Remarks: Graphical control only, No topography
DESCRIPTIVE REPORTS TO ACCOMPANY GRAPHICAL CONTROL SHEETS

T-6509a (K), T-6509b (KK), L & LL, and P.

AUTHORITY

Instructions from the Director dated November 17 1933 (H. A. Cotton).

LIMITS

Sheet T-6509a
   Bullfrog Banks to Water Keys
   b Content Keys to Sugarloaf Key

Sheet L
   Southeast Point (Big Pine Key) to Ramrod Key
   LL Spy (Pye) Harbor Key to Sugarloaf Key

Sheet P
   Coast from Sugarloaf Key to Rock Point (Geiger Key).

METHODS

The traverse along the south shore of Big Pine Key from Southeast Point to Newfound Key (O Cook) was partially controlled by two stations located by phototopographic methods. The traverse was run between O Palm and O Cook checking on stations Blow and Alp which were located by photo methods.

The traverse west from Station Gandalpho was run with the usual plane table methods checking by resection on the offshore stations. The errors were negligible.

The signals in the channels and in the areas north of the keys were located by planetable and sextant cuts with an occasional sextant fix in locations where the control was close enough that a good determination could be obtained.

TOPOGRAPHY

The sheets were used for location of signals only and no topography or geographic names are shown. These were taken up in the following sheets--

   T-5544 and T-5545 and T-5547.

Signals were located by plane table methods as a large number of the signals used were trees and natural objects or were signals built in the water where photographic methods were of no avail.

Signal Cook was located by both methods and the discrepancy in the two positions should be a fair index as to the amount of difference to be expected.

MISCELLANEOUS

The beacons along the INSIDE ROUTE north of the keys were all located. They are 2x2 posts with finger set into an iron pipe driven into the bottom. The casualties are large and the lighthouse district makes frequent checks to see that they are still in place.
MISCELLANEOUS (CONTINUED)

Locations of these beacons have been previously forwarded.

There are no landmarks within the limits of any of the three sheets. The position of the railroad tanks at Cudjoe Key which had been reported has been previously recommended for deletion.

The topography was partially done by Ensign P. A. Weber and partially by myself.

Respectfully submitted,

E. R. McCarthy
Chief of Party
REVIEW OF GRAPHIC CONTROL SURVEY T-6509a, SCALE 1:20000.

Date of Review

1. This survey has been reviewed in connection with Air Photo Compilation Nos. T-5544, , , with particular attention to the following details:

   (a) Projection has been checked in the field.

   (b) Accuracy of location of plane table control points.

   (c) Discrepancies between detail on this survey and the air photo compilations listed above.

   (d) Discrepancies found in descriptions submitted on Form 524 when compared with the air photo compilations listed above.

2. Refer to the reviews and descriptive reports of air photo compilations Nos. T-5544, , , for a more complete discussion of any errors or discrepancies found.

   Any material errors found on this survey are noted in subsequent paragraphs of this review, and these have been reported to the Field Records Section and the Cartographic Section.

   Notes and corrections resulting from the review are shown on this survey in green.

Chief of Party.
DESCRIPTIVE REPORT

to accompany

TOPOGRAPHIC SHEET NO. "K"

AUTHORITY:

Instructions of the Director dated November 17, 1933 (R.A. Cotton).

LIMITS:

Crawl Key at the southeast corner of the sheet to Content Keys at the northwest corner of the sheet.

CONTROL:

Control for the sheet consisted of a number of stations of the 1935 triangulation scheme well distributed over the entire area.

METHODS:

All signals located by means of graphic triangulation.

GENERAL DESCRIPTION OF THE KEYS:

All the keys in the area are mud and rock formation with thick mangrove growths.

Big Spanish Key is a cormorant rookery.

SETTLEMENTS:

There are no settlements on any of the keys.

GEOGRAPHIC NAMES:

Names inked on the sheet are names shown on the present chart which were verified by the field party.

Names in pencil are well established locally and are covered by a special report on Geographic Names.

LANDMARKS:

There are no landmarks in this area.

A copy of aids to navigation is attached to this report.
MISCELLANEOUS:

The sheet is on North American Datum. The following conversion factors were used:

W.H. Bainbridge N.A. to B.R. McCarthy N.A.

| Lat.   | +01.6 meters |
| Long.  | +11.0 meters |

Big Spanish Key En. 22 was relocated in December 1936 by the U.S. L.H.S. and is now designated as Big Spanish Key En. 22. The location as made by the U.S. L.H.S. is approximate and therefore is not shown on the topographic sheet. See 5544 for position determined by geodimeter by F. A. Weber.

This sheet is incomplete and should be returned to the field for completion when operations are resumed.

Respectfully submitted:

[Signature]

F.A. Weber,
Topographer.

Approved and forwarded:

REVIEW OF GRAPHIC CONTROL SURVEY T-6509, SCALE 1/20,000.

Date of Review

1. This survey has been reviewed in connection with Air Photo Compilation Nos. T-5544, , , with particular attention to the following details:

   (a) Projection has been checked in the Field.
   (b) Accuracy of location of plane table control points.
   (c) Discrepancies between detail on this survey and the air photo compilations listed above.
   (d) Discrepancies found in descriptions submitted on Form 524 when compared with the air photo compilations listed above.

2. Refer to the reviews and descriptive reports of air photo compilations Nos. T-, , , for a more complete discussion of any errors or discrepancies found. None

Any material errors found on this survey are noted in subsequent paragraphs of this review, and these have been reported to the Field Records Section and the Cartographic Section.

Notes and corrections resulting from the review are shown on this survey in green.

Only partially compared with
and applied to T5544. Sheet T6509 is in the field and the additional work will be compared with T5544 when returned to the office. Partial comparison made at this date with film negative of T6509 which is filed in the vault.
