SECTION OF FIELD RECORDS

Report on Topographic Sheet No. 4443

Cordova, Alaska

Surveyed in 1929

Chief of Party, R. R. Lukens

Surveyed and inked by L. S. Hubbard

1. This survey was executed without specific instructions for the reason that the chart did not show the existing condition of the waterfront.
2. No descriptive report was submitted, but Captain Lukens states that the work was based on adequate triangulation control and was executed by standard methods. The survey, therefore, is to be considered as conforming to the usual requirements for plane-table work.
3. The junctions with the previous work are adequate and no further surveying is required.
4. Reviewed by E. P. Ellis, July, 1930.
