixes were transferred to boatsheet FA-20-1-74 (H-9435). Height data is referenced by fix number to the attached data sheets. Photographs are referenced for map T-12346. All times are based on the 135°W meridian.

ADEQUACY OF Compilation

Compilation of the map is good. Comparison of hydrographic MLLW to photogrammetric MLLW will have to wait on final smooth tides. Note is made of the following addition: a rock (fix #035) at Latitude 60°25'06"N, Longitude 152°15'53"W. Field inspection of this map is complete.

RECOMMENDATIONS

It is recommended that this map be revised in accordance with the notes on the ozalid and the fix information, and then accepted as an advanced manuscript.

Respectfully submitted,

Lt(jg) Pamela R. Chelgren, NOAA
FIELD EDIT REPORT
UPPER COOK INLET, ALASKA
OPR 469
SUMMER 1974

INTRODUCTION

Field edit reports are attached for the following maps:

T-12047    T-12345    T-12347    T-12350
T-12344    T-12346    T-12348

Copies of the field edit ozalids were taken to the field. Only one copy of each photograph was furnished to the ship, so the processed cronapaque photographs had to be used in the field. It is recommended that two copies, one processed and one unprocessed, of cronapaque photographs be furnished to the ships for future projects. Sextant fixes were plotted on the film ozalids and transferred to the field edit ozalids. Height data for all rocks and shoreline is either written directly on the field edit ozalids, or referenced by fix number to the attached data sheets. Sextant fixes were transferred to boatsheets SU-20-1-67, SU-20-2-67, FA-20-1-74, and FA-20-3-74.

Notes have been made in violet on the ozalids, with deletions in green and signal information in orange. All times are based on the 135°W meridian.

Compilation of the maps is apparently good. There were no low water photographs furnished for Kalgin Island (T-12344, T-12347, T-12348, and T-12350). It is virtually impossible to verify photo identified rocks without the low water photographs used to compile the manuscripts. Objects not found in the field on a minus tide and not seen on the photographs made available, were deleted. These objects were quite possibly fishing floats as there are over fifty fishing floats and fishing scows anchored in the waters off Kalgin Island during the summer months. It is recommended in the future that all photographs used in the compilation of the manuscripts be furnished to the ships in the field. All discrepancies on the manuscripts are noted. In some areas comparison of the hydrographic MLLW line with the photogrammetric MLLW line will have to wait until the final smooth tides are available, as the large tides are very critical along flat, sloping beaches. It is recommended that the maps be revised in accordance with the notes on the ozalids and on the attached sheets before acceptance as advanced manuscripts. Field inspection of these maps is complete.

Respectfully submitted,

Lt(jg) Pamela R. Chelgren, NOAA

NOAA Ship FAIRWEATHER MSS-20
REVIEW REPORT
SHORELINE
T-12346

61 - GENERAL STATEMENT
See Summary included with this Descriptive Report.

62 - COMPARISON WITH REGISTERED TOPOGRAPHIC SURVEYS
Not applicable.

63 - COMPARISON WITH MAPS OF OTHER AGENCIES
Not applicable.

64 - COMPARISON WITH CONTEMPORARY HYDROGRAPHIC SURVEYS
A comparison was made with the following Hydrographic Surveys:
H-8435, 1:20,000 scale, February 22, 1978
H-8965, 1:20,000 scale, February 20, 1967.
There are no major conflicts.

65 - COMPARISON WITH NAUTICAL CHARTS
A comparison was made with NOS chart 16662, scale 1:100,000, dated April 9, 1983.
There were no conflicts.

66 - ADEQUACY OF RESULTS AND FUTURE SURVEYS
This map complies with the Project Instructions, and meets the requirements for National Standards of Map Accuracy.
