CHIEF OF PARTY

M. J. Tonkel, Chief of Field Party
E. H. Kirscck, Chief of Field Party

LIBRARY & ARCHIVES

DATE April 7, 1958
DATA RECORD

T - 9734-T-9741, inclusive

Project No. (II): Ph-56

Quadrangle Name (IV):  

Field Office (II): Portland, Oregon

Chief of Party: M. J. Tonkel

Photogrammetric Office (III): Baltimore, Md.

E. H. Kirsch

Washington

Officer-in-Charge: L. W. Swanson

Instructions dated (II) (III): 2 April 1951

Copy filed in Division of

Photogrammetry (IV)

Office Files

Method of Compilation (III): 9 lens Reading Plotter

Manuscript Scale (III): 1:20,000

Stereoscopic Plotting Instrument Scale (III): 1:20,000

Scale Factor (III):  

Date received in Washington Office (IV):  

Date reported to Nautical Chart Branch (IV): 18 April 1957

Applied to Chart No.  

Date:  

Date registered (IV):  

Publication Scale (IV):  

Publication date (IV):  

Geographic Datum (III): NAD 1927

Vertical Datum (III): Mean sea level except as follows:

Elevations shown as (2) refer to mean high water

Elevations shown as (3) refer to sounding datum

i.e., mean low water or mean lower low water

Reference Station (III):  

Lat.:  

Long.: 

Adjusted

plane coordinates (IV): UTM

State: Zone: 3

Y = 

X = 

Roman numerals indicate whether the item is to be entered by (II) Field Party, (III) Photogrammetric Office,

or (IV) Washington Office.

When entering names of personnel on this record give the surname and initials, not initials only.
DATA RECORD

T-9734

Field Inspection by (II):  I. Zirpel  
Date:  July 1951

Planetary contouring by (II):  None  
Date:

Completion Surveys by (II):  None  
Date:

Mean High Water Location (III) (State date and method of location):  From field inspection (from air) and aerial photos listed on Page 14.

Projection and Grids ruled by (IV):  J. Allen  
Date:  5 Jan. 1952

Projection and Grids checked by (IV):  H. D. Wolfe  
Date:  8 Jan. 1952

Control plotted by (III):  A. Queen  
Date:  27 April 1954

Control checked by (III):  Leroy A. Senasack  
Date:  14 May 1954

Radial Plot or Stereoscopic  
Control extension by (III):  Leroy A. Senasack  
Date:  9 June 1954

Stereoscopic Instrument compilation (III):  Planimetry  
Contours  
L. Levin  
Date:  Aug. 1954

Manuscript delineated by (III):  
Date:

Photogrammetric Office Review by (III):  C. Misfeldt

Summary to Accompany Maps of
Nunivak Island in Project 6056

Nunivak Island has been mapped under Project 6056 by a series of
shoreline maps at a scale of 1:20,000 and a series of topographic maps
at a scale of 1:40,000. The shoreline maps are numbered T-9723 to
T-9741, inclusive, and the topographic maps are numbered T-10365 to
T-10379, inclusive. These two series of maps were adopted so as to
satisfy the requirements of the Army Map Service and this Bureau, and
to expedite drafting and compilation procedures.

Field work in advance of compilation was done in 1951 and included
the establishment of horizontal and vertical control, tidal observations,
limited inspection of shoreline and interior features, and the investi-
gation of geographic names. No additional field work was accomplished.

The maps of this project were compiled using instrument work sheets
at 1:20,000 scale from the nine-lens plotters. Photographs were nine-
lens taken in 1950 and 1952. The shoreline manuscripts at 1:20,000
scale cover only shoreline and adjacent prominent planimetric features.
Maps T-9728, T-9734, T-9735 and T-9740 are the exception to this and
show contours and other topographic features. These were compiled prior
to the adoption of the 1:40,000 scale topographic series for Bureau use
which were compiled using work sheets reduced to 1:40,000 scale.

Items registered under T-numbers will include cloth-backed prints of
the map manuscripts and a copy of the corresponding descriptive
reports.

COMPILATION REPORT
T-9734-T-9741

31. This report covers the shoreline delineation of the South Shore of Nunivak Island from Cape Mohican eastward to Cape Corwin.

The topography and shoreline detail were compiled simultaneously on the Reading Nine-lens plotters at 1:20,000 scale. Shortly before the instrument delineation on the work sheets was completed a change was made in the method of compiling the manuscripts. It was decided to ink the shoreline detail, only, on 1:20,000 scale manuscripts and scribe the 1:40,000 color separation sheets directly from a reduced copy of the instrument sheets. Several of the interior 1:20,000 sheets were deleted because of the absence of shoreline and consequently some of the remaining sheets were renumbered as shown on the attached index. A new series of numbers was assigned to the 1:40,000 scale topo maps (see compilation report T-10365-10379).

A compilation review was applied, insofar as practical, to the instrument work sheets. UTM Grid coordinates were then inked on to the work sheets by adjusting the pass points to those on the base sheet. (Maximum shift after adjustment approx. .5 mm.) The work sheets were then photographically reduced to 1:40,000 scale and forwarded to the drafting section.

