COAST AND GEODETIC SURVEY

O. H. Tittmann.

Superintendent.

State: *Alaska.*

DESCRIPTIVE REPORT.

Topographic Sheet No. 2889.

LOCALITY:

Hodiak Island,

*Uganik Bay, Northern
Part.*

1908.

CHIEF OF PARTY:

W. C. Hodgkins.

2889

DESCRIPTIVE REPORT TO ACCOMPANY TOPOGRAPHIC SHEET NO.

NORTHERN PART OF UGANIK BAY, ALASKA. 1908 Acc No.

Scale 1 : 20000.

C. 262 8 89
LIBRARY AND ARCHIVES
JAN 26 1909
2889

This sheet includes a small part of Uganik Island Between the portions surveyed on the two preceding sheets, part of the point dividing Uganik Strait from the southern part of the bay (called East Point by Captain Moser.) and the shore of the western side of the bay from Moser's West Point to Minerss Point, where Uganik Bay merges into Shelikof Strait.

The land is mountainous and on the Uganik Island side rises abruptly from the shore. The other portions are not quite so steep. At the head of the bight between West Point and Broken Point there is rather an extensive stretch of comparatively low land reaching back between the hills. In this bight is a very good anchorage with winds from South to West. The hills are grass covered with frequent clumps of low bushes.

are
There are no inhabitants and there has been no development of this region. The bay is broad and deep and is easy of approach. The shores in general seem quite bold and it is possible to approach them in many places close enough for temporary anchorage, though there is nothing approaching a roadstead except in the bight already mentioned.

Respectfully submitted,

W. L. Hodgkinson

Assistant, C. & G. Survey,
Commanding.

To the Superintendent,

of the Coast and Geodetic Survey,
