Season 1927
DESCRIPTIVE REPORT
to accompany

TOPOGRAPHIC SHEET
of

ADMIRALTY INLET  SOUTHERN PART

AUTHORITY:
This work was authorized by the Director's orders, dated May 3, 1927.

EXTENT:
The sheet extends from Latitude 47°54'-40" to Latitude 47°58'-50" and includes the approaches to Port Ludlow, Hood Canal and Puget Sound.

DESCRIPTION:
The beach is all sand and gravel with stretches of boulder beach as shown on the sheet, except that the beach is rocky from Olele Point to about 300 meters south of Basalt Point.

Klias Rock is now shown as a rock swash at high water. The southernmost of the three pinnacles is the highest and is covered by the highest tides.

The elevations of Colvos Rocks were obtained by verticle angles. The middle of the three Colvos Rocks is shown awash at high water and should be charted as a rock awash.

SURVEY METHODS:
Standard plane table methods were used on this sheet. The signals were built in advance and graphic triangulation was used wherever possible.
At Tala Point and Double Bluff, elevations were obtained for the tops of bluffs. These are more definite than the tops of rounded tree covered hills and should be valuable information on a chart.

The village of Hansville is located inshore of the dock. While surveying this section, one of the residents asked that the name of "Hansville" be shown further south of its present position on the chart.

PLANE TABLE POSITIONS

Pt. No Point Light  Lat. 47° 54' 1406 meters
                 Long. 122° 31' 691 "

TOPOGRAPHIC TITLE SHEET

The Topographic Sheet should be accompanied by this form, filled in as completely as possible, when the sheet is forwarded to the Office.

Field No. __________

REGISTER NO. 4307

State Washington

General locality Admiralty Inlet

Locality Entrances to Puget Sound, Fort Ludlow & Hood Canal

Scale 1:10,000 Date of survey June 1927

Vessel Motor vessel NATOWA

Chief of Party G. C. Jones

Surveyed by A. Z. Jankowski

Inked by 

Heights in feet above MLLW to ground to tops of trees

Contour, Approximate contour, Form line interval 100 feet

Instructions dated May 3, 1927, 192

Remarks:

A basic hydrographic or topographic survey supersedes all information of like nature on the uncorrected chart. Give reasons for deviations, if any, from recommendations made under “Comparison with Charts” in the Review.
