I. GENERAL INFORMATION:

Instructions dated June 7, 1934.

All information not available from the photographs was supplied by the members of field inspection party. The draftsman assisted in field inspection in the northern half of the sheet.

The main portion of this sheet is characterized by the large areas of rich farming land under cultivation. This is particularly true in the central portion of the sheet. From the town of Fairhope south along the Bay shore to Point Clear settlement are numerous summer homes, this section being well known as a summer resort. There are four definite settlements on this sheet: the town of Daphne, the settlement of Montrose, the town of Fairhope, and the settlement of Point Clear.

As far the topography of the sheet, the northern section is rather hilly, becoming gradually rolling as the southern section is approached. Along the shore a bluff ranging from 25 to 60 feet in height extends from the northern limit of the sheet south to the town of Fairhope. Trees back from the shore are mainly pines, with scattered broad-leaved trees, and grass. Closer to the shore, broad-leaved trees predominate.

The photographs used in tracing this sheet were made by the Aero Service Corporation's five-lens camera HUI-52. Pictures were taken at 8:30 a.m., July 18, 1934, and number from 551 to 574, running in a northerly direction.

Due to the fact that the normal range of tide in this locality is small (approximately 1.5 ft.), only high water line is shown.

II. CONTROL:

(A) SOURCES

2. Traverse by Local State Control - Alabama.

The traverse run by the Alabama State Control in conjunction with the U.S. C. & G. Survey was computed on the Mercator projection for the state of Alabama and recomputed to geographic positions for the U.S. C. & G. Survey on the North American 1927 Datum from unadjusted values. The geographic positions are listed below:

1. T.T. 254-K
   Lat. 30°27' 302.7 m.
   Long. 87°54' 400.4 m.

2. T.T. 254-L
   Lat. 30°27' 217.4 m.
   Long. 87°54' 1484.0 m.

3. T.T. 254-M
   Lat. 30°28' 768.3 m.
   Long. 87°55' 202.7 m.

4. T.T. 254-N
   Lat. 30°28' 1077.5 m.
   Long. 87°55' 416.1 m.

5. T.T. 254-O
   Lat. 30°28' 1762.6 m.
   Long. 87°55' 1251.1 m.

6. T.T. 254-P
   Lat. 30°29' 40.6 m.
   Long. 87°55' 1584.0 m.

7. T.T. 254-Q
   Lat. 30°30' 1573.3 m.
   Long. 87°55' 120.2 m.

8. T.T. 254-R
   Lat. 30°31' 157.0 m.
   Long. 87°54' 1380.6 m.

9. T.T. 254-S
   Lat. 30°32' 1362.0 m.
   Long. 87°53' 1262.3 m.

10. T.T. 254-T
    Lat. 30°33' 28.0 m.
    Long. 87°53' 1381.2 m.
11. T.T. 254-U
   Lat. 30°34' 1431.9 m.
   Long. 87°54' 423.6 m.

12. T.T. 254-V
   Lat. 30°34' 1582.8 m.
   Long. 87°54' 261.9 m.

13. T.T. 252-A
   Lat. 30°28' 625.7 m.
   Long. 87°52' 643.7 m.

14. T.T. 252-B
   Lat. 30°28' 616.5 m.
   Long. 87°51' 1224.4 m.

15. T.T. 260-A
   Lat. 30°36' 407.1 m.
   Long. 87°54' 270.9 m.

16. T.T. 253-B
   Lat. 30°36' 418.5 m.
   Long. 87°53' 853.9 m.

17. T.T. 253-C
   Lat. 30°36' 413.3 m.
   Long. 87°52' 1107.4 m.

18. T.T. 253-D
   Lat. 30°36' 410.8 m.
   Long. 87°52' 242.2 m.

19. T.T. 253-E
   Lat. 30°36' 398.5 m.
   Long. 87°51' 200.1 m.

T.T. Stations MACK E and MACK F on the shoreline between latitudes 30°26' and 30°27' are not shown, as geographic positions were not available. Ties were too weak to warrant location of stations by radial plot. Reference Mark No. 1 DAPHNE U.S.E. 1910 was recovered and located by radial plot. B.M. POINT CLEAR 2 1918, U.S.E. Map Control Stations Nos. 105 and 115 were located by radial plot. Due to the fact that RAGGED 1935 was impossible to tie in, it was not used in the compilation. Its plotted position is shown on the sheet. Ties on T.T. 254-B were poor and station did not hold consistently with radial plot; it is shown on sheet by plotted position.
(B) **Errors**

No errors were encountered in the control of this sheet, and control was quite adequate.

III. **COMPILATION:**

(A) **Method**

The standard five-lens method of radial plot was used in this compilation.

(B) **Adjustments of plot**

No unusual adjustment of plot was necessary on this sheet.

