STATISTICS (III)

Land Area (Sq Statute Miles): None

Shoreline (More than 200 meters to opposite shore): 27.6 statute miles

Shoreline (Less than 200 meters to opposite shore): 20.7 statute miles

Number of Recoverable Topographic Stations established: 36

Number of Temporary Hydrographic Stations located by radial
plot: 378

Leveling (to control contours) - miles: none

Roman numerals indicate whether the item is to be entered
by, (II) Field Party, (III) Compilation Party, or, (VI) the
Washington Office.

When entering names of personnel on this record give the
surname and initials (not initials only).

Remarks:

26 CONTROL:

The control plotted and control transferred from adjoining map drawings consists of seventeen (17) U. S. Coast & Geodetic Survey triangulation stations, which have been shown on this map drawing with the conventional triangulation symbol.

The following nine (9) control stations are within the detail limits of this map drawing:

- ✓ BURNT ISLAND LIGHTHOUSE, 1902, r. 1942 ✓
- ✓ SOUTHPORT I., NORTH END STANDPIPE, 1934, r. 1942 ✓
- ✓ RIGGS, 1934, r. 1942 ✓
- ✓ PARKERS ISLAND, 1855, r. 1942 ✓
- ✓ SOUTHPORT LEDGE, 1857, 1934, r. 1942 ✓
- ✓ HENDRICKS HEAD LIGHT, OLD TOWER, 1934, r. 1942 ✓
- ✓ SOUTHPORT ISLAND, N. END, RANGE BEACON, 1934, r. 1942 ✓
- * ✓ BOOTHBAY, HODGEN'S HOUSE, 1857, r. 1942 ✓
- ✓ BOOTHBAY HARBOR, WHITE SPIRE, 1934, r. 1942 ✓

The following eight (8) control stations fall just outside the detail limits of this map drawing:

- * RAM ISLAND, L.H., 1902, 1934, r. 1942
- * BOOTHBAY, CENTER BROWN SPIRE, 1857, r. 1942
- * BOOTHBAY, CENTER WHITE SPIRE 1857, r. 1942
- * BOOTHBAY HARBOR, STANDPIPE, 1902, 1934, r. 1942
- * MT. PISGAH, 1857, r. 1942
- * LINEKIN NECK, METHODIST MEETING HOUSE, CHIMNEY, 1857
- * SQUIRREL ISLAND, SOUTHWEST END BN., 1934, r. 1942
- * KENNISTON, 1858, r. 1942

* Positions of these stations have been transferred from adjoining map drawings and have been shown with red acid ink triangles. All others have been plotted and are shown with black acid ink triangles.

27 RADIAL PLOT:

(N.B.) Refer to special report on radial plots for map drawings No. T-5985 to T-5994, inclusive, submitted as the appendix to the compiler's descriptive report for map drawing No. T-5986.

28 DETAILING:

The shore line and adjacent culture have been detailed on this map drawing in accordance with the Director's letters dated January 12, and April 1, 1942, pertaining to this project No. CS 272-B.

All detail on this map drawing has been shown by the standard symbols recommended by the Washington Office, and notes fully describing any deviation therefrom have been made on the overlay sheet so that the planimetry may be clearly interpreted by those concerned.

- * Spelled "Hodgden" in Sp'l. Pub. No 46, p. 109, Δ in Maine, "Hodgdon" Cove is the spelling accepted by Geographic Names, and the triangulation Sta name (and others elsewhere) will ultimately be changed to conform to the accepted spellings. (LTS. Apr. 1946)

Recovery of questionable value.
See Descriptions of Triangulation
Station No 534, pp 18 & 39.

See Review Report for list of
16 U S E stations within
the detail limits of this
map manuscript.

28 DETAILING: (Cont'd.)

Small purple or green ink circles indicate positions of minor detail points determined by radial intersection, which were considered relatively strong or weak respectively.

The mean high-water line was outlined on the office photographs in accordance with the field inspection data with white pigment ink, and then detailed on this map drawing by using the positions of the previously mentioned minor detail points, and also, of those hydrographic stations and recoverable topographic stations whose relief displacement was considered negligible on the photographs. The hydrographic stations and recoverable topographic stations are mentioned later in this report.

