1892

CHIEF OF PARTY:
Thurman Toney.
Descriptive Report
of
Grand and Mind Lakes.
The general character of the Country
covered by this Sheet is broken and
leveld. The Geological formation is
granite. The trees arc of forest growth
Camphor, White Pine, Cypress, Ash,  
Poplar - Beach, - Maple & Yellow Cedar
and attain an average height of 100 foot
with a diameter of 2 feet at the butt.
About one fourth of the land is in crops
and is under Cultivation. Hay, oats,
apatoes being the principal products
of the said. The terms of Firend City, and
on the Maini River on the North Saskatchewan
side of the Provincial Line between Grand
and Mind Lakes is composed of about one hundred
inhabitants who arc employed by the
Shaw Lumber Company. River. The are of
their large saw mill plants located on the
Main Side of the Stream.
The Chief Means of Communication is by
Wagen Road nine miles to the Main Central
The road is 27 miles by wagon road to the Canadian Pacific Rail Road on the New Brunswick Side of Lake, also water communication on Grand North Lake and Movement Stream to Upper Falls Landing. A small steam boat, named of Right-keepers, runs on Well Grand Lake, and up Movement Stream to Lower Falls Lanes and Lumber Rafts. The principal traffic of the County is lumber, fish, and leather.

The fish in these waters are scarce, owing to the claims at Fort Chipewyan and Fort McLeod to Lander, which prevent the fish from getting up into these lakes from the St. Coby River. The roads are extreme and in good condition. The bridges are substantial and safe, and the surrounding County is partly settled by small farmers.

Herman Henry
Asst. C.H. Friend
Southern End of Chiputnetcook Lake.

2101

The general character of the country around by this sheet is broken and level. The geological formation is granite. The trees are of forest growth, composed of White Pine, Cypress, Ash, Poplar, Beech, Maple, Yellow Cedar, and grow to an average height of 100 feet with a diameter of 2 feet. The timber grows to the wooded edge and is very dense. The shores of this lake are adorned with Forest. Oil. Rising by an old two-and-a-half road, I turn right.

Steelman Forry

Ass't C. H. Storey.
Description Report of Suth Lake and Monument Stream.

The general character of the country shown on this sheet is wooded and marshy. The formation on the lake itself is granite, the timber is very close and is comprised of White Pine, Cypress - Ash - Poplar - Beach - Poplar. A Yellow Cedar, and some about 100 ft. high and 2 ft. in diameter at the butt. Along the South shore of the lake, the country is officially settled by several forbearers. At the entrance to the narrow gap between Grand South Lake on the New Brunswick side of the stream, is located a small steam sawmill, the principal trade in lumber and lumber, the country roads are good, but these things, the roads are important for teams.

Heineman Family

Capt. C. H. Whig.
Descriptive Report of Monument Stream from Poplar Station to Initial Monument 2003

The general character of the Country stream on this sheet is wooded stream, up to the Initial Monument, just North of the Initial Monument, the Country is broken and rough, the formation is Granite. The Country is a dense wilderness of timber and brush, and with fine timber confining of Cypress, Ash, Yellow Cedar, and Hemlock. From the lower to the upper dam the stream is navigable for large logs the water in some places being twenty feet deep. About one and one half miles above the upper dam the stream is navigable for Canoe, from this to the Initial Monument the stream is small and shallow, the traveling from the lower dam to the Initial Monument along
The stream is difficult and toilsome when the water is to deep for wading. You have to ford and swim along through Alder swamps, and must avoid fallen Alder timber.

The country is uninhabited, except one farm house near Pole Hill. All the principal produce of the county are Buckwheat.

Hatsman Henry
Capt. C.H. Blayce
