FIELD INSPECTION REPORT  
QUADRANGLES T-8697 and T-8698  
PROJECT CS-322

1. to 25:

All information applicable to these side headings is given in the "Field Inspection Report, Project CS-322, Area of the First Radial Plot", which was submitted in the Descriptive Report for Quadrangles T-8709 and T-8710. Side headings numbered 8, 9, 10, and 12, discussed in the above mentioned field inspection report, are not applicable to Quadrangles T-8697 and T-8698.

Approved by:  

Respectfully submitted:

N. Earle

Topo. Engineer
Amendment to File Data

Since project CS-322 was reviewed and registered, it was decided that a Completion Report for each project would be written and filed in the Bureau of Archives. This Completion Report should include all special reports, correspondence of probably future interest or importance, a project layout, a photo index, and a copy of the initial and supplementary project instructions.

A special file has been set up in the library for Division of Photogrammetry projects. The Completion Report and other special reports will be filed under the project number, and these will be arranged in numerical order.

The following reports and records for project CS-322 are now filed in the Bureau Archives, rather than according to the red notes in the Descriptive Reports:

A. Special Reports:
   1. Investigation of Boundary Monuments and Land Lines for Radial Plots 1, 2, 3, and 4
   2. Radial Plots 1, 2, 3, and 4
   3. Legal descriptions of boundaries
   4. Field Inspection for plots 1, 2, 3, and 4

B. Computations: Triangulation and Traverse 943/GTZ G-6785

C. Field records:
   1. Horizontal Angles (form 250) 12 vol. 943/GH G-7082
   2. Traverse Measurements (form 590) 9 vol. 943/GB G-7083
   3. Descriptions (form 525) and recoveries (form 526) 943/GA G-6786
   4. Pricking cards (form 1-982-1) for tri. and Trav. Div. of Photogrammetry
   5. Recoverable Topographic stations (form 524) General File

D. Recovery of bench marks (form 685) Filed in Leveling Sec.

E. Supplemental data; maps, plans
These were transferred to the Map Section (Mr. Stanley, Chief), Division of Charts, to be selectively filed or discarded.

#75

January 1951
26. Control:

At the time this project was started there were nine horizontal control stations listed as existing within the area of Map Manuscript No. T-8697. None were listed as existing in the area of Map Manuscript No. T-8698. Seven of the existing stations were recovered, two were reported as destroyed and five were identified.

One permanent triangulation station ad one temporary triangulation station were established in the area of Map Manuscript No. T-8698 to supplement the existing control.

The geographic position of AXE (U.S.E.), 1936, is listed in the pamphlet for the Oregon City Quad., Oregon, (Horizontal and Vertical Control Data), issued by the Office of the Chief of Engineers, Washington, D.C.

A complete tabulation of the horizontal control stations, which were originally in the area of these two map manuscripts, is attached to the "Field Inspection Report, Project CS-322, Area of the First Radial Plot". This report is included with the descriptive report for map manuscripts T-8709 and T-8710 which was forwarded to the Washington Office on July 5, 1946.

A complete tabulation of supplemental horizontal control stations which were established in 1945 and 1946 is attached to a special report, "Third-Order Triangulation and Traverse, Project CS-322, Area of the First Radial Plot", which was forwarded to the Washington Office on July 12, 1946.

27. Radial Plot:

The facts concerning the radial plot for the area of these two map manuscripts have been fully covered in the "Descriptive Report, First Radial Plot, Project CS-322". This radial plot report was included with the descriptive report for map manuscripts T-8709 and T-8710 which was forwarded to the Washington Office on July 5, 1946.

28. Detailing:

Compilation was done in accordance with instructions for Project CS-322 and special instructions applicable to planimetric mapping.
Special Report: Investigation of Boundary Monuments & Land Lines...

Area of the First Radical Plot...

Filed in Div. of Photogram General Files under 'D1/R8'.

(Initials and comments have been omitted)
Photographs Nos. 3495 to 3497 inclusive, which were taken on Nov. 21, 1945, covered a gap existing in the original photography. In some cases it was difficult to interpret, from the ratio print, the correct shape and size of buildings. This was attributed to the loss of sharpness when the contact prints were enlarged.

When any item relative to the field inspection data was doubtful, it could be clarified by consultation with the field man who had done the inspection work. It was, therefore, unnecessary to make discrepancy overlays for the field edit work.

The classification symbols for tree or brush areas are placed on the inside of the curled line which denotes the limits of said areas. These curled lines and the letter symbols are in green acid ink.

All boundary and land claim lines are shown by appropriate symbols in red acid ink. A legend shown in the margin of each map manuscript identifies these lines.

Pertinent notes, relative to various items, have been lettered in the margins of the map manuscripts.