The scales of the photographs and of this map drawing were in fair agreement. However, it was necessary to use the projector when detailing the shore line in the vicinity of Pratts Island.

The position of bench mark "Top of Pipe", which is located on the western shore of the Isle of Springs and listed in cahier No. T-27, was not established by radial intersection because of its proximity to the temporary hydrographic station No. 221, which has been shown with a $1\frac{1}{2}$ mm. black acid ink circle. However, the positions of bench marks No. 1 and No. 2, which are within a distance of approximately 20 and 100 meters respectively of the above mentioned bench mark, were established by radial intersection, and have been shown with the conventional bench mark symbol on this map drawing.

Bench mark No. 3 which is located in a thickly wooded area on the Isle of Springs has not been shown on this map drawing. The bench mark as identified on the field photograph by the field inspection party could not be identified on a sufficient number of office photographs to determine its position by radial intersection.

The area of this map drawing was adequately covered by photography. However, long dark shadows appeared on the photographs, because the latter were taken too early on the day of October 20th, 1941. These shadows were a source of considerable trouble when identifying the M. H. W. line.

No classification of roads immediately adjacent to the shoreline was submitted by the field inspection party of 1942. All roads shown on this map drawing have been classified by this compilation office and it is recommended that a reclassification be made by future field parties.

Road classifications were changed wherever deemed necessary so as to be in accordance

The field inspection party did not submit any data to assist the compiler in identifying bluffs along the shoreline. Therefore, they were detailed from stereoscopic examination of the office photographs. Since their character, whether rock or soil, could not be ascertained satisfactorily by stereoscopic examination, the dirt bluff symbol was used throughout.

30 MEAN HIGH-WATER LINE:

The mean high-water line (firm ground) has been shown by a solid heavy-weight black acid ink line, the center of which should be taken as the true position. Identification of the M. H. W. line on many of the photographs was difficult because of deep shadows and relief displacement.

Limits of marsh areas visible on photographs taken at approximately the time of high-water have been shown with a solid light-weight black acid ink line in conjunction with the conventional marsh symbol.

31 LOW-WATER AND SHOAL LINES:

Approximate limits of shoal and rock ledge have been detailed in accordance with the field inspection data, and shown with a light-weight dashed black acid ink line.

Limits of rock ledge that could be definitely identified on the photographs were detailed and shown with a solid light-weight black acid ink line.

The limits of mud flats as identified on the office photographs have been detailed and shown with a dotted black acid ink line.

All of the above mentioned limits are for the use of the hydrographer only. They should not be accepted by any mapping agency as indicating the true position of the mean low-water line.

32 DETAILS OFFSHORE FROM THE HIGH-WATER LINE: (overlay sheet)

Rocks, old piling areas, wrecks, reefs, etc. have been detailed on this map drawing in accordance with the field inspection data. Notes have been made on the overlay sheet to clarify such detail.

The extent to which rocks bare at M. H. W. has been shown by notes made on the overlay sheet.

Notes have also been made on the overlay sheet, calling attention to questionable areas for investigation by the hydrographic party.

33 WHARVES AND SHORELINE STRUCTURES:

All piers, wharves, bulkheads, etc. have been detailed in accordance with the field inspection data.

34 LANDMARKS AND AIDS TO NAVIGATION:

The positions of ~~five~~^{Six (6)} (5) recommended landmarks and three (3)

34 LANDMARKS AND AIDS TO NAVIGATION: (Cont'd.)

aids to navigation have been determined by radial intersection and are shown with $2\frac{1}{2}$ mm. black acid ink circles on this map drawing. The position of one other recommended land mark was determined by triangulation and has been shown by the usual triangulation symbol. Their descriptions appear on the overlay sheet. Form 567 (to be charted) has been submitted.

The ~~six~~^{seven(7)} (6) landmarks are as follows:

Chart Letter Nos. 607(1943)
909(1944)

- *HENDRICKS HEAD LIGHT, OLD TOWER, 1934, r. 1942
- ✓ Chimney, white, white house, red roof.
- ✓ Flagpole, white, 60 ft. high.
- + Tower, U. S. Bureau of Fisheries
- + **Dome, silver top, observatory
- Tank, water, steel, 70 ft. high

Chimney [showing Form 567 also section 230-2 attached to Chart Letter 909(1944)]

The three (3) aids to navigation are as follows:

- Beacon, (25 ft.) iron pole
- Beacon, black barrel, marking Whaleback ledge
- Beacon, black barrel, marking Pig Island Ledge

reviewers note

Burnt I. L.H., 1902, r. 1942 (determined by triangulation - previously charted)

* Position of this landmark believed to be incorrect on charts No. 230 and No. 314. Form 567 (to be deleted) has been submitted.