(C) **Interpretation**

All symbols appearing on this compilation are those approved by the Board of Surveys and Maps (1932), except the symbol (?) used to designate brush.

(D) **Information from other sources**

No information other than that mentioned under "General Information" was used in the compilation of this sheet.

(E) **Conflicting names**

No conflicting names appear on this sheet.

All names shown on this compilation have been taken from U. S. C. & G. Survey Chart No. 1266, or from notes submitted by field inspection party.

(F) **New names**

1. **Eddin Wharf** - approx. lat. 30°36'; long. 87°55'.

This name is found on a sign at the foot of the wharf and refers to the owner of the wharf. The name is in accepted local usage.
2. Burkel's Pavilion - approx. lat. 30°31',
    " long. 87°55'.

   This name is found on a sign in front of
   the pavilion and was confirmed by residents
   of the locality. The name is in well established
   local usage and refers to the owner of the
   pavilion.

3. Magnolia Beach - approx. lat. 30°31',
    " long. 87°55'.

   This name is applied to the strip of beach
   just south of Burkel's Pavilion and is in use by
   the residents of Fairhope. A sign in the vicinity
   of the beach bears the name "Magnolia Beach".

4. Zundel Landing - approx. lat. 30°28.5',
    " long. 87°55'.

   This name is applied to the large pier about
   3/4 mile south of Great Point Clear and was ob-
   tained from residents of the locality. The name
   refers to the owner of the pier.

5. Marlow Road - approx. lat. 30°28.5',
    " long. 87°55'.

   This name is given to the road running east
   from Zundel Landing. The name is on a sign post
   at the intersection with the Point Clear road and
   is in accepted local usage.

IV. COMPARISON WITH OTHER SURVEYS:

Junctions with sheet No. T-5528 to the south and sheet
No. T-5530 to the north are in agreement.

In comparing this sheet with Chart No. 1266, it is
found that several wharves appearing on the chart do not
appear on this sheet. All wharves appearing on photographs
are shown on this compilation.

No contemporary surveys were available with which to
compare this area.
V. LANDMARKS:

Landmarks in this area are submitted on Form 567.

VI. RECOMMENDATIONS FOR FURTHER SURVEYS:

To the best of the knowledge of the draftsman, this sheet is complete in all detail of importance for charting purposes and no additional survey is recommended.

Submitted by: C. Carter Brown,
Draftsman.

Approved by: W. H. Reese,
Chief of Party.

This compilation is considered correct within 0.3 to 0.5 mm. for intersected points and 0.3 to 0.8 mm. for other detail.

P. L. E.
DEPARTMENT OF COMMERCE
U.S. COAST AND GEODETIC SURVEY
LANDMARKS FOR CHARTS
Pensacola, Florida
July 30, 1935

DIRECTOR, U.S. COAST AND GEODETIC SURVEY:

The following determined objects are prominent, can be readily distinguished from seaward from the description given below, and should be charted:

<table>
<thead>
<tr>
<th>Description</th>
<th>Position</th>
<th>Method of Determination</th>
<th>Charts Affected</th>
</tr>
</thead>
<tbody>
<tr>
<td>Great Pt. Clear L. Br.</td>
<td>30° 25' 1239.86'</td>
<td>Triangulation</td>
<td>1266</td>
</tr>
</tbody>
</table>

A list of objects carefully selected because of their value as landmarks as determined from seaward, together with individual descriptions, must be furnished in a special report on this form, and a copy of such report must be attached by the Chief of Party to his descriptive report.

The selection, determination, and description of these points are an important factor in the value of the chart. Landmarks selected at appropriate intervals can be clearly charted. However, when none is outstanding, a group of two or three objects may by their interrelationship provide positive identification. A group so selected should be indicated.

The description of each object should be short, but such as will clearly identify it; for example, a standpipe, elevated tank, gas tank, church spire, tall stack, red chimney, radio mast, etc. Assign numerals to landmarks to indicate: (1) Offshore, (2) inshore, (3) harbor, 1, 2, 3 would be a mark useful on all charts. Generally, flagstaffs and like objects are not sufficiently permanent to chart.

Names underlined in red approved by August 24-36.
There are no graphic control surveys in this area.

Comparison with Previous Topographic Surveys

Misc. 2 (1845), 1:200,000 - Reconnaissance
T 286 (1849), 1:20,000
T 294 (1849), 1:10,000
T 3713 (1917), 1:40,000

The general shoreline features are the same. Practically all of the piers on the above surveys have either been destroyed or are in ruins.

The 1849 surveys show bluffs and contours. T 5529 shows all bluffs of importance.

T 5529 is adequate to supersede the above surveys over the common area except for contours.

There are no contemporary hydrographic surveys in this area.

Comparison with chart 1266

The photographs have been examined and this survey shows all docks that now exist.

The road and street systems are somewhat different from that shown on the chart.