29. Supplemental Data:

The following maps or plans were used to supplement the photographs:

Sheets 31, 32, 39, and 40 of a set of 74 sheets published by the Multnomah County, Oregon, Assessor's Office, at a scale of 1"=600", which were forwarded with the "Geographic Names Report" on July 15, 1946.

Blue line print, "Map of City of Portland", at an approximate scale of 1"=150", which will be forwarded at a later date.

30 to 35. These items are not applicable to Map Manuscripts Nos. T-8697 and T-8698.

36. Landing Fields and Aeronautical Aids:

Dwyer Landing Field (private) falls within the limits of Map Manuscript No. T-8697.

There are no existing or recommended aeronautical aids within the limits of the two map manuscripts.

37. Geographic Names:

Only undisputed geographic names are shown on the map manuscripts.
Geographic names are the subject of a special report, "Investigation of Geographic Names, Project CS-322, Area of the First Radial Plot", which was forwarded to the Washington Office on July 12, 1946.

38. Recoverable Topographic Stations:

Copies of Froms 524 are being submitted for the following stations:

In the Area of T-8697:

T 1-S R 2-E, Section Corner, 20-21-28-29, 1945
T 1-S R 2-E, Section Corner, 8-9-16-17, 1945
T 1-S R 2-E, Section Corner, 9-10-15-16, 1945
T 1-S R 2-E, Section Corner, 16-17-20-21, 1945
S.E. Cor. J.I. Witten Donation Land Claim, 1946
N.E. Cor. J. Abrahams Donation Land Claim, 1946
PRIMARY TRAVERSE STATION #1 (U.S.G.S.) (Oregon), 1911, r 1946

In the area of T-8698:

T 1-S R 2-E, Section Corner, 10-11-14-15, 1945
T 1-S R 2-E, Section Corner, 14-15-22-23, 1946

39. Junctions:

Complete and satisfactory junctions have been made between Map Manuscripts Nos. T-8697 and T-8698, and with adjoining map manuscripts.

40. Bench Marks:

Bench marks have been detailed as identified by field inspection units. Each bench mark is indicated by a black acid ink cross with the name and elevation to the nearest 1/10 foot lettered nearby.

44. Comparison with Existing Topographic Surveys:

See record sheet which accompanies each map manuscript.

45. Comparison with Nautical Charts:

There are no nautical charts covering the area of these two map manuscripts.

Approved and Forwarded: Respectfully submitted:

Robert A. Earle
Chief of Party

J. Edward Deal, Jr.
Photogrammetric Engineer
FIELD EDIT REPORT
T-8697 and T-8698
Project GS-322

46. Methods:

These map manuscripts were field edited in accordance with the Field Edit Instructions dated 24 August 1945. All corrections and additions have been made accurately on the field edit prints in colored ink, or the place where a correction or addition is to be made has been indicated by a note which refers to a field photograph. All features which are to be deleted have been crossed out in colored ink.

New buildings were located either by pacing or taping and are shown on the field edit prints. A legend on each of these prints will furnish a key to all symbols and to the different colored inks used.

47. Adequacy of the Compilation:

The planimetry as delineated on the map manuscripts may be considered as complete and adequate with respect to the corresponding ground detail. Except for the deletions, corrections, additions, and notations made on the field edit prints, it is also accurate in regard to relative position.

Any drafting of detail that seemed to be questionable was called to the attention of the Compilation Office by notes. The deletion of buildings consisted for the most part of small barns, shacks, and buildings nearing the end of their useful life, which in accordance with the instructions should not be shown. Dwyer Landing Field, a private field, was located by field measurements on field photograph 1143. In quadrangle T-8697 there are two different streets which have the name "Hazel." This was verified in the field and found to be correct. Any changes in the spelling of street names were verified from posted street signs.

In accordance with the field edit instructions, the accuracy and completeness of the map manuscripts in regard to geographic names, boundaries, public land lines, and detail were checked by Mr. H.G. Richardson, City Surveyor, City Hall, Portland. The geographic names in this area have been reviewed by Mr. Lewis A. McArthur, Collaborator for the U. S. Coast and Geodetic Survey.

48. Accuracy Tests:

Results of the horizontal accuracy test on T-8697 are attached to the back of this report. For additional accuracy tests in this area refer to the field edit report on T-8689 and T-8690, which has been submitted.
The maps are believed to comply with horizontal accuracy specifications.

49. Bench Mark Elevations:

The elevations of the bench marks shown on the prints have been checked.

