Land Area (Sq. Statute Miles):

Shoreline (More than 200 meters to opposite shore):

Shoreline (Less than 200 meters to opposite shore):

Number of Recoverable Topographic Stations established:

Number of Temporary Hydrographic Stations located by radial plot:

Leveling (to control contours) - miles:

Roman numerals indicate whether the item is to be entered by, (II) Field Party, (III) Compilation Party, or, (VI) the Washington Office.

When entering names of personnel on this record give the surname and initials (not initials only).

Remarks:
Photogrammetry (Shoreline) Survey 2-5626

This shoreline survey is essentially a revision of the shoreline details on planimetric map 2-5626. Revised details were indicated in red on the manuscript and were compiled from photomaps taken March 9, 1945, and from field inspection of September 1945.

The field inspection and office compilation were accomplished by the Tampa Photogrammetric Office under supplemental instructions for project 33-312 B, dated August 4, 1945. Project 33-312 is a topographic mapping project for the production of 7½-minute topographic quadrangles. The layout of the topographic maps to be produced on this project is shown on the enclosed topospheric index. These topographic maps will be published at scale 1:24,000, and will supersede for publication the planimetric maps now existing in the area. The existing planimetric maps are shown on the enclosed planimetric indexes 129-M and 129-E.

With reference to the planimetric maps now existing within the limits of project 33-312, maps nos. 2-5626 to 2-5633 are modern and accurate planimetric base maps at scale 1:10,000. The instructions for project 33-312 call for the revision of shoreline details on these sheets so that the larger scale information will be available for future hydrographic investigation and for nautical chart compilation and correction. 2-5626 is one of this group of maps to be revised at the Tampa Office.

Field Inspection:

Field inspection was accomplished in September 1945, using 1:10,000 scale ratio prints of photomaps nos. 451-1557 to 451-1560 inclusive, and 451-1732 to 451-1737, inclusive.

The outside mean high water line was inspected after the September 15 hurricane as indicated by notes on the field inspection photographs.

Field inspection was accomplished by a field party of the Tampa Photogrammetric Office, Lt. Comr. J. J. Case in charge.

Compilation:

The manuscript consisted of a black print of planimetric map 2-5626 on cellulose acetate. Shoreline corrections and additions were made in red on this print from the 1:10,000 scale single-lens ratio prints, and from the field inspection notes. Shoreline corrections include the new high water line, offshore details, and along-shore buildings.
Review and Smooth Drafting:

Since this revision of planimetric map T-5626 is essentially a new shoreline survey with field inspection in September 1945, it is being given a new number and filed as Shoreline Survey T-8590. It will be reviewed in this office as a new survey.

In the process of drafting and reproduction, the in-shore planimetric details not covered by field inspection and not revised will be painted off or eliminated. The new sheet will then be printed and filed in the vault. It will not be published.

[Signature]

Jones
Technical Assistant to the Chief, Div. of Photogrammetry
DELIIMITATION:

This shoreline survey is a revision of the shoreline details on planimetric map T-5626. All revised details in red acetate ink were delineated by the Tampa Photogrammetric Office and details in green acetate ink by the Washington Office.

FIELD INSPECTION:

The field inspection was accomplished by George E. Varnadoe prior to the Hurricane of 15 September 1945 but was re-checked after the Hurricane and notations made in green ink were changes occurred. This shoreline inspection was made on 1:10,000 scale single lens photographs taken 13 March 1945.

DISCREPANCIES:

Numerous discrepancies were noted to be checked by the field editor, principally:

1. Conflicting data on bridge clearances.
2. Limits of navigable water, of the Coral Gables Waterway.

Tampa Photogrammetric Office.
Division of Photogrammetry
Review Report of
Photogrammetry (Shoreline) Survey T-8599

23. Radial plot.-Since T-8599 is essentially a revision of the existing planimetric maps T-5626, compiled from aerial photographs dated 9 March 1945, a new radial plot was not necessary. All of the corrections and additions were made by holding to the existing detail. The scale of the photographs very closely approximated the scale of the map manuscript.

28. Detailing.-The revision of details was verified with the final transverse photographs and additions and corrections were made to the manuscript in green acetate ink.

44. Comparison with previous Topographic Surveys. T-8599 supersedes those areas of the following surveys which it covers:

<table>
<thead>
<tr>
<th>Survey Number</th>
<th>Scale</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>T-336</td>
<td>1:20,000</td>
<td>1851</td>
</tr>
<tr>
<td>T-744</td>
<td>1:20,000</td>
<td>1859</td>
</tr>
<tr>
<td>T-3760</td>
<td>1:10,000</td>
<td>1919</td>
</tr>
<tr>

<td>1930</td>
</tr>
<tr>
<td>T-5620</td>
<td>1:10,000</td>
<td>1935</td>
</tr>
</tbody>
</table>

45. Comparison with nautical charts.-The map manuscript has been compared with charts 1246 and 1248. The shoreline changes on T-8599 when compared to the corresponding shorelines on the charts are of a minor nature.

