DESCRIPIVE REPORT
Topographic Sheet No. CB 4808

LOCALITY
DANGEROUS PASSAGE
PRINCE WILLIAM SOUND.

1933

CHIEF OF PARTY
A. M. SOBIERALSKI, H. & G. E.
DESCRIPTIVE REPORT

to accompany

TOPOGRAPHIC SHEET NO. CB *** DANGEROUS PASSAGE

SEASON - 1933

AUTHORITY:

This survey was made under the Director's instructions
dated April 15, 1933.

EXTENT:

The sheet covers the northern part of Dangerous Passage
and Chenega Island including the bays adjacent thereto, namely: Jackpot
Bay, Ewan Bay, Paddy Bay, and Granite Bay. It joins with T-3427 on the
north and field Sheet CA-1933 on the south.

GENERAL DESCRIPTION OF COAST:

The area covered is typically mountainous and, in general,
densely wooded to an elevation of 1600 feet. The vicinity of Jackpot Bay
is particularly precipitous, the shores in parts of which consist of cliffs
which overhang the water. Farther to the eastward the slopes moderate
somewhat and the shores become more rugged.

The close proximity of a number of glaciers has a marked
effect on the temperature. The protected bays and lagoons contained thick
ice as late as the middle of May. Ice began to form on these bays again
the early part of October. The snow fall is heavy and persists to sea
level until the latter part of May.

METHOD OF SURVEY:

Standard plane table equipment and methods were used.

Traverses run:
Station Well, 1933 to Howell, 1907.
Distance 1 1/2 miles. Closing error 10 m. adjusted.
Station Lint, 1933 to Czar, 1933 (Sheet CA) distance 2 1/2
miles, closing error 15 m. adjusted.
Throughout the passage third order triangulation was
sufficient to afford rigid control with but short supplementing stadia
traverses at the heads of the bays.
JUNCTION WITH T-3427:

In the vicinity of Paddy and Eshamy Bays the form lines on T-3427 are evidently in error.

The lake which nearly joins Paddy Bay drains to Eshamy Bay. A field reconnaissance was made and the form lines accordingly adjusted. These adjustments are shown on a separate tracing and are sent under separate cover referring to T-3427. Tracing attached to D.R. T-3427. Correction shown on T-3427 (1918) 10-7-34 A.S.

ELEVATIONS:

These are ground elevations in all cases. An assumed height of 60 feet was taken for all trees. This amount was subtracted from all elevations obtained on wooded areas.

NEW NAMES:

There is a marked scarcity of names in this locality and the following are suggested:

* Granite Point for the north point of the north entrance to Dangerous Passage. Granite Bay lies immediately west of this point.

* Junction Island for the wooded island, elevation 120 ft., which forms the south point of this entrance.

* Paddy Point for the east point of the entrance to Paddy Bay.

* Ewan Point for the east point of the entrance to Ewan Bay.

* Masked Bay for the bay indenting Chenega Island opposite Paddy Bay. The entrance is masked by islands.

Split Island is suggested for the large wooded island lying in the center of the Passage between Jackpot and Ewan Bays.

* Jackpot Point for the east point of the entrance to Jackpot Bay.

* Jackpot Island for the wooded island, elevation 60 feet, lying near the center of the entrance to Jackpot Bay.

Saddle Peak is the local name for the prominent two-humped mountain, elevation 3025 feet, lying on the ridge separating Paddy and Ewan Bays and two miles northwesterly from their heads. OK, because of local usage.

* Claw Peak for the mountain 2490 feet high on the peninsula between the two arms of Whale Bay (48).

* These names carded and sent to the Division of Geographic Names, Department of the Interior for approval.

(The above Division of Map Names has taken over the functions of the U.S. Geog. Board.) 

Harlow Bacon, Cartographer.
STATISTICS:

Miles shoreline (statute) . . . . . . . 120.4
Area (square statute miles) . . . . . . 80.

Respectfully submitted,

REVIEW OF TOPOGRAPHIC SURVEY NO. C-B-33

Title (Par. 56) Dangerous Passage, Prince William Sound, S. W. Alaska.

Ship: SURVEYOR Instructions dated: April 15, 1933 Surveyed in: 1933

1. The survey and preparation for it conform to the requirements of the Topographic Manual. (Par. 7, 8, 9, 12, 16.)

2. The character and scope of the survey satisfy the instructions.

3. The control and closures of traverses were adequate. (Par. 12, 29.)

4. The amount of vertical control that the Manual specifies for -eauers- formlines- was accomplished. (Par. 18, 19, 20, 21, 22, 23.)

5. The delineation of -eauers-formlines- is satisfactory. (Par. 49) 50.)

6. Not applicable.

7. High water line on marshy and mangrove coast is clear and adequate for chart compilation. (Par. 16a, 43, 44.)

8. The representation of low water lines, reefs, coral reefs, and rocks, and legends pertaining to them is satisfactory. (Par. 36, 37, 38, 39, 40, 41.)

