Compiling 1:20,000 scale, from 1:20,000 scale nine-lens photographs; taken August 1950 and June 1951.

Additional nine-lens photography to be taken: Season 1952.

(Refer to Air-Photo Indexes B-34, 50, 51, 52 and E-31.)
Summary to Accompany Maps of
Nunivak Island in Project 6056

Nunivak Island has been mapped under Project 6056 by a series of shoreline maps at a scale of 1:20,000 and a series of topographic maps at a scale of 1:40,000. The shoreline maps are numbered T-9723 to T-9741, inclusive, and the topographic maps are numbered T-10365 to T-10379, inclusive. These two series of maps were adopted so as to satisfy the requirements of the Army Map Service and this Bureau, and to expedite drafting and compilation procedures.

Field work in advance of compilation was done in 1951 and included the establishment of horizontal and vertical control, tidal observations, limited inspection of shoreline and interior features, and the investigation of geographic names. No additional field work was accomplished.

The maps of this project were compiled using instrument work sheets at 1:20,000 scale from the nine-lens plotters. Photographs were nine-lens taken in 1950 and 1952. The shoreline manuscripts at 1:20,000 scale cover only shoreline and adjacent prominent planimetric features. Maps T-9728, T-9734, T-9735 and T-9740 are the exception to this and show contours and other topographic features. These were compiled prior to the adoption of the 1:40,000 scale topographic series for Bureau use which were compiled using work sheets reduced to 1:40,000 scale.

Items registered under T-numbers will include cloth-backed prints of the map manuscripts and a copy of the corresponding descriptive reports.

31. This report covers the shoreline delineation of the east coast of Nunivak Island from Cape Corwin to Cape Manning.

The topography and shoreline were compiled simultaneously on the Reading Nine Lens plotters at 1:20,000 scale. The original instructions were changed, during instrument compilation, so that only the shoreline detail is to be inked on the 1:20,000 scale manuscript, and the topography is to be scribed at 1:40,000 scale. Several of the originally scheduled interior sheets were therefore deleted because of the lack of shoreline. This necessitated the renumbering of several maps (including those covered by this report), as shown on the attached index.

A new series of numbers was assigned to the 1:40,000 scale topographic maps. (See Compilation Report T-10365-10379.)

A Compilation review was applied insofar as practical to the instrument work sheets. UTM grid ticks were then inked on to the work sheets by adjusting the pass points to those on the base sheet. (Maximum error after adjustment was approx. .5 mm.) The work sheets were then photographically reduced to 1:40,000 scale and forwarded to the Drafting Section.

32. CONTROL: See radial plot report.

33. SUPPLEMENTAL DATA: None

34. CONTOURING AND DRAINAGE: Not applicable.

35 and 36. SHORELINE ALONGSHORE AND OFFSHORE DETAILS:

The shoreline, for the most part, appeared to be adequate. However, in the vicinity of Cape Corwin, T-9733, numerous rocks and foul areas which were not noted on the field photos were delineated from the office photos. Some difficulty was encountered in interpreting the term "Ledge Rock" as used by the field inspection party. Where this term was applied to scattered individual rocks the rock awash symbol was delineated; where it appeared to apply to a solid mass of rock, a ledge or reef symbol was delineated.

37. LANDMARKS AND AIDS: None located or recommended by field party. T-9733

38. CONTROL FOR FUTURE SURVEYS: Six Forms 524 have been submitted and listed in the Notes to Hydrographer as follows: T-9731 - 2, T-9732 - 3, T-9733 - 1.

*Filed in Photogrammetry Division.
JUNCTIONS:

Only the instrument work sheets were joined in this section.

40. HORIZONTAL AND VERTICAL ACCURACY:

See radial plot report.

46. Comparison was made with USGS, 1:250,000 scale maps "Nunivak Island" and Cape "Mendenhall."

47. Comparison was made with nautical chart No. 9102.

48. GEOGRAPHIC NAMES:

No evidence of the two villages "Ingrimiut" (T-9732) and "Ahmikdoligamiut" (T-9731) could be seen on the photographs. Their locations were delineated from the position indicated on the Geographic Names mosaic. The village of Kanikyatkalikmiut (T-9731) was shown on the Geographic Names Mosaic as being on the south side of a lagoon; however, field inspection indicated barrabaras on the north side. The latter position was delineated.

All geographic names have been delineated on the instrument work sheets and have been listed and attached to the report for the 1:40,000 scale topographic manuscripts.

Respectfully submitted:

Louis Levin
Supervisory Cartographer
Nine-lens Unit

Approved and Forwarded:

Charles Theurer
Supervisory Photogrammetric Engineer
Review Report
Topographic Maps T-9731 thru T-9733
6 January 1956

62. Comparison with Registered Topographic Surveys:
   None.

63. Comparison with Maps of Other Agencies:
   Nunivak Island, Alaska (USGS), 1:250,000, 1951
   Cape Mendehall, Alaska (USGS), 

   Details are very sketchy on these maps which preclude a
detailed comparison.

64. Comparison with Contemporary Hydrographic Surveys:
   None.

65. Comparison with Nautical Charts:
   9304 1952 corrected to 53-6/15
   No discrepancies.

66. Adequacy of Results and Future Surveys:

   Only a limited field inspection of alongshore features
was made. Thus, these features are somewhat generalized
and are subject to errors in office interpretation of foul
limits, rock heights, etc. Otherwise, no significant
deficiencies in accuracy or adequacy of the maps were
indicated.

Superseded position on chart letter 126-52 which was on proposed datum.

---

This form shall be prepared in accordance with Hydrographic Manual, pages 800 to 804. Positions of charted landmarks and nonfloating aids to navigation, if redetermined, shall be reported on this form. The data should be considered for the charts of the area and not by individual field survey sheets. Information under each column heading should be given.
