State: S.E. Alaska

DESCRIPTION REPORT.

Topographic Sheet No. 4327

LOCALITY:

Dall Island

High Pt. and Vic. of Coco Harbor

1987

CHIEF OF PARTY:

H.A. Cotton
LIMITS -

The survey includes the shore line and Islands from High Point to the head of Coco Harbor. The limits of the work are Latitudes 55°-00 and 55°-04; and Longitude 132°-57 and 133°-07.

CONTROL -

Five new and two old triangulation stations furnish the control. The work terminated at triangulation stations.

ELEVATIONS -

Elevations are the tops of trees except in the case of off lying bare rocks. All elevations are above mean high water.

METHODS -

The shore line was surveyed by plane table traverse by C. K. Green. Points on off lying Islands were located by resection on triangulation stations, and a traverse run around the Island. Plane table triangulation was carried into the head of Coco Harbor from triangulation stations, "Coco" and "In".

CHARACTER OF SHORE LINE -

The shore line in general is steep (except at head of bights) and is rock ledge or boulders. A dotted low water line, not otherwise marked, indicates rock ledge.

DESCRIPTION OF COUNTRY -

The land areas are heavily wooded with Hemlock, Spruce, and Cedar trees extending down to the high water line. In general, the land rises steeply from the shore, making elevations and form lines difficult to obtain from the long narrow Inlets. No villages are within the area of the sheet. There are three abandoned shacks in Coco Harbor. No large streams are within the areas surveyed.

Names -

The names used on the sheet are those found on previous Coast Survey Charts, or those used locally.
BAYS AND ANCHORAGES

The best small boat anchorage is in the south arm of the head of Coco Harbor.

The topography of the country is such that tell wind squalls sweep across the water areas of the sheet, even on fine days.

DISCREPANCIES BETWEEN THIS AND PREVIOUS SURVEYS

As the old survey of Tlevak Strait did not show Reef Islands correctly they were re-surveyed on this sheet.
STATISTICS

Statute miles shore line - highwater ......................... 26
  " low water ........................................... 16
Area - square statute miles ..................................... 14
Number of Elevations ........................................... 152
Number of Recoverable Stations ................................. 12
  Triangulation ............................................... 7