9. Rocks and other important details shown on previous surveys and on the chart were verified. (Par. 25, 26, 27.)

10. No applicable.

11. Locations and elevations of summits are given. (Par. 19, 51.)

12. The tree line wash shown on mountains. (Par. 16g).

13. The descriptive report covers all details listed in the Manual, in so far as they apply to this survey. (Par. 64, 65, 66, 67.)

14. Not applicable.

15. The descriptions of recoverable stations and references to shore line were accomplished on Form 524. (Par. 29, 30, 57, 67 except scaling of DMs and DPs, 68.)

One station numeros triangulation stations.
REVIEW OF TOPOGRAPHIC SURVEY NO. C-B-33

16. A list of landmarks for charts was furnished on Form 567 and plotting checked. (Par. 16d, e, 60.) No landmarks.

17. The magnetic meridian was shown and declination was checked. (Par. 17, 52.)

18. The geographic datum of the sheet is Valdez and the reference station is correctly noted. (Par. 34.)

19. Junctions with contemporary surveys are adequate. Junction with form lines on T-3427 covered by separate letter.

20. Geographic names are shown on the sheet and are covered by the descriptive report. (Par. 64, 66k.)

21. The quality of the drafting is good. (Par. 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 45, 46, 47, 48, 49, 50.)

22. No additional surveying is recommended.

23. The Chief of Party inspected and approved the sheet and the descriptive report after review by R. C. Rowse. A.M. Sobiesalski

Chief of Party A.M. Sobieralski Surveyed by G.A. Nelson Inked by G.A.N.

Ship S.S. Surveyor Instructions dated April 16, 1933 Surveyed in May-June, 1933

1. The survey and preparation for it conform to the requirements of the Topographic Manual. (Par. 7, 8, 9, 13, 16.)

2. The character and scope of the survey satisfy the instructions.

3. The control and closures of traverses were adequate. (Par. 12, 29.)

4. The amount of vertical control that the Manual specifies for contours-formlines- was accomplished. (Par. 18, 19, 20, 21, 22, 23.)

5. The delineation of contours-formlines- is satisfactory. (Par. 49, 50.)

6. There is sufficient control on maps from other sources that were transmitted by the field party to enable their application to the charts. (Par. 28.)

7. High water line on marshy and mangrove coast is clear and adequate for chart compilation. (Par. 16a, 43, 44.)

8. The representation of low water lines, reefs, coral reefs and rocks, and legends pertaining to them is satisfactory. (Par. 36, 37, 38, 39, 40, 41.)

9. Rocks and other important details shown on previous surveys and on the chart were verified. (Par. 25, 26, 27.)

10. The span, draw and clearance of bridges are shown. (Par. 16c.)

11. Locations and elevations of summits are given. (Par. 19, 51.)

12. The tree line was shown on mountains. (Par. 16g.)

NOTE: Strike out paragraphs, words or phrases not applicable and modify those requiring it. Paragraph numbers refer to those in the Topographic Manual. Use reverse side for extending remarks.
13. The descriptive report covers all details listed in the Manual, in so far as they apply to this survey. (Par. 64, 65, 66, 67.)

14. The descriptive report also contains additional information required in aero-topography relative to type of photographs, method of compilation and type of ground control.

15. The descriptions of recoverable stations and references to shore line were accomplished on Form 524. (Par. 29, 30, 57, 67 except scaling of DMs and DPs, 68.)

16. A list of landmarks for charts was furnished on Form 567 and plotting checked. (Par. 16d, e, 60.)

17. The magnetic meridian was shown and declination was checked. (Par. 17, 52.)

18. The geographic datum of the sheet is and the reference station is correctly noted. (Par. 34.)

19. Junctions with contemporary surveys are adequate.

20. Geographic names are shown on the sheet and are covered by the Descriptive report. (Par. 64, 66k.)

21. The quality of the drafting is good. (Par. 41, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 45, 46, 47, 48, 49, 50.)

22. No additional surveying is recommended. Department of the Interior

REVIEW OF TOPOGRAPHIC SURVEY T-4808 (1933)

Dangerous Passage, Prince William Sound, S. W. Alaska.
Surveyed May - June 1933.
Instructions dated April 15, 1933.

Plane Table Survey.  Cloth Mounted.

Chief of Party - A. M. Sobieralski.
Surveyed by - G. A. Nelson.
Inked by - G. A. Nelson.

The records are complete.

2. Compliance with Instructions for the Project.
The survey complies with instructions.

T-4810 (1933) Junction was made in the field and is satisfactory.
T-3427 (1913) A satisfactory junction was made at Nowell Point. The form lines at the head of Eshamy Bay were investigated more fully during the present survey and found to differ from the prior survey.

The only prior survey of this area was T-3427 (1913) which joins at the northern limit of the present survey. (See paragraph 3).

5. Field Drafting.
The field inking of the survey is good.

6. Additional Field Work Recommended.
The survey is complete within its limits and no additional work is necessary.

7. Superseding Old Surveys.
The survey is the original of this area.