32. CONTROL: See radial plot report.
33. SUPPLEMENTAL DATA: None.
34. CONTOURING AND DRAINAGE: Not applicable.
35 and 36. SHORELINE, ALONGSHORE AND OFFSHORE DETAILS:

Although the majority of the shoreline was covered by both 1950 and 1952 photography it was not always practical to use the later photography on the plotter. However, where the 1952 was not used on the plotter the shoreline was checked graphically and corrected, if necessary, with the later photos. The southern end of Cape Mendenhall (T-9947 and 9948) and the area from topo station Carl (T-9741) to topo station Rock (T-9737) was covered by the 1950 photos only.

The field inspection, for the most part, appeared to be adequate; however, several rocks, awash, off Cape Mendenhall were not field inspected and consequently no reference to datum is shown.

37. LANDMARKS AND AIDS: None submitted by field party.
38. CONTROL FOR FUTURE SURVEYS:

Notes for the hydrographer are submitted for each map included in this report. Forms 524 were submitted as follows: T-9734 - 1; T-9735 - 1; T-9737 - 1; T-9738 - 3; T-9739 - 4; T-9740 - 1; T-9741 - 2.

* Filed in Photogrammetry Div.
The positions of three of the four topographic stations which were located by sextant fixes on T-9738 and T-9739 have been listed as approximate. (See Paragraph 27, "Radial Plot Report.") The position of Alex, 1951 was determined from the pricking card and description, and is believed to be within the accuracy requirements. The positions of stations Ooe, Flag and High were determined by the same method but are believed to be approximate only. They have been indicated on the manuscript with a dashed circle. The positions were marked approximate on the 524 cards.

39. JUNCTIONS: Only the instrument work sheets were joined in this section.

40. HORIZONTAL AND VERTICAL ACCURACY: See radial plot report.

46. Comparison was made with USGS, 1:250,000 scale maps "Nunivak Island" and "Cape Mendenhall", 1951.

47. Comparison was made with Nautical Chart No. 9102.

48. GEOGRAPHIC NAMES: Several of the summer camps which were indicated on the geographic names sheet were difficult to locate on the photos. Most of the camps consisted of scattered sod huts or tent frames which could not be delineated from the photos. A dashed line was penciled on the work sheets as near as possible to the point of the leader inked on the names sheet which was a 1:200,000 scale mosaic. Some of these camps were also labeled "barabaras" by the shoreline inspection party. This label was omitted where a summer camp name was furnished.

An apparent discrepancy was noted in the naming of two large sand dune areas northeast of Cape Mendenhall by the field party. The names Nunathloogamiuthingoi and Ongolambingoii were applied to the same area. The former name was moved by the compiler to a large unnamed dune area in the vicinity of a town having the same name.

All names have been shown on the work sheets and have been listed and attached to the report for the 1:40,000 scale topo manuscripts. (T-10365 thru T-10379)

Respectfully submitted:

Louis Levin
Supervisory Cartographer
Nine Lens Unit

Approved and Forwarded:

Charles Theurer
Supervisory Photogrammetric Engineer
Review Report  
Shoreline Surveys T-9734 Thru T-9741  
14 March 1956

62. **Comparison with Registered Topographic Surveys:**

T-2610  1:400000  1902

A portion of this survey falls in the area of T-9734 and is to be superseded by T-9734 for nautical charting purposes.

63. **Comparison with Maps of Other Agencies:**

Cape Mendenhall, Alaska (USGS), 1:250000, 1951  
Nunivak Island,  

Topographic and planimetric details are very generalized and approximate on these maps which preclude a detailed comparison.

64. **Comparison with Contemporary Hydrographic Surveys:**

None.

65. **Comparison with Nautical Charts:**

9302, 1952 corrected to 53-6/15

No discrepancies.

66. **Adequacy of Results and Future Surveys:**

Only a limited field inspection of alongshore features was made. Thus these features are somewhat generalized and are subject to errors in office interpretation of foul limits, rock heights, etc. Otherwise, no significant deficiencies in accuracy or adequacy of the maps were indicated.

Everett H. Ramey

NOTES TO THE HYDROGRAPHER

Topographic station located by radial-line plot:

Beat, 1951 identified on field photo 28977

Topographic stations located by transfer from field photo identification to manuscript while holding adjacent detail (resection by sextant fixes gave erroneous and multiple location. Positions are approximate only:

Flag, 1951 identified on field photo 28978
High, 1951 28978

Hydro stations located by radial-line plot:

Hydro 100 identified on field photo 28954
Hydro 101 28978
NOTES TO THE HYDROGRAPHER

Topographic stations located by radial-line plot:

- Bent, 1951 identified on field photo 29011
- Hard, 1951 28953
- Alex, 1951 28979

Topographic station located by transfer from field identification photo to manuscript while holding adjacent detail (resection by sextant fixes gave erroneous and multiple locations): Approximate position.

- Oboe, 1951 29011

Hydro station located by radial line plot:

- hydro 102 identified on field photo 28979
T-9740