T-3599 has not been applied to nautical charts at the date of this review.

Division of Photogrammetry
Correction Report of
Shoreline Map Manuscript T-8599

28 Detailing

The field edit corrections and other corrections made during the review of T-8435 were made in green ink. This survey is now consistent with Topographic Survey T-8435. A copy of the review report for T-8435 is attached to this descriptive report.

37 Datum

The projection for the map manuscript is based on the North American datum. It should be changed to one based on the North American datum of 1927 when the final drafting of this survey is done. See page 1 of the Data Record.

Jack Rihn  May 1948

11/24/47 L. Heckt
Division of Photogrammetry
Review Report of
Topographic Map Manuscript T-84/35

Subject numbers not used in this report have been adequately covered in other parts of the descriptive report.

26 - Control. - The triangulation station Coconut Grove, Chimney, 1934 was listed as Coral Gables, Chimney, 1934 in the published list of geographic positions. The station does not lie in Coral Gables. Geodesy has been notified and the station name changed to Coconut Grove, Chimney, 1934.

A Form N 2388-12, listing the triangulation stations shown on the map manuscript, was inserted in the descriptive report.

28 - Detailing. - The lines in the portion of the map manuscript that was printed from the planimetric manuscripts of this area, were weak and required a considerable amount of redrafting by the reviewer. The smooth draftsman should have sheets T-8597 and 8599 for reference to enable him to distinguish the details in the congested areas.

Buildings were delineated on the map manuscript along the waterfront in the Miami urban area.

Many buildings, roads and woods classifications that had been omitted by the compiler and the field editor, were added to the map manuscript.

A road north of the Tropical Park Race Track was redrafted in its correct position.

Hachures along cuts and fills were removed except where they are shown on depression contours.

34 - Landmarks and Aids to Navigation. - A Form 567 was forwarded to Nautical Chart Section for the landmark, Radio Tower (Wood), 1945.

37 - Recoverable Topographic Stations. - The names of the three recoverable topographic stations that are on the map manuscript, were changed to agree with the names shown on the Form 524 cards.

39 - Junctions. - The junctions were checked and minor discrepancies in woods classification and city limits were corrected.

All junctions are now satisfactory.
40 - Geographic Names. - Names were added to the map manuscript from the approved list of names submitted by the Geographic Names Section.

Street names were deleted because they were indistinguishable from buildings after they were reduced and printed from the planimetric manuscripts.

44 - Comparison with Existing Topographic Surveys:

<table>
<thead>
<tr>
<th>T-</th>
<th>Scale (1:20,000)</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>236</td>
<td>1:20,000</td>
<td>1951</td>
</tr>
<tr>
<td>744</td>
<td>1:20,000</td>
<td>1959</td>
</tr>
<tr>
<td>3758</td>
<td>1:20,000</td>
<td>1916</td>
</tr>
<tr>
<td>3760</td>
<td>1:10,000</td>
<td>1916</td>
</tr>
<tr>
<td>3540</td>
<td>1:20,000</td>
<td>1920</td>
</tr>
<tr>
<td>8686</td>
<td>1:10,000</td>
<td>1945</td>
</tr>
<tr>
<td>9599</td>
<td>1:10,000</td>
<td>1945</td>
</tr>
</tbody>
</table>

These surveys are superseded in common area by T-8435.

45 - Comparison with Nautical Charts:

<table>
<thead>
<tr>
<th>Chart No.</th>
<th>Scale (1:100,000)</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>L244</td>
<td>1:80,000</td>
<td>1957 Corr. 1946</td>
</tr>
<tr>
<td>848</td>
<td>1:40,000</td>
<td>1959 Corr. 1946</td>
</tr>
</tbody>
</table>

The map manuscript is in excellent agreement with the charts with the following exceptions:

The pier south of Chapman Field is not on the charts.

The clearances of bridges over the navigable portion of the Coral Gables Waterway, are not shown on the charts.

The map manuscript has not been applied to Nautical Charts.

48 - Accuracy Tests. - The vertical accuracy test made on this quadrangle meets the specifications for the project. This map complies with the national standards of map accuracy requirements.

49 - Overlays. - An overlay was prepared showing the marginal data, city limits, road classification and route numbers, selected triangulation stations, bench marks, topographic stations and spot elevations that are to be shown by the smooth draftsman.

An osalid print was prepared to clarify the contours and section lines for the draftsman.
50 - Review Summary. - The map manuscript was partially reviewed by F.T. Rynson. Discrepancies that were listed on an ozalid print of the map by the original reviewer were corrected.

No further investigation of the control or the land lines was made during this review.