+ Positions plotted incorrectly on Map Drawing. Refer to sheet attached and Chart Letter 607(1943)

** Position previously submitted by this office, April 21, 1943, on Form 567 (to be charted) is incorrect. Form 567 (to be charted) with correct position listed has been submitted.

35 HYDROGRAPHIC CONTROL:

The positions of thirty-six (36) recoverable topographic stations and three hundred and seventy-eight (378) temporary hydrographic stations have been determined by radial intersection and are shown by $2\frac{1}{2}$ mm. and $1\frac{1}{2}$ mm. black acid ink circles respectively. The numbers of both classes of stations appear on the overlay sheet. Their descriptions have been listed and submitted as the appendix to this report. Two advance copies of this appendix have been previously submitted for use of the hydrographic party.

The descriptions and the geographic positions of the following thirty-six (36) recoverable topographic stations have been submitted on form 524:

- No. 21 - Gable, east, 2 sty. hse.
- 25 - Chimney, top, yellow house
- 33 - Gable, N., gray boat house
- ✓ 43 - Gable, E. small 2 sty house
- 47 - Unmarked sta. site
- 52 - Chimney white, white 1 sty. hse.
- 57 - Chimney, red brick, 2 sty. hse.
- 240 - Unmarked station site

35 HYDROGRAPHIC CONTROL: (Cont'd.)

- 246 - Unmarked station site
- 247 - Unmarked station site
- 248 - Flagpole, S. gable, 2 sty. house
- 304 - Gable, South, L-shaped house
- 491 - Unmarked station site
- 501 - Gable, N. small grey house
- 536 - Unmarked station site. *Amended 1943; Marked by a cross chisled in the st.*
- 540 - Flagpole, large, white
- 1134 - Unmarked station site
- 1190 - Roof, top, center, pyramid, cream col. house
- 1204 - Beacon, black barrel
- 1214 - Gable, east gray fish house
- 1219 - Beacon, black barrel
- 1241 - Flagpole, (60 ft.) N. of tennis cts.
- 1257 - Tower, top center, round, U. S. Bur. Fisheries
- 1260 - Light House, small, white
- *1484 - Observatory, top, silver color
- 1489 - Gable, north, green roofed house
- 1495 - Gable, south, small white cottage
- 1619 - Gable, east, low part, white house
- 1740 - Gable, S.W., green roof, white cottage
- 1923 - Unmarked station site *Amended 1943; Std Hy. Topodist stamped MAC 1943*
- 1930 - Tank, water, steel, 70 ft.
- B.M. No. 2 - Standard disk, unstamped
- B.M. No. 5 - Standard disk, unstamped
- BEACON, (25 ft.) Iron Pole - N. of MacMahan Id.
- BEACON, Red Barrel - Edge of reef, N.W. of Pratts Id.
- B.M. No. 4 - Hole in stone foundation

* Position submitted on Form 524, April 21, 1943, was in error. Correct position has been submitted.

See Review Report for 13 additional stations

37 JUNCTIONS:

- Map drawing T-5989, south side, junction in agreement.
- Map drawing T-5987, north side, junction in agreement.
- Map drawing T-5973, west side, junction in agreement. *OK*
- Map drawing T-5991, east side, junction in agreement. *OK*

The original eastern limit of this map drawing has been extended to approximately Longitude $69^{\circ} 37' 18''$, between Latitude $43^{\circ} 50' 33''$ and $43^{\circ} 51' 20''$.

The above extension was necessary in order to include on this map drawing the adjacent culture to the shore line of Boothbay Harbor.

Reference has been made in the descriptive report for map drawing No. T-4991, the limits of which this extension affects.

38 RECOMMENDATIONS FOR FUTURE SURVEY:

This map drawing is believed to be complete in all details of importance for charting and no additional surveys are required. It is believed that the probable error in the positions of radial points and well-defined objects along the shore line is not greater than 0.5 mm.

