TOPOGRAPHIC SHEET NO. "G&GG"

FLORIDA KEYS
TAVERNIER CREEK TO LOWER MATECUMBE

Party No. 14 E. R. McCarth, Lieut. (j.g.) C&GS, Chief of Party.
DESCRIPTIVE REPORT
to accompany
TOPOGRAPHIC SHEET NO. "G&G"

AUTHORITY:

Instructions from the Director dated November 17, 1933 (H. A. Cotton).

LIMITS:

Open coast from Tavernier Creek to south end of Lower Matecumbe.

CONTROL:

Triangulation stations are well distributed over the entire area of the sheet.

METHODS AND CLOSURES:

An aluminum sheet and the usual planetable methods of traverse were used. Very little traverse was run as on both sheets offshore stations were visible from which to resect or obtain a three point fix.

A traverse was run between triangulation stations "Bee" and "Matecumbe 2" which closed well within the allowable limits.

DESCRIPTION OF COAST:

GENERAL:

Between Tavernier and Snake Creeks the shoreline is rock, mangrove fringed, and backed by low trees. Several houses and piers have been built recently on Plantation Key. From Snake Creek to Lower Matecumbe there is considerable sand beach and the high water line was located.

All the sand area is densely covered with a low brushy growth.
DESCRIPTION OF COAST (CONTINUED):

DETAILED DESCRIPTIONS:

PLANTATION KEY:

The key is low and sparsely populated.

WINDLEY KEY:

The key is small but is the site of several rock quarries and also of Camp No. 1 for the crew of veterans who are supposedly to build the Overseas Highway.

UPPER MATECUMBE:

This key is more thickly settled than any other key in the locality. There are several houses strung along the sand ridge on the ocean shore the whole length of the key. The village of Islamorada and the winter camp of the Caribbean Colony are also located here.

LOWER MATECUMBE:

The key is practically unsettled. A veterans camp, No. 5 has been established on the northern end of the key between the railroad and ocean and a second camp, No. 3, at the ferry slip between the highway and bay.

A ferry slip for the ferries which ply between Lower Matecumbe and No Name carrying automobiles is located at the extreme south end of the key. It is also headquarters, during the winter season, of a small commercial fishing fleet and several pleasure craft. A small store is located here and gasoline and water may be obtained.

Camp No. 3 is the headquarters for the Overseas Highway construction crew and several hundred men are quartered here in temporary wooden shacks. Considerable equipment - dredges, digging machines, etc. - have been gathered but lies idle the greater part of the time as the veterans are usually too tired to work.

SETTLEMENTS:

ISLAMORADA:

This was the largest settlement in the keys but has been outstripped by Tavernier. There is a store where supplies, water and gasoline may be obtained.
DESCRIPTION OF COAST (CONTINUED):

SETTLEMENTS (CONTINUED):

WHALE HARBOR:

This is the best harbor in the immediate locality and is the base for charter fishing boats and some commercial fish houses (operating on a small scale).

CARIBBEAN COLONY:

Located on the ocean shore of the south end of Lower Matecumbe where the railroad crosses the highway. It is a winter fishing and resting camp.

MATECUMBE:

A small house boat settlement with a ferry slip and store located at the south end of Lower Matecumbe. It is also the terminal of the Overseas Highway ferry from No Name Key.

VETERANS CAMPS:

These have been established as described above. The camps are temporary and, although are supposed to be construction camps for the Overseas Highway, are in reality transient rest camps.

LANDMARKS:

See list of landmarks attached.

GEOGRAPHIC NAMES:

The following names of topographic features are shown on the chart and were verified:

Keys:

- Plantation Key
- Windley Key
- Upper Matecumbe Key
- Lower Matecumbe Key
- Teatable Key
- Indian Key

Settlements:

- Islamorada
GEOGRAPHIC NAMES (CONTINUED):

Verified names (continued):

Points:
Plantation Point

Creeks:
Snake Creek

The following name as shown on the chart is recommended for removal:

Plantation (No settlement)

The following name is in local use and it is recommended that it be used in charting:

Whale Harbor

RECOVERY OF OLD STATION:

Station Walker Bank, 1852 was recovered by topography. As it was not located in 1934 it was plotted on the sheet using a correction of (- 0.6) meters for latitude and (+ 3.1) meters for longitude to the published position. Corrections determined from comparing published and 1934 values of Carysfort Reef Light and Upper Sound Point.

Respectfully submitted:

MEMORANDUM BY CHIEF OF PARTY

The sheets were inspected weekly. Supplemental report is attached covering present conditions since the hurricane of Sept. 2-3, 1935.

E. R. McCarthy
Lieut.(j.g.) C&GS,
Chief of Party.
SUPPLEMENTAL REPORT - SHEET NO. "G&G"

The hurricane of Sept. 2-3 passed directly over the area covered by the sheet. Practically all the people on the keys were drowned and all houses and structures destroyed. The veterans' camps were completely wiped out and the ferry slip destroyed.

The railroad and highway were washed out from Tavernier Creek to Lower Matecumbe, crevasses being made at either side of the R.R. bridge at both Tavernier and Snake Creek and the highway bridges being washed out.

The fills were broken through at Whale Harbor and at three places (the old channels) on the long fill between Upper and Lower Matecumbe.

Present (November 1935) condition of the communication facilities is:

The highway has been rebuilt to the lower end of Upper Matecumbe Key, a temporary fill being made at Whale Harbor which fill is later to be bridged. A temporary ferry slip is being built at the end of the highway. It is intended to bridge the gaps west of this key and continue the highway to the old ferry slip at a later date.

The F.E.C. does not desire or wish to rebuild its track and has undertaken no construction since the hurricane. Should this be done bridges will be built at Whale Harbor and over the channels between Upper and Lower Matecumbe. The matter is still being discussed.

Respectfully submitted:

[Signature]
E. R. McCarthy,
Lieut. (j.g.) C&GS,
Chief of Party.
Date of Review Dec. 21, 1937 (T5540)
       Sept. 2, 1938 (T5541)

1. This survey has been reviewed in connection with Air Photo
   Compilation Nos. T-5540, T5541, with particular attention to
   the following details:

   (a) Projection has been checked in the Field.
   (b) Accuracy of location of plane table control points.
   (c) Discrepancies between detail on this survey and the
       air photo compilations listed above.
   (d) Discrepancies found in descriptions submitted on
       Form 524 when compared with the air photo compilations
       listed above.

2. Refer to the reviews and descriptive reports of air photo com-
   pilations Nos. T-5540, T5541, for a more complete discussion of
   any errors or discrepancies found.

   Any material errors found on this survey are noted in subsequent
   paragraphs of this review, and these have been reported to the Field
   Records Section and the Cartographic Section.

   Notes and corrections resulting from the review are shown on this
   survey in green.

   T-5540 and T-5540 b

   (1) Numerous triangulation and topographic stations were destroyed in
       Sept. 1935. These are noted on the survey.
   (2) Railway destroyed. Railway and highway bridges destroyed. Lattice tie
       are being rebuilt but not same as before.
   (3) All piers shown on the survey have been destroyed.
   (4) For chart compilation use T-5540
       and T-5541