HORIZONTAL ACCURACY TEST  
Map Manuscript T-8697  
Project CS-322  

Plane Coordinate positions, which were established from the various traverses 
run by the City of Portland, on the Lambert Projection, Oregon State, North 
Zone, were obtained from the City Surveyor of Portland, Mr. E. G. Richard- 
son, who stated that these coordinate positions were of fourth-order accu-
racry or better and that no position is in error more than three feet.  

Since the majority of these coordinate positions were for section, quarter 
section or city boundary corners, which were located at the centerline inter-
sections of streets or roads, it was decided to utilize most of them as test 
points to check the accuracy of the map manuscripts. 

The location of these points was indicated by the City Surveyor on several 
County Assessors Maps, which will be forwarded to Washington. Each position 
used as a test point has been assigned a numerical test point number and is 
indicated in red on the County Assessor's Map or sheet attached thereto.  

In the tabulation of the test points, the coordinate positions obtained from 
the City of Portland is referred to as T.P.No. and the scaled position from 
the map manuscript (Scale L:8,000) is referred to as M.M.No.

Review Report of

Planimetric Manuscript No. T-8697

Paragraph numbers used in this report refer to paragraph numbers in the descriptive report.

Axe (U.S.E.) 1936 is also U.S.E. benchmark stamped "Axe Sot - 1935". See Form 685, Report on Condition of Benchmark.

B.M. 163 is not shown on the map manuscript because of the proximity of B.M. D224 - flagpole in front of Kellogg School.

41. Donation Land Claim and Section Lines.

The following D.L.C. lines were changed to conform with measurements given on the General Land Office plats:

L. W. Nelson
Plymton Kelly
H. Campbell

In addition, the name J. E. Witten was changed to J. E. Willens to agree with the name given on the G.L.O. plats.

The following section corners were changed to conform with the General Land Office plats:

Section corner 16-15-22-21
"   " 21-22-27-28

The Multnomah-Clackamus county line was changed beginning at section corner 20-21-28-29 east to section corner 23-24-25-26 on T-8698. Also beginning at section corner 20-21-28-29 west to T-8696 in line with Sherrett Street, the county line was changed to a position north of Clatsop Street.

The position of the city boundary line running east and west immediately south of the Dwyer Landing Field was moved slightly northward.
44. Comparison with Existing Topographic Surveys.

Oregon City, Ore., U.S.G.S., 1:62,500, 1911-12
Oregon City, Ore., U.S.E., 1:62,500, 1938-39

The above surveys are in general agreement with the map manuscript.

45. Comparison with Nautical Charts.

No nautical charts cover the area of this map manuscript.

7 May 1947

To: Chief, Division of Photogrammetry
   U.S. Coast & Geodetic Survey
   Washington 25, D.C.

From: Lt. Comdr. R. A. Earle

Subject: Review of Map Manuscript T-8697

The changes made in the position of land lines on Map
Manuscript T-8697, in the Washington Office, may be accepted as
they are of a minor nature and do not necessarily conflict with
locations on the County Maps.

The name of J. E. Witten, which was changed in the Washing-
ton Office to J. E. Willens to agree with the G.L.O. Plats, should
be retained. On all local maps and records this claim was shown
as J. E. Witten, therefore, it can be assumed that it was misspell-
ed on the G.L.O. Plats.

R. A. Earle
Chief of Party

RAE/gw
Division of Photogrammetry

Review Report of

Planimetric
Topographic Survey, Manuscript No. T-8698

Paragraph numbers not used in this review have been adequately covered in other parts of this report.

28. Detailing.--

The delineation of much of the drainage on this manuscript was not accurate and has been corrected after stereoscopic examination of the photographs. Minor changes were also made in a few of the woodland limits.

44. Comparison with Existing Topographic Quadrangles.--

Comparison was made with two U.S.G.S. quadrangles, both Oregon City, Oregon, scale 1:62,500, one the 1912-14 edition, the other the 1941 edition.

49. Donation Land Claim Lines.--

The southern limit of the L. W. Nelson donation land claim in the northwestern corner of this quadrangle was changed to agree with the line shown on the assessment map and with land lines appearing on the photograph.

Chief, Div. of Photogrammetry Chief, Div. of Coastal Surveys
Descriptive Report T-8697 and T-8698

The combined descriptive report for these two planimetric maps was misplaced in the Washington Office after completion of the review and at some time during smooth drafting and reproduction. The report has not been found at this time. The maps are being registered with this statement in lieu of the descriptive report until the latter is found.

T-8697 and T-8698 are two of a series of 60 planimetric maps of Portland and vicinity prepared in cooperation with the Portland Chamber of Commerce. These manuscripts were compiled at Portland and submitted to the Washington Office about November 1946. Reproduction and printing were completed in 1947.

For a general description of the field surveys and office compilation, and discussion of various other details regarding this project, refer to the combined descriptive report for T-8695 and T-8696.