39 BRIDGES OVER NAVIGABLE WATERS: (*Refer to Reviewers Report*)

There are four bridges shown on this map drawing which are of navigational importance. Their horizontal and vertical clearances have been noted on the overlay sheet.

There are five bridges shown on this map drawing which are of no navigational importance.

41 CABLE CROSSING AREAS:

There is a water pipe line crossing between Spruce Island and Spruce Pt.

The cable crossing area shown on this map drawing in dashed red acid ink lines between Sawyers Island and Isle of Springs was taken from chart No. 314. Its position is approximate.

44 COMPARISON WITH EXISTING TOPOGRAPHIC QUADRANGLES:

Boothbay, Maine Quadrangle, U.S.G.S., Edition of October, 1893 - reprinted 1941; scale 1:62,500.

Boothbay, Me. Quadrangle, U.S.G.S. Edition of 1944; scale 1:62,500

Due to scale difference between the map drawing and the above mentioned quadrangle, planimetric detail could not be readily compared.

45 COMPARISON WITH NAUTICAL CHARTS:

Chart No. 314 published February 1935, reissued, July 1938 - Scale 1:40,000.

Chart No. 230 published September 1941 - Scale 1:15,000

A bridge shown on this map drawing at approximately Latitude $43^{\circ} 50' 25''$ and Longitude $69^{\circ} 39' 20''$ does not appear on Chart No. 314.

Bull Ledge, shown on Chart No. 314 at approximately Latitude $43^{\circ} 50' 10''$ and Longitude $69^{\circ} 42' 00''$, cannot be identified on the photographs and therefore has not been shown on this map drawing.

Clam Rock, shown on Charts Nos. 314 and 230 as a single island is now broken up into five sections.

Four wrecks appear on Chart No. 230. Only two were visible on the photographs, (verified by hydrographic party), these two are shown on the Map Drawing. More roads & houses appear on the Map Drawing.

Numerous piers shown on the Map Drawing in the vicinity of Boothbay Harbor do not appear on the charts.

Numerous roads appearing on the charts on Macdahan I. were not visible on the photographs. The roads as shown on the 1944 edition of the Boothbay Quadrangle appear correct.

MEMORANDUM for Descriptive Report T-5988

With reference to the landmarks for charts, Chart Letter 607 (1943) stated that two signals were located in error on the chart. They were replotted from the photographs in this office 9-11-43 and corrected on the celluloid.

No. 1257 Tower (U.S. Bureau of Fisheries)
Latitude $43^{\circ}50' 11.89$, Longitude $69^{\circ}38' 58.7$

No. 1484 Dome (Silver Top, Observatory)
Latitude $43^{\circ}50' 15.45$, Longitude $69^{\circ}37' 10.84$

DESCRIPTIONS OF
HYDROGRAPHIC SIGNALS AND SIGNAL SITES
LOCATED BY RADIAL PLOT ON MAP DRAWING

T-5982

SIGNAL NUMBER

DESCRIPTION

1738	Outer end center of fixed green pier southwest of boathouse.
1737	Corner of stone fence on ledge west of small bridge (Signal Site).
1736	Top center of grassy white rock ledge just off east shore (Signal Site).
1734	Outer end, center, of fixed slanting pier.
1732	Center of west face of rock crib on ledge (end of old pier).
1730	West gable of white boathouse with red roof.
2108	6' pine on east side of north end of cove (Signal Site).
2106	Stump at inshore end of rock point (Signal Site).
2105	Highest part of rocky point just west of road (Signal Site).
2107	White rock on rocky point with 5' - 8' spruces on it and on east side of cove (Signal Site).
1270	Outer end, center, of stone pier.
1271	South gable of dilapidated shingle fish house on ledge.
1272	Southeast corner of log pier.
1273	South gable of brown house with green trim at head of light.
2115	South gable of white building on south side of road at north tip of Mill Cove - Boothbay Harbor (Signal Site).
2113	West gable of small dark brown light roofed house close to water on east side of cove. House is west of large red roofed brown house with white trimmed windows (Signal Site).

