DESCRIPTIVE REPORT

Topographic Sheet No. 1334 a

State Maine

LOCALITY
Mount Desert Island
Southern Part

CHIEF OF PARTY
J. W. Donn
The Mountain lying West of Jordan's Pond is Sargents, Recorded Heights 1344, 1180, 560.

Those immediately north of Jordan's Pond are called "The Bubbles Recorded Heights 845, 780.

That directly East of Jordan's Pond is the Pemetic Mtn. Recorded Heights 1262.

The hills lying S.E. of Pemetic are called the "Friad" Recorded Heights 600, 688, 720.

The range nearly South of Jordan's Pond is called Jordan's Hills Recorded Heights 540, 360.

The hills S.E. of the "Friad" are called The Cleft Recorded Heights 610, 460.

Green Mountain lies East of Turtle Lake. Recorded Heights 1532, 1040, 640.

East of Green Mtn. between it and Newport Mtn is the Southern end of Dry Mtn. The Crest appears on the upper sheet.

The Mtn. upon the Eastern border of the Sheet is Newport Recorded Height 1060.

S.E. of the Bowl of Newport Mtn is the Beehive Recorded Height 540.

Between Otter Cove and the Beehive is the Peak of Otter Recorded Height 506.

Note:
All valleys are wooded. Green Mtn. Summit, the top of Pemetic and Newport, and Sargents are bare of trees. The principal ridges of these mountains are very sparsely wooded with stunted pines or firs.
In the principal valleys the growth of timber is dense. In all the small valleys rising towards the summits trees appear, the tops of many of the smaller hills are wooded tho' not heavily. The "Friad hills are bare. The valleys between them are sparsely wooded. The Beehive is wooded to the summit. Dry Mtn. so much as appears on the Sheet is wooded - the ridge sparsely. The ridge of the Green Mtn. is bare to the hill marked 640 which is wooded. All the little Valleys have a few stunted trees in them. The Western Slope of Green Mtn. - along the principal ridge and nearly to the first break is very sparsely wooded down to the 1000 ft. curve. The timber regions gradually increase down to the border of Turtle Lake.