Landmarks and Aids to Navigation

The one light shown on the chart in this area (Great Point Clear Light Beacon) is shown on this survey. It is the only landmark recommended by the field party.

Three landmarks are shown on the chart, in addition to the light mentioned above, in this area, none of which has been recommended by the field party. The photographs which are clear were examined in each case with the following results:

Tank, 30° 28.5’, 87° 55.25’. This tank is not visible in the photographs and was not spotted by the field inspection. It is not shown on T 5529.

Chimney, 30° 29’, 87° 56.25’. This chimney is not visible in the photographs and was not spotted by the field inspection. The position is from T 3713 (1917) and appears to be the chimney on the seaward side of the Point Clear Hotel. The hotel but not the chimney is shown on T 5529.
Tank, 30° 31.5', 87° 54.25'. This tank is apparently triangulation station Tank, Fairhope Municipal, 1934. The street system of Fairhope in this vicinity on the chart is obviously in error. This tank is shown on T 5529.

March 24, 1936.

Frank G. Erskine.
Chief of Party: M. H. Reese

Compiled by: C. Carter Brown

Project: Alabama-Florida Compilation

Instructions dated: June 7, 1934

1. The charts of this area have been examined and topographic information necessary to bring the charts up to date is shown on this compilation. (Par. 16a, b, c, d, e, g and i; 26; and 64)

   Yes.

2. Change in position, or non-existence of wharfs, lights, and other topographic detail of particular importance to navigation which affect the chart, is discussed in the descriptive report. (Par. 26; and 66 g,n)

   Yes.

3. Ground surveys by plane table, sextant, or theodolite have been used to supplement the photographic plot where necessary to obtain complete information, and all such surveys are discussed in the descriptive report. (Par. 65; and 66 d,e)

   Has been discussed in descriptive report.

4. Blue-prints and maps from other sources which were transmitted by the field party contain sufficient control for their application to the charts. (Par. 28)

   None were submitted.

5. Differences between this compilation and contemporary plane table and hydrographic surveys have been examined and rectified in the field before forwarding the compilations to the office and are discussed in the descriptive report.

   No contemporary surveys available.

6. The control and adjustment of the photo plot are discussed in the descriptive report. Unusual or large adjustments are discussed in detail and limits of the area affected are stated. (Par. 12b; 44; and 66 c,h,i)

   Yes.

7. High water line on marshy and rocky coast is clear and adequate for chart compilation. (Par. 16a, 43, and 44)

   Yes.

NOTE: Strike out paragraphs, words or phrases not applicable and modify those requiring it. Paragraph numbers refer to those in the Topographic Manual. Refer also to the pamphlet "Notes on the Compilation of Planimetric Line Maps from Five Lens Air Photographs."
8. The representation of DNR water lines, roads, railroad tracks, and buildings and the legend pertaining to them is satisfactory. (Par. 36, 37, 38, 39, 40, 41)

Yes.

9. Recoverable objects have been located and described on Form 524 in accordance with circular 30, 1933, circular letter of March 3, 1933, and circular 31, 1934. (Par. 29, 30, and 57)

Yes.

10. A list of landmarks was furnished on Form 567 and instructions in the Director's letter of July 16, 1934, Landmarks for Charts, complied with. (Par. 16d, e; and 60)

Yes.

11. All bridges shown on the compilation are accompanied by a note stating whether fixed or draw, clearance, and width of draw if a draw bridge. Additional information of importance to navigation is given in the descriptive report. (Par. 16c)

No bridges over navigable streams are found in this area.

12. Geographic names are shown on the overlay tracing. The accepted local usage of new names has been determined and they are listed in the report, together with a general statement as to source of information and a specific statement when advisable. Complete discussion of place names differing from the charts and from the U. S. G. S. Quadrangles is given in the descriptive report, together with reasons for recommendations made. (Par. 64, and 66h)

Has been complied with.

13. The geographic datum of the compilation is N. A. 1927 and the reference station is correctly noted. (Unadjusted)

Yes.

14. Junctions with adjoining compilations have been examined and are in agreement. (Par. 66f)

Yes.

15. The drafting is satisfactory and particular attention has been given the following:

1. Standard symbols authorized by the Board of Surveys and Maps have been used throughout except as noted in the report.

2. The degrees and minutes of Latitude and Longitude are correctly marked.
3. All station points are exactly marked by fine black dots.

4. Closely spaced lines are drawn sharp and clear for printing.

5. Topographic symbols for similar features are of uniform weight.

6. All drawing has been retouched where partially rubbed off.

7. Buildings are drawn with clear straight lines and square corners where such is the case on the ground.

(Par. 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 48)

16. No additional surveying is recommended at this time.

17. Remarks:

18. Examined and approved:

M. H. Reese
Chief of Party

19. Remarks after review in office:

Reviewed in office by:  Frank E. Ewing