SIGNAL NUMBER

DESCRIPTION

ON
TANKS AND REMAINS OF PIER

1274	✓	Center of outer tank on pier - leaning over.
1275	✓	West gable of filling station house on end of long pier.
1276	✓	South gable of white boathouse on west side of bight.
1937	✓	Southwest corner of dock out from Marine Service, Inc. corner near large gin-pole.
1936	✓	Southeast corner of first big pier south of Boothbay Harbor Yacht Club.
1935	✓	Southeast corner of white and shingle shack on pier just east of turnbridge.
1934	✓	(Signal Site) Point where boardwalk meets stone buttress on south side of west end.
1932	✓	South gable of light olive colored house just east of power-house sub-station.
1931	✓	West gable of green sided boathouse with white trim between two rock quays.
1277		West gable of brown boathouse with cream colored door.
1615	✓	North gable of red shingle garage - barn on ledge.
1614	✓	Flag pole base (35') on grassy point.

1130		West gable of white house at head of cove with tar paper garage.
1131		East gable of white fish house built on pilings on west side of cove.
1132		Green base of white flag pole in field on east side of cove.
1133		West gable of white house with three arched windows under gable.
1134	Top	(Signal Site) Small white boulder on north edge of highest part of south end of reef.
1136		Northeast corner of fixed pier belonging to tall white house on point.
1140	✓	Southeast corner of stone pier on west side of cove.
1142	✓	(Signal Site) Top of grey rounded rock on point east of large maple on bank.
1141	✓	East gable of large part of two part house at head of cove.
1135	✓	Observation cupola at head of cove.
1143		Northwest corner of stone pier north of large grey building on waters edge.
1278	✓	Small house on southwest corner of U. S. Coast Guard landing. (Signal Site)
1279	✓	Southwest corner of pier (Signal Site).
1280	✓	Southwest corner of pier (fixed) (Signal Site).
1157		Top center of grass patch on long white ledge.
1166		(Signal Site) High part of white ledge just north of salt grass patch north of red buoy.

SIGNAL NUMBER

DESCRIPTION

- | | | |
|------|---------------|---|
| 1165 | ✓ | South gable of main part of white house on north side of gut. |
| 1624 | ✓ | Top center of large flat grey boulder at high water mark on point. (Not grey boulder at brushline 100' east.) |
| 1623 | ✓ | Outer end center of small white fixed pier in front of large white dormered house. |
| 1622 | ✓ | Outer end center of white pier with yoke. |
| 1621 | ✓ | South gable of brown stained boathouse at head of bight. |
| 1620 | ✓ | Outer end center of weathered fixed pier on point opposite steamer landing. |
| 1618 | ✓ | East gable of weathered grey fish house on wharf. |
| 1617 | ✓ | Center of old rock fill at edge of grassline. |
| 1619 | ✓ <i>Topo</i> | East gable of low part of white house with three white chimneys. |
| 1616 | ✓ | Top center of grey rounded ledge just north of entrance to narrow passage (Signal Site). |
| 1252 | ✓ | Outer end center of green pier; most northerly on west side of beach at head of bight. |
| 1253 | ✓ | South gable of boat house with green door and trim. |
| 1254 | ✓ | Flag pole (40') on point off cupolaed house. |
| 1255 | ✓ | Top center of flat topped ledge on white rock point. (Signal Site) |
| 1256 | ✓ | Flag pole (35') in front of log lodge and behind miniature light house. |
| 1257 | ✓ <i>Topo</i> | Center of round tower at Fisheries Building. (Land Mark) |

T-5988

SIGNAL NUMBER

DESCRIPTION

1258	✓	Northwest corner of U. S. Fisheries pier.
1259	✓	Outer end center of fixed green pier.
1260	✓ <i>Topo</i>	Small white lighthouse with red glass.
1261	✓	North end of large boathouse near head of bight.
1262	✓	Top center highest ledge in bight with small tuft of grass on it. (Signal Site)
1265	✓	Bare site (center) south of tall grass on north end of grassy ledge. (Signal Site)
1263	✓	East gable of white house at west end of causeway.
1264		South gable of small house south of hotel.
1266	✓	Tip of large white boulder on point south of hotel.
1488	✓	South gable of house on end of pier with flag pole on gable.
1489	✓ <i>Topo</i>	North gable of green roofed house on pier on north side Tumbler Island.
1490	✓	(Signal Site) Edge of brushline on southwest point of Tumbler Island.
1605	✓	Flag pole on northeast side Tumbler Island.
1491	✓	Outer end of stone jetty. (Signal Site)
1492	✓	Outer end center of fixed pier opposite island.
1493	✓	(Signal Site) Most southerly spruce on point.

