DESCRIPTIVE REPORT
To Accompany Topographic Sheet KK.

Instructions dated August 31, 1934
Neuse River, N. C.
Project No. HT-197
Hancock Cr. to Slocum Cr.

The sheet is a survey of Neuse River from Hancock Creek to Slocum Creek on the south shore and from a point about a mile west of Wilkinson Point to Beard Creek on the north shore.

The area adjacent to the shoreline on both sides of the river is partly wooded and partly farm-land.

LANDMARKS

"Landmarks for Charts" will be made the subject of a separate report to be submitted for the entire project.

CONTROL

The control was adequate, triangulation stations being about a mile apart.

SURVEY METHODS

Standard Coast Survey methods were used throughout. Traverse was extended along the shoreline supplemented by resecting on stations across the river and by occasional three point fixes. All closures were satisfactory.

CHARACTER OF MARSHES

The only marsh-land found within the limits of the sheet was along some small creeks. The bottom portion of the grass in the marsh is not usually covered by high water.
