Shoreline (Less than 200 meters to opposite shore):

Number of Recognizable Topographic stations located by radial plot:
No field report was submitted for this quadrangle. The field work was accomplished by plane table. No compilation from the nine-lens photograph was made from this quadrangle.

B. G. Jones 1/3/48
The statement on the opposite page is incomplete and misleading.

The islands comprising the land area on this quadrangle were located by planetable. Photographs were not used in the field.

A manuscript was then prepared in the Tampa Office by tracing the planetable survey and by adding details from nine-lens photographs which had just been taken. No radial plotting was done. The photographs were merely used to add additional details to the planetable shoreline and to complete minor information in the interior of the islands which had not been obtained by the planetable survey.

B. G. Jones
Technical Assistant to the
Chief, Div. of Photogrammetry
Compilation Report to Accompany Sheet T-8489

General:

Sheet T-8489 is a tracing from a planetable sheet covering the same area, and made by the Field Party. The detail was transferred from the plane table sheet to Sheet T-8489 by a draftsman in the Tampa Photogrammetric Office.

An insert of Boca Grande Key was added to Sheet T-8489. This insert was shown on the back of the plane table sheet. Triangulation Station Boca Grande 2, 1911 was lost, therefore, the reference mark for that station is shown on the survey sheet. The plane table sheet made by the Field Party and recent nine lens photographs of the same area do not compare favorably. There are discrepancies in the shoreline, vegetation; also, the photographs show a pond in the center of Boca Grande Key which is not shown by the plane table sheet.

Photographs were furnished by the Washington Office for checking the detail of the topography by adjusting to previously compiled topographic features.

Respectfully submitted by

Marie R. Blake
Marie R. Blake, Jr. Engineering Draftsman

Names underlined in red approved by W.M. on 8-10-43
Between January, 1942 and July, 1944, this Bureau completed 323 quadrangles. These maps have been published, or are in the process of being published on scales of 1:31,680 or 1:25,000. This series of quadrangles includes a land area of approximately 15,000 square miles. Incident to this work, a considerable volume of survey records and data has accumulated which will be filed for future reference. This material is filed as follows:

Registered andFiled in the Vault.

Cloth-mounted copy of the published quadrangle.

Black and white cloth-mounted copy of the published quadrangle at 1:20,000 scale. This copy is filed to preserve original survey detail shown on the manuscript at 1:20,000 scale which may not have been shown on the published sheet. For woodland, refer to the published quadrangle for the finally adopted outlines.

Descriptive Report.

Filed in the Photogrammetric Division.

-Field-inspection-photographs.

-Contoured-photographs (on which planestable contouring work was performed.)

-Field-edit-sheet.

Descriptions-of-recoverable-topographic stations (Form 524), filed in Review Section.

-Supplementary-traverse-and-level records.

-Field-notes, computations, lists of positions, and tabulations of results of horizontal and vertical accuracy tests.

Reproduction proof.

Correction sheet (copy of quadrangle showing in red changes to be made when next printed.)

Check lists of work performed on each sheet in the Washington office during review, drafting, edit, and reproduction.
Copies of specifications and all instructions to field parties and field offices.

Filed in Reproduction Branch.

Glass negatives of the color separation drawings.

Filed in the Library.

Special report on office work by B. G. Jones, 1944.

Season's report on field work by Commander F. L. Gallen, 1944.

Season's report on field work by Commander R. L. Schoppe, 1944.

Delivered to the Army Map Service in accordance with the contract.

Film negatives and film positives of the color separation drawings.

All color separation drawings.

A correction sheet consisting of a copy of the first edition of the quadrangle with notes in red indicating changes desirable at the next printing.
DIVISION OF CHARTS
SURVEYS BRANCH

REVIEW OF AIR PHOTOGRAPHIC SURVEY T-

QUADRANGLE

This quadrangle manuscript has been examined for completeness, accuracy, and conformity with the specifications. It is adequate for smooth drafting, reproduction and publication. Revisions found to be necessary in this office are discussed on the next page.

Horizontal and Vertical Accuracy

The tests were made on this quadrangle.

Previous Surveys

This manuscript has been compared with the following previous topographic surveys of this Bureau and other agencies. This map is satisfactory to supersede the previous surveys over the common area.

7-301, 185°, 1:10,000
7-302, 185°, 1:20,000
7-314, 185°, 1:20,000
7-3225, 191°, 1:20,000

There has been some reading of old line.

7-4789 supersede these old surveys in their common area.

Comparison with Nautical Charts Nos.

The manuscript has not been applied to the charts at the date of this review. The following comments are pertinent to the compilation and correction of nautical charts:

None
The following revisions of the map manuscript were found to be necessary and were accomplished as a part of this review:

None of consequence

Reviewed 31 July 1948 by Harold E. Peet