T-5928

SIGNAL NUMBER

DESCRIPTION

1494 ✓

Outer end center of fixed green pier.

1495 ✓ *Topo*

South gable of small white cottage on round point.

26

West chimney on low section facing water.

313

East gable of hip roof house with green composition roof.
Brown sides to house and yellow trim. It
is a two story dwelling. 30' above high water.

1222 ✓

South protruding end of long white rock ledge awash at high
water (Signal Site).

1221 ✓

Outer 20' spruce on rock point.

1219 ✓ *Topo*

Black barrel beacon.

1205

East gable of green roofed grey shingle house on rock cliff.
Semicircular vents below porch.

1204

Black barrel beacon.

1203 ✓

East gable of three story white house with red lattice below
porch.

1202 ✓

Top center of large white rock ledge in bight. (Signal Site)

1201 ✓

East gable (flag pole) of yellow house on north edge of bight.

1200 ✓

East gable of two story white house with flag on east porch.

1199 ✓

East gable of porch over balcony of white house.

473 ✓

High point of higher and inner of two rounded grey rock ledges
at high water mark.

476 ✓

Top center of brownish grey banded rock ledge at high water mark.
Northernmost of two similar ledges. (Signal Site)

T-57

SIGNAL NUMBER

DESCRIPTION

- | | | |
|-----|-----|---|
| 474 | ✓ | Lone pine on northeast point of island (Birch). |
| 475 | | (Signal Site) Center of bush clump on top of small rocky island ledge off southwest point of Birch Island. |
| 491 | Top | High part of small ledge to southeast of Birch Island. North end where tuft of grass is. (Signal Site) |
| 477 | ✓ | Outer end of fixed pier center line. |
| 473 | | Center of low (1') brush clump on north point of small island west of Phebe Island. (Signal Site) |
| 489 | | (Signal Site) Small dead birch on black rock point northeast tip of Phebe Island. |
| 490 | | High part of several small grey rocks piled together on grass covered low ledge at north tip of point. |
| 244 | | North gable of two story white house with green composition roof and trim. Fancy scalloped wood shingles on sides of building. |
| 242 | | East gable of large shed near water. |
| 245 | | West gable of large two story house with vivid green composition roof. House has a closed in porch with the same color roofing. |
| 253 | | West gable of most easterly white house. House has green blinds and green foundation. Dark blue composition shingles on roof. |
| 62 | | East gable of house with white trim windows. Two story house. Bluish gray composition shingles on roof. Unpainted wooden shingles on sides of building. House has two chimneys and sets near water's edge. (7014) |

REVIEW REPORT
Shoreline Map T-5988
Boothbay Harbor-Robinhood Cove, Me.
1941-1942

Subjects not used in this report have been covered in the Descriptive Report, or do not apply.

26. CONTROL

In addition to the nine C. & G. S. stations listed in the Descriptive Report, sixteen U.S.E. and one other C. & G. S. horizontal ^{control} stations lie within the limits of the map manuscript.

U.S.E.

C. & G. S.

Bluff
Shore
Colby

Southport, Martins No., 1857 (n.d.)

43° 50' 34.12" / 69° 40' 22.28"

(p. 109 Sp'l Pp. 46, Δ in Me.)

Footnote 1

All these stations were noted on the field inspection photographs. No geographic or plane coordinate positions are available at the time of this review, and their positions could not be plotted on the map manuscript base. However, stations whose positions were pricked on the field photographs were radially plotted and shown on the map manuscript as topographic stations. (Except those marked * on the above list, for which there were insufficient radial lines.)

28. DETAIL

All of the planimetric details of T-5988 were corrected, when necessary, to agree with the nine less U.S.C. & G.S. photographs taken in 1941, the field inspection data of 1942, and the hydrographic surveys H-6837, 6839, 6844, dated 1943.

