DESCRIPTIVE REPORT

Topographic Sheet No. V 6411

State
North Carolina

LOCALITY
PAMLICO RIVER - Goose Creek

1935

CHIEF OF PARTY
John A. Bond
The Topographic Sheet should be accompanied by this form, filled in as completely as possible, when the sheet is forwarded to the Office.

Field No. V

REGISTER NO.

State. North Carolina

General locality. Pamlico Sound

Locality. Goose Creek (Pamlico River)

Scale. 1:10,000 Date of survey April - May, 1935

Vessel. MIKAVE

Chief of party. John A. Bond

Surveyed by. C. E. Baldwin

Inked by. C. E. Baldwin

Heights in feet above ground to tops of trees

Contour, Approximate contour, Form line interval feet

Instructions dated. August 31., 1934

...
DESCRIPTIVE REPORT

To Accompany Topographic Sheet V.

Instructions dated August 31, 1934.  
Panlco River  
Project No. HT-197  
Goose Creek

GENERAL DESCRIPTIONS

The sheet covers Goose Creek and all tributary creeks from the Pamlico River to the mouths of Campbell and Upper Spring Creeks.

This country is low and wooded with a fringe of marsh practically all along the shoreline.

There are no settlements in this area and no features outstanding enough to warrant special comment.

LANDMARKS

There are no objects within the limits of the sheet suitable as landmarks.

CONTROL

The control was adequate. Triangulation stations were so located that it was not necessary to extend traverses for more than about a mile and a half. All traverses were started and ended on triangulation stations except at the heads of some of the smaller creeks.

SURVEY METHODS

Standard Coast Survey methods were used throughout. The closures of the traverses run fell within allowable limits and adjustments were made in the field. No attempt was made to rod the shoreline with an accuracy other than adequate for boat sheet purposes.

PLANETABLE POSITIONS

There were no natural objects suitable as permanent marks and no stations were marked as triangulation control was considered adequate.

CHARACTER OF MARSHES

Mudsh lands are covered with water from 6 to 12 inches at times of high wind. The shoreline is marshy and very low in the greater part of the area covered by the sheet.
LANDMARKS FOR CHARTS AND NON-FLOATING AIDS TO NAVIGATION

There are no objects within the limits of the sheet suitable for charting as landmarks. Non-floating aids to navigation will be listed in a separate report.

SPECIAL

The sheet was compared with the photo compilation sheet of the area by means of the new-type projector in the office of Lieut. Grenell and good agreement was found throughout.

REVIEW OF GRAPHIC CONTROL SURVEY T-6411, SCALE 1/10,000

Date of Review: May 4, 1936 (T-5557)
May 14, 1936 (T-5559)

1. This survey has been reviewed in connection with Air Photo Compilations Nos. T-5557 5559, with particular attention to the following details:
   
   (a) Projection has been checked in the field.
   
   (b) Accuracy of location of plane table control points.
   
   (c) Discrepancies between detail on this survey and the air photo compilations listed above in review for T-5557.
   
   (d) Discrepancies found in descriptions submitted on Form 524 when compared with the air photo compilations listed above.

2. Refer to the reviews and descriptive reports of air photo compilations Nos. T-5557 5559, for a more complete discussion of any errors or discrepancies found. See review for T-5557.

Any material errors found on this survey are noted in subsequent paragraphs of this review, and these have been reported to the Field Records Section and the Cartographic Section.

Notes and corrections resulting from the review are shown on this survey in green.

Comp. with T-5559
There are two discrepancies with T-5559. These are discussed in detail in the review for T-5557.

Leonard A. McIlwaine

B. G. Jones