All of the shoreline and offshore detail have been corrected in red acid ink, while all of the inshore details have been corrected in green acid ink. Explanatory notes were added wherever deemed necessary.

34. LANDMARKS & AIDS TO NAVIGATION

Two landmarks

Tower, U. S. BU. Fisheries
Dome, silver top, Observatory

were plotted
incorrectly on the map manuscript and located in error on charts 230 and 314. They were re-plotted and corrected on the

map manuscript. Their positions were noted on Form 567, attached to Chart Letter 607 (1943)

Two landmarks lying within the area of the map manuscript have been added to the list in the Descriptive Report (in red); form 567 attached to Chart Letter 909 (1944); and plotted on the map manuscript

2 Probable New Landmark. A high stack located in the town of Boothbay Harbor was plainly visible on the 1941 nine-lens photographs. The position of this stack was established by radial intersection and shown on the map drawing with a small circle with the word "stack."

39. BRIDGES OVER NAVIGABLE STREAMS

3 All bridges of navigational importance within the area of this survey have their vertical and horizontal clearances noted on the overlay sheet. Additional bridge data have been submitted with the Descriptive Reports of Hydrographic Surveys H-6837, 6839, 6844 dated 1943

In computing tide curves for obtaining the vertical clearances of the bridges noted by the field inspection party, the reviewer assumed the time noted on the field photographs to be W^{est} Time (80th Meridian). The following discrepancies are noted:

Wooden Turn Bridge (Foot) Boothbay Harbor

	<u>Field Insp. Data</u>	<u>Bridge List</u>
Vert	7.8 MHW	4.5 HW
Horiz	30.5 West side	32.0
	18.4 East side	32.0

Fixed Steel & Wood (Hwy), Deckers Cove

3a Horiz. 44.9 North side 15.0 center, normal to
45.3 South side channel

Steel Turn Bridge (Hwy), Townsend Gut

Horiz. 38.1 both sides 53.0 both sides

43. COMPARISON WITH CONTEMPORARY HYDROGRAPHIC SURVEYS

H-6837, 6839, 6844 dated 1943, 1:10,000

MHW line of these maps is that of un-reviewed T-5988.

The field inspection party of 1942 noted a rock at approximately 43° 49' 30"/69° 44' 20". This rock does not appear on H-6839.

The positions of hydrographic stations Nos. 33 (topo.), 230, 254, 257, 535, 1187, 1257 (topo.), 1258, 1263, 1484 (topo.), and of bench marks Nos. 1, 2, and 4 in the vicinity of Isle of Springs were incorrectly radially plotted on the map manuscript. The new positions of these stations are shown on the map manuscript in red acid ink. (Revised forms 524 were made for the three topographic stations.)

The ^{position of the shoreline on the} revised map manuscript ^{that shown on} supersedes the hydrographic surveys listed above.

44. COMPARISON WITH PREVIOUS TOPOGRAPHIC SURVEYS (see also Descriptive Report)

The following topographic surveys are in the area of T-5988:

889	1862	1:10000	961	1864-65	1:10000
954	1864	"	982	1865	"

U.S.G.S. BOOTHBAY 15' ed 1893, rep. 1941 1:62,500

The present survey supersedes all of the above surveys, except for contours and interior planimetry.

45. COMPARISON WITH NAUTICAL CHARTS:

314	1938	1:40,000	230	1941	1:15,000
-----	------	----------	-----	------	----------

The MHW line and offshore detail and the inshore detail shown with black or green acid ink on the map manuscript should be applied to the charts when they are revised.

Registrar's Notes. Jan., 1948

- 1 No forms 524 had been submitted for the USE and additional C & S stations listed in 26 above. A single card giving a statement concerning their use and a list of the stations is filed with the other 39 H & T cards for topographic stations on the map.
- 2 The "stack" mentioned in the reviewer's report as a probable land mark does not appear on chart 314, Aug. 1947, nor chart 1204, June, 1945.
- 3 Bridges - vertical & horizontal clearances: vault copy

Foot bridge at Boothbay Harbor	none given
* Deckers Cove	12 feet MHW
Townsend Gut	11 feet MHW
West Southport	6 feet MHW

Lucas T. Stevens
15 Jan, 1948

- 3a * A note (Jordan) on Misulia's original review report says:
"44 ft, both channels in hydro. records."
